## 2024 POLICY RESOLUTIONS

ZEAR OF TH

FARMER

ILLINOIS FARM BUREAU.

ILLINOIS AGRICULTURAL ASSOCIATION®

## FOREWORD

The Illinois Farm Bureau grassroots policy development process provides every voting member the opportunity to make known their policy statements about issues important to them. When properly supported through the grassroots policy development process, these policy statements are considered and may be adopted by the voting delegates at our annual meeting each December.

That delegate action guides the direction of the organization in carrying out its programs each year. It is from this grassroots input and direction that Farm Bureau realizes its strength as an organization serving the needs of our members.

Our focus now shifts to the collective efforts necessary to implement this policy. The commitment of everyone to this policy, adopted by the majority of voting delegates, is needed if we are to succeed. Please join us as we work towards our mission, which is to improve the economic well-being of agriculture and enrich the quality of farm family life.

Brian Duncan, President Illinois Farm Bureau

1 2	1. PHILOSOPHY OF FARM BUREAU
3 4 5 7 8 9 10 11 12 13 14	Illinois Farm Bureau recognizes freedom, the dignity and worth of the individual, equal opportunity, initiative and compensation for accomplishment, as basic concepts responsible for our country's progress and stature among the nations of the world. We believe the strength of every civilized society is the family. The encouragement of the family unit where morals, values, parental responsibilities, and strong work ethics are exemplified and taught is of paramount importance. This must be considered an individual and local responsibility. We believe in the sanctity of private property and individual rights as provided by the U.S. Constitution, as the basis of American freedom and progress. The principles of our economic system derive from and are consistent with our religious values and goals. Through this system the American people have excelled and produced abundant goods and services for themselves and for people of other nations and have enjoyed widespread educational advantages and religious opportunities.
15 16 17 18	We believe in incentives, individual responsibility, initiative, freedom and the right to work without governmental dependence. If our organization and our country are to continue to be free and strong, we must act to determine our own destiny.
19 20 21 22 23	Each individual must assume active responsibility for maintaining and strengthening the principles upon which our government was founded and vigorously oppose all programs and policies which erode its foundation. We deplore irresponsible acts of defiance and lack of respect for laws enacted by our elected governmental representatives at all levels.
24 25 26 27	Illinois Farm Bureau philosophy must represent the thinking of a majority of its members so their organization can achieve maximum effectiveness and influence. The autonomy of the local unit must be maintained to preserve a strong grass roots organizational base.
28 29 30 31 32 33	Illinois Farm Bureau is an organization through which farm people can work together and cooperate with others to strengthen agriculture's role and influence as a vital part of a strong, prosperous economy in a free America. As such, membership necessitates participation as the foremost responsibility of the individual and it is incumbent upon and essential to the success of Illinois Farm Bureau that the membership as a whole act when called upon by the organization.
34 35 36	We will assist members in understanding, influencing, and adapting to the changing realities in production agriculture, the rural economy, and rural family life.
37 38 39 40 41	Our national life is founded on spiritual faith and belief in God. We favor leaving "In God We Trust" on coins and currency and "Under God" in the Pledge of Allegiance.
42 43	2. ACTIVATION AND STATUS OF RESOLUTIONS
43 44 45 46	Policies of the Illinois Agricultural Association are subject to review at any official meeting of the voting delegates.
47 48 49	Resolutions adopted at this annual meeting state the current position of the Illinois Agricultural Association.
50 51 52 53 54 55 56	The voting delegates authorize the renumbering, placing, and arranging of the resolutions adopted at this annual meeting with the appropriate subject matter for publication in the current resolutions booklet.

1 2		3. COMPETITION/MONOPOLIES
2 3 4 5 6	will see	pid consolidation of agricultural businesses that serve farmers is a growing concern. We ek information on the merger and acquisition of agricultural businesses and how such rs and acquisitions will help or hinder our members.
7	We su	pport:
8 9 10	1.	Congress, and the relevant federal agencies, working together to closely monitor the agribusiness sector with the objective that current anti-trust laws are applied and enforced to the fullest extent in order to allow full and fair pricing competition to flourish.
11 12	2.	Improvements to existing laws and regulations to empower appropriate agencies to conduct expanded anti-trust review and oversight.
13 14	3.	Anti-trust laws or department operations providing increased protection to competitive markets.
15 16	4.	Limitations enforced on mergers, acquisitions, and joint ventures by the major competitors in agricultural markets dominated by relatively few firms.
17 18 19	5. 6.	Giving the U.S. Department of Justice (USDOJ) broader regulatory authority to include regulation of anti-competitive business behavior to protect farmers as well as consumers. Including the U.S. Department of Agriculture (USDA) in the decision-making procedure
20 21 22	7.	with respect to proposed mergers and acquisitions. The Illinois Attorney General's office to investigate agricultural monopolies in Illinois and cooperate with other State Attorneys General and USDOJ in investigating regional
23 24		monopolies.
25 26 27 28 29 30	market	pose mergers, acquisitions, or leveraged buyouts that create a monopoly of production, ting, and transportation situations or reduce competition in acquiring, pricing, or orting agricultural commodities and products.
31		4. FARM INCOME AND STRUCTURE
32 33 34 35 36		conomic well-being of Illinois farmers will continue to be the NUMBER ONE PRIORITY of the Illinois Agricultural Association. We encourage opportunities for all segments of ture.
37	We su	pport:
38	1.	The freedom of individual farmers to make their own economic decisions.
39	2.	Programs and legislation of an innovative nature which increase net farm income.
40	3.	Programs and legislation which could include items such as agricultural recapitalization,
41		farm asset transfer plans, lowering input costs through technology, and beginning farmer
42		education and loan programs.
43	4.	Provisions that will protect farmers' investments, even as unsecured creditors, in prepaid
44	_	agricultural inputs.
45	5.	Research and development of new marketing, finance, computer, farm business
46		management, and personal development programs as needed to improve member income
47		and efforts to increase members' use of those programs.
48 49	6.	Monitoring and encouraging appropriate federal and state agencies, and to monitor the retail-to-farm price spreads for all major agricultural commodities.
49 50	7.	Open markets to link members with economic opportunities, including cooperative
50 51	<i>ı</i> .	ventures, presented by rapid changes in agriculture.
52	8.	Facilitating value-added opportunities for farmers.
53	9.	Monitoring trends affecting farmers and strive to place an increased emphasis on
53 54	Э.	educational programs for farmers on various opportunities available.
55	10.	Research into the delivery location, pricing and other factors associated with grain
56	10.	marketing so producers may receive the best possible price for their crop.

1 2		5. AGRICULTURAL AND VOCATIONAL EDUCATION
3	Wo o	ipport:
3 4 5	1.	Continuation of agricultural education programs with emphasis placed on the recruitment and training of qualified agricultural instructors.
6 7 8 9 10	2.	Efforts by county Farm Bureaus working closely with their local school districts to establish and ensure the maintenance, improvement and continuation of agricultural education programs and FFA. High school agricultural education and the FFA are vital programs for development of the talent and leadership needed in farming and agricultural service industries.
10 11 12	3.	Efforts to expand agricultural and vocational programs including post high school training and retraining for skilled agricultural and vocational workers.
13 14	4.	Retention of primary administrative responsibility for vocational programs at the state and local levels.
15 16 17 18	5.	Efforts by county Farm Bureaus to work with their school districts to implement an updated agricultural education curriculum to meet the needs of today's agriculture. The curriculum should include technology, agricultural science, vocational courses or other classes that would meet the criteria needed to receive credit for a college prep course.
19	6.	The inclusion of agricultural projects in school science fairs.
20 21 22	7.	Maintaining the Agricultural Education funding within the Illinois State Budget line item no less than the funding level of \$7,050,000 and within the Illinois Department of Agriculture budget of \$550,000.
23 24	8.	The recognition of agricultural education as a Teaching Shortage Area by the Illinois State Board of Education and/or Illinois General Assembly.
25 26 27 28 29 30	9.	Encouraging colleges and universities to offer an internship program as part of their curriculum for students studying to become vo-ag instructors. The purpose of the internship would be to gain real world experience by providing hands-on experience working on a farm, at an agriculture business or for agriculture related organizations. To provide a variety of opportunities the internship should not be limited to any one type of farm operation.
31 32 33 34 35 36	10. 11.	The Illinois Committee for Ag Education (ICAE) and the Illinois Leadership Council for Ag Education (ILCAE) efforts to promote and improve Agricultural Education within the state. The development of a certified Ag Teacher education program within the Chicago- metropolitan area.
37 38 39		6. AGRICULTURE IN THE CLASSROOM
40 41 42 43 44 45 46 47	farme under its citiz Agricu levels	apport an effort to enhance the image of agriculture and promote the positive activities of rs and agribusiness. This effort enables students and teachers in the classroom to stand the importance and contribution of American agriculture to the U.S. economy and all zens. We recommend that a higher priority be placed on increasing resources for Illinois alture in the Classroom programs. Instruction should be directed to all students of all grade about environmental, nutritional, agronomic, and animal agriculture issues, and will ate materials to the standards as prescribed by the Illinois State Board of Education.
47 48 49 50 51 52 53 54 55 56		ncourage all county Farm Bureaus to participate in Illinois Agriculture in the Classroom and agricultural education activities.

1 2		7. COMMUNITY COLLEGES
2 3	We su	pport.
4 5	1.	Requiring the state to provide a major part of the operating funds for the Illinois Community College program.
6	2.	Special emphasis on vocational, technical and semi-technical training.
7	3.	The charging of tuition as partial support for community colleges.
8	4.	Area-wide representation for Community College Boards.
9	5.	County Farm Bureaus surfacing and supporting candidates from rural areas for
10		Community College Boards.
11 12	6.	Efforts to revise current associate agricultural degree programs to make the agriculture curriculum more contemporary.
13		
14		
15		
16		8. EDUCATION
17		
18		sure quality education for all Illinois children, we endorse the principles of accountability,
19		acy, and equity and will actively work to include these principles in any commission, task
20	force,	or legislative proposal.
21		
22		ntability is the efficient use of taxpayers' dollars to provide a comprehensive education to
23 24	achiev	e goals with measurable outcomes.
24 25	lt inclu	ides the size and structure of school districts, the operation/administration of school districts
26		erformance of school districts in achieving desirable educational outcomes.
27	<b>M</b> /a au	a no sub
28 29	We su	
30	1.	Seeking significant long-term solutions to the problems of financing a quality education for all students through political, legislative, or judicial means.
31	2.	Seeking full funding for general state aid and transportation funding to school districts.
32	3.	Timely delivery of meaningful state incentives to support voluntary school consolidation
33	0.	and other forms of school district reorganization.
34	4.	Teacher/staff professional development to improve teaching quality and to address
35		challenges associated with the School Recognition Process.
36	5.	Seeking the removal of tenure and replacing it with a merit program for teacher evaluation.
37	6.	The goal of preserving and strengthening local control of schools.
38	7.	School district reorganization when determined locally by each district and if approved by
39		front door referendum. The requirements of a reorganization vote should consist of the
40		following:
41		A. Either each board of education initiate the reorganization vote or petitions
42		requesting the reorganization vote from 10 percent of the registered voters in each
43 44		<ul><li>district be required for a referendum.</li><li>B. A majority of those voting on the reorganization be required for passage in either a</li></ul>
45		unit or dual district.
46		C. Referendum consideration should be restricted to general elections only.
47		D. Taxpayers in the proposed consolidation area should be given the property tax
48		implications of the proposed consolidation in advance of the referendum vote.
49	8.	Efforts to allow school district annexation proceedings to occur through approval of the
50		Regional Board of Trustees provided public notice and hearing requirements are met.
51	9.	The formation of co-operative high schools when such co-operatives would broaden and
52		enhance academic opportunities and will result in economic efficiencies.
53	10.	Innovative pilot efforts that include creative partnerships with business and industry, higher
54		education and government; encourage exploration of new ideas and new approaches to
55		make schools more effective and efficient. Ideas and approaches should include, but not
56		be limited to, Charter Schools, Distance Learning, and new approaches to Vocational

1 2 3 4	11.	Education, Special Education, and transitioning to a new educational model centered on classrooms that emphasize creativity, innovation and teamwork while helping individual students identify their passions earlier in their educational experience. Policies allowing local initiatives to increase academic time such as restructuring the
5 6 7 8	12.	school day, calendar and schedule. County Farm Bureaus to establish programs which assist members in understanding and participating in their schools. Such programs may include meetings with school boards and school administration to establish open communications about district operations,
9 10	13.	curriculum development, budgeting and finance. Full funding of state and federal education mandates by the entity proposing the mandate
11 12 13 14	14.	and a full review of those mandates every three years. Seeking legislation limiting the requirement for schools to fund special education to the education component only. The State of Illinois should be required to provide student housing and medical care within state or federal agencies.
15 16	15.	Requiring a hearing by local school boards before levying a tax for Life Safety and Energy Conservation bonds if such bond issues exceed \$100,000.
17 18 19	16.	Evaluating the legislation and rules concerning the waiver of mandates requested by local school districts. The legislature needs to evaluate each request on its own merit.
20 21	Adequ progra	acy is financing education at a level sufficient to fund a comprehensive educational
22 23		in north
23 24	We su 1.	The concept of using a foundation level of funding as determined in the Education Funding
25 26		Advisory Board report. This level should be recalculated annually and be based on the desired level of outcome.
27 28	2.	The use of prior year Equalized Assessed Valuation (EAV) to provide accurate information for school budgeting and fiscal management.
29 30 31	3.	Retention of categorical grants that address special needs and allow all schools to benefit. Revenue from other categorical grants, which are competitive, should be included in the general state aid formula.
32 33 34	4.	A State funded capital program to assist school districts in modernizing existing facilities. This program should include funding for the Americans with Disabilities Act (ADA).
35 36 37	Equity fundeo	r is fairness in educational opportunities for students and fairness in the way education is d.
37 38		ipport:
39		The concept of leveling up (defined as reducing overall variation by increasing the
40		expenditure/revenue per student at the lower end of the distribution).
41 42 43	2.	A local individual income tax for education, by front door referendum. The local income tax rate should be a fixed flat rate for all school districts. The revenues from such a tax could be used as local tax effort, to replace property tax revenues, to enrich educational
43 44		opportunities above the foundation level or some combination thereof.
45	3.	Requiring an equitable local tax effort in every school district as an important part of
46		achieving fairness in educational opportunities for students and fairness in the way
47		education is funded.
48	4.	Increased State investment in technology to increase productivity, enhance student
49 50	F	achievement, expand learning time and staff development.
50 51	5.	Efforts to improve and expand the curriculum and delivery of services in small and rural
51 52		schools through development of a statewide two-way telecommunication system or other means of communication technology.
52 53	6.	Cooperation between school districts through inter-governmental agreements.
54	7.	Working with the State Board of Education to simplify grant application requirements.
55		
56		

1 2 2	8.	The general concepts of the Education Funding Advisory Board (EFAB) of the Illinois General Assembly relating to property tax relief, adequate funding for schools, and school
3 4 5 6	9.	reorganization. Teaching concepts of Science, Technology, Engineering and Math (STEM) in public schools in the State of Illinois. We support amending these teaching concepts to include agriculture: Science, Technology, Engineering, Agriculture, and Math (STEAM).
7 8	10.	Monitoring the work of the Vision 20/20 elementary and secondary education reform coalition.
9 10 11	11.	Increasing engagement of students in local, state, and federal activities in an effort to gain a better understanding and knowledge of the political process and the importance of civic engagement.
12 13 14 15		pose shifting responsibility for the state's contribution to the Teachers Retirement System on the local school districts.
16 17		
18 19		9. HIGHER EDUCATION
20	We su	prort:
21 22	1.	Eligibility guidelines for publicly financed college scholarships, loans and grants to ensure farm youth have equal opportunity.
23 24	2.	Retention and enhancement of agricultural curriculum and research at institutions of higher learning.
25 26	3.	A coordinated long-range plan developed by the state institutions of higher learning to maintain quality agricultural education and research facilities.
27 28	4.	Student loans and continued efforts to recover principal and interest from persons who have defaulted on their government-backed guaranteed student loans.
29 30	5.	Co-Curricular agricultural organizations which allow hands-on experience for students to further develop their leadership skills.
31 32	6.	A balance between professors' classroom instruction and research time at institutions of higher learning.
33 34 35 36	7.	Continued collaboration between state supported higher education institutions to implement standardized curricula, including credit hours awarded and requirement fulfilled for the course, to make it easier for students to transfer between all levels of institutions of higher learning.
37 38 39	8.	The continuation of the University of Illinois "South Farms." Further university expansion and community development should not sacrifice the advantages which the "South Farms" currently provide for the teaching and research needs of agriculture.
40 41 42	9.	The continuation and funding of the existing University of Illinois outlying research centers. Before any long term changes are made at any of the centers, we encourage seeking input from local stakeholders at or near the center.
43 44	10.	The study of funding quality and cooperation of agricultural programs at institutions of higher education.
45 46 47 48 49	11.	Changing the selection process for all state of Illinois funded public university Boards of Trustees in order to make the board more accountable to the voters and taxpayers of the state. We will also seek changes in how these Boards of Trustees conduct their meetings in order to ensure items cannot be added to the agenda and voted on without public debate and input.
50 51	12.	Colleges and universities giving significant weight, recognition, and credits where available to agricultural courses within their admission process.
52 53 54 55 56	13.	The current unified Southern Illinois University Board of governance with multiple campuses to better provide cost effective administration and better use of taxpayer's dollars.

1	We op	pose:
2	1.	Efforts of the Illinois Board of Higher Education to mandate additional course requirements
3		for entrance to Illinois public universities.
4	2.	The selling and privatization of the Illinois Student Assistance Commission's secondary
5		market student loan portfolio.
6		
7		
8		
9		10. UNIVERSITY OF ILLINOIS EXTENSION
10		
11	A viab	le University of Illinois Extension will help individuals, families, farms, businesses, and
12		unities adapt to change in an increasingly technical world. The University of Illinois
13		sion and the Land Grant University system must maintain the expertise needed to train
14		tent people for programs in agriculture and natural resources, family and consumer
15		e, 4-H and youth development, and community and economic development. To meet these
16		the University of Illinois Extension should:
17	1.	Be a conduit for information exchange between the research community, farmers, and the
18		citizens of Illinois.
19	2.	Increase clientele access to and understanding of multi-media data information systems.
20	3.	Assess the needs of their clientele and focus their efforts on these needs.
21	4.	Maintain fair and equal access to the University of Illinois Extension resources,
22		information, and programs.
23	5.	Give counties more flexibility in the hiring practices of educators. The university should
24		develop options where units may join together to hire specialist(s) to help more farmers
25		and individuals at the county level.
26	6.	Educate the general public that the University of Illinois Extension is a part of the U.S.
27		Department of Agriculture.
28	7.	Educate the general public about production agriculture's primary contribution to the food,
29		fiber, nursery and greenhouse growing industries and other U.S. food sources.
30		
31	We su	pport:
32	1.	Continued public funding of the University of Illinois Extension and urge county Farm
33		Bureaus to participate in the development of the University of Illinois Extension as an
34		efficient educational organization in their county and support the continuation of basic
35		agricultural education programs for Illinois families.
36	2.	Requiring a full accounting of all transactions of the Extension Unit to be presented to that
37		Unit's Advisory Council at each regular meeting.
38	3.	Maintaining the conference judging format in order to ensure maximum 4-H member
39		participation and encourage public display of these projects.
40		
41		
42		
43		11. ENERGY
44	14/-	an a th
45	We su	
46	1.	A national and Illinois energy policy focused on meeting or exceeding our country's needs
47		by using a blend of renewable and non-renewable sources. This policy considers national
48		energy security, sound agricultural land use, protection of the environment and decreased
49 50	2	dependence on foreign energy sources.
50	2.	Efficient and reliable infrastructure that consistently meets the energy needs of rural and
51		urban areas while encouraging market competition to keep energy costs as low as
52 53		possible. This includes sufficient energy supply for farms and grain elevators when
53 54	3.	needed for the production and storage of agricultural products. Independent and University research to evaluate energy conservation, cost-efficiency, and
54 55	э.	rural impact of current and/or new energy sources. This includes the research of coal
55 56		gasification and other new technologies.
00		gaomoution and other new teenhologies.

1 2	4.	The use of domestic sources of energy, such as Illinois coal, mainland and offshore oil reserves, and the building of new refineries and supply pipelines that can produce a
3 4 5 6	5.	steady supply of energy. Working with legislators to enable more U.S. oil and gas production by opening known oil and gas reserves in the Arctic National Wildlife Refuge (ANWR), offshore and on the U.S. mainland, exploring for additional oil and gas sites, and building new oil and gas refineries.
7 8 9	6.	Education, and incentives to further the development of renewable energy including, but not limited to, renewable fuels, wind, solar, biomass, and methane digesters. This includes the basic goals and objectives of the 25x25 Alliance promoting renewable energy.
10 11	7.	Renewable Energy Standards (RES) to encourage the development of more renewable sources for energy production.
12	8.	Exploring ways to increase propane storage on farms and at grain drying facilities.
13		
14 15	W/o ci	upport: Renewable Fuels
16	1.	Expanding the use of all renewable fuels.
17	2.	Approval and use of greater ethanol blends in high-octane fuels to help automobile
18	2.	manufacturers meet increasing regulatory standards.
19	3.	Making permanent state and federal tax credits and other programs that provide
20		incentives for the use of bio-based fuel additives, renewable fuels, cellulosic fuels, and the
21		renewal of these tax credits.
22	4.	State incentives that stimulate an increase in the demand for ethanol and biodiesel.
23	5.	Local ordinances requiring self-service filling stations to sell mid-grade E-15 fuels.
24	6.	The Renewable Fuels Standard 2 (RFS 2) as passed in the Energy Independence and
25 26	7.	Security Act of 2007. Government-supported research directed toward reducing production costs, improving
20 27	7.	conversion technology, and developing new feedstocks which shall not be limited to
28		cellulosic and biomass renewable fuel production.
29	8.	An increase in the ethanol blending standard.
30	9.	Programs and efforts to increase renewable fuel production in Illinois.
31	10.	Investment in and development of the appropriate infrastructure (including, but not limited
32		to, the funding of biofuel blender pumps and the standardization of all new gasoline
33		dispensers to be UL Certified for a minimum E-25) to support the expanded use of
34		renewable fuels.
35	11.	The continuation of a renewable fuels use requirement on all state owned and/or leased vehicles when and where available.
36 37	12.	The cost of purchasing biodiesel as an allowable expense in the Congestion Mitigation Air
38	12.	Quality (CMAQ) program.
39	13.	Federal research for better performing engines that run on E85 fuels.
40	14.	Research on new uses and markets for co-products of renewable fuels production and
41		investigation of synergistic relationships in renewable fuels production systems and other
42		potential markets.
43	15.	Continued research into ruminant and non-ruminant feed utilization of renewable fuels
44		Distiller's Dried Grains with solubles (DDGs) co-products and farmer education on
45	10	appropriate use of DDGs in livestock diets.
46 47	16.	Quality control standards at renewable fuel plants that result in uniform, high quality co- products from renewable fuels.
48	17.	Testing of ethanol at terminals to ensure uniform quality prior to blending.
49	18.	Nationwide adoption and implementation of American Society of Testing and Materials
50		(ASTM) standards for all renewable fuels.
51	19.	Requiring retailers to display the percentage blend of biodiesel blend and its content upon
52		development of accepted standards and accurate tests to measure those blends.
53	20.	Efforts to educate consumers and industry on the benefits of biofuel blends higher than
54	0.1	ten percent.
55 56	21.	Transparency in the use of federal and state renewable fuels tax incentives that promote
56		the use of domestically grown commodities for domestically produced renewable fuels.

1 2	We su	Solar Energy
2 3 4	1. 2.	Solar energy generation as a component of the energy portfolio of the U.S. Public and private efforts to develop solar energy projects in the State of Illinois.
5 6 7 8 9 10	3.	The establishment of statewide standards for commercial solar energy conversion systems that provide adequate protection of public health and safety, protect private property rights, and allow for reasonable development of commercial solar energy conversion system projects. Such standards should include, but are not limited to, farmland preservation, protection of natural resources, safety issues from glare, property setbacks, or other siting issues, and ensuring adequate funds are in place for
11 12 13		decommissioning. Developments should be prioritized to be placed on non-prime farmland. Projects should be required to minimize impact on adjacent non-participating landowners.
14 15 16 17	4.	Requiring an Agriculture Impact Mitigation Agreement (AIMA) to be filed with the Illinois Department of Agriculture (IDOA) for all commercial solar energy projects and allows for the enforcement of the AIMA by the IDOA when the agreement has been violated by stopping the project until the violation has been corrected.
18	5.	A statewide standard for assessing solar energy projects.
19	6.	Legislation requiring the owner of the solar energy project to pay 100% of the property
20	7	taxes associated with their solar energy generation at the time they are due.
21 22	7.	Efforts to locate solar energy projects on marginal or underused lands, including brownfield sites, highway right-of-ways, entrance and exit ramps, rest areas, welcome
22		centers, embankments, on Illinois Department of Natural Resources (IDNR) non-tillable
24		properties, on urban and rural roof tops, vacant lots, farmsteads, and/or over parking
25		areas, rather than highly productive, tillable farmland.
26	8.	County Farm Bureau efforts to work with their county officials and local Soil and Water
27		Conservation Districts (SWCDs) to develop appropriate commercial solar energy
28		conversion systems land use regulations for their county.
29	9.	Counties granting local SWCDs the right to inspect violations of county land use
30 31		regulations or to identify violations of AIMA provisions during construction, maintenance, and deconstruction. The cost to SWCDs for providing service to the county should be
32		borne by the solar energy conversion system developer.
33	10.	Requiring a comprehensive drainage plan to be developed for farmland where surface or
34		subsurface drainage will be impacted as a result of the construction, maintenance, or
35		deconstruction of a proposed commercial solar energy conversion system.
36	11.	Legislation allowing the landowner the option to terminate a solar lease agreement if the
37		solar panels fail to produce energy for a period longer than 12 consecutive months.
38	12.	Statewide regulations requiring a notice of intent to construct for commercial solar energy
39		projects.
40	13.	Statewide regulations requiring a hearing prior to the construction of a commercial solar
41		energy project.
42	14.	Requiring solar energy developers, contractors, and subcontractors to be informed of the
43	. –	requirements of the signed AIMA and maintain a copy at the solar energy project site.
44	15.	Solar Energy Conversion System (SECS) projects being considered non-agricultural
45		production.
46		
47	We op	
48	1.	Giving private solar energy or solar development companies eminent domain authority.
49 50	2.	Solar energy conversion systems creating any negative impacts to both surface and
50 51		subsurface soil productivity from construction, deconstruction, or maintenance activities
51 52		that violate construction during wet weather regulations.
52 53		Wind Energy
53 54	We su	
54 55	1.	Wind energy generation as a component of the energy portfolio of the U.S.
56	1.	whice energy generation as a component of the energy portion of the 0.0.

1	2.	Continuation of the current property tax assessment method and rate for commercial wind
2		turbines in Illinois.
3	3.	Requiring the owner of the wind energy project to pay 100% of the property taxes
4 5		assigned to the Parcel Identification Number (PIN) designated for the wind power facilities
5 6	4.	until they are decommissioned and re-classified to farmland. The establishment of statewide standards for commercial wind energy conversion systems
7		that provide adequate protection of public health and safety, protect private property
8		rights, and allow for reasonable development of commercial wind energy conversion
9		system projects. Such standards should include, but are not limited to, property setbacks,
10 11		other siting issues, performance bonds, and ensuring adequate funds are in place for decommissioning and non-payment of property taxes. Developments should be prioritized
12		to be placed on non-prime farmland. Projects should be required to minimize impact on
13		adjacent non-participating landowners.
14	5.	County Farm Bureau efforts to work with their county officials and local SWCDs to develop
15		appropriate commercial wind energy conversion systems land use regulations for their
16 17	6.	county. Counties granting local SWCDs the right to inspect violations of county land use
18	0.	regulations or to identify violations of AIMA provisions during construction, maintenance,
19		and deconstruction. The cost to SWCDs for providing service to the county should be
20		borne by the wind energy conversion system developer.
21 22	7.	Requiring a comprehensive drainage plan to be developed for farmland where surface or
22		subsurface drainage will be impacted as a result of the construction, maintenance, or deconstruction of a proposed commercial wind energy conversion system.
24	8.	Requiring an AIMA to be filed with IDOA for all commercial wind energy projects and
25		allows for the enforcement of the AIMA by IDOA when the agreement has been violated
26	0	by stopping the project until the violation has been corrected.
27 28	9.	Requiring wind energy developers, contractors, and subcontractors to be informed of the requirements of the signed AIMA and maintain a copy at the wind energy project site.
29	10.	Wind Energy Conversion System (WECS) projects being considered non-agricultural
30		production.
31		
32 33	1.	opose: WECS creating any negative impacts to both surface and subsurface soil productivity from
34		construction, deconstruction, or maintenance activities that violate construction during wet
35		weather regulations.
36	2.	Granting private WECS companies eminent domain authority.
37 38		Battery Energy Storage Systems (BESS)
39	We su	ipport:
40	1.	BESS as a component of the energy portfolio of the U.S.
41 42	2. 3.	A consistent property tax assessment method and rate for commercial BESS in Illinois. Requiring the owner of the BESS project to pay 100% of any assessed property taxes
42 43	З.	assigned to the PIN designated for the BESS facilities until they are decommissioned and
44		reclassified to farmland.
45	4.	The establishment of statewide standards for commercial BESS systems that provide
46		adequate protection of public health and safety, protect private property rights, and allow
47 48		for reasonable development of BESS projects. Such standards should include, but are not limited to, property setbacks, other siting issues, performance bonds, and ensuring
40 49		adequate funds are in place for decommissioning and non-payment of property taxes.
50	5.	Efforts to locate BESS projects on marginal or underused lands, including brownfield sites,
51		and on IDNR non-tillable properties rather than highly productive, tillable farmland.
52 52	6.	County Farm Bureau efforts to work with their county officials and local SWCDs to develop
53 54	7.	appropriate BESS land use regulations for their county. Counties granting local SWCDs the right to inspect violations of any county land use
55		regulations or to identify violations of any required AIMA provisions during construction,
56		

1		maintenance, and deconstruction. The cost to SWCDs for providing service to the county
2		should be borne by the BESS developer.
3	8.	Requiring a comprehensive drainage plan to be developed for farmland where surface or
4	•	subsurface drainage will be impacted as a result of the construction, maintenance, or
5		deconstruction of a proposed BESS.
6	9.	Requiring an AIMA to be filed with IDOA for all BESS projects and allows for the
7	9.	
		enforcement of the AIMA by IDOA when the agreement has been violated by stopping the
8	4.0	project until the violation has been corrected.
9	10.	Requiring BESS developers, contractors, and subcontractors to be informed of the
10		requirements of any signed AIMA and maintain a copy at the BESS site.
11	11.	BESS being constructed, maintained, and operated in accordance with the original
12		equipment manufacturer's guidance and national industry standards and regulations.
13		BESS shall comply with the most current adopted edition of the National Electric Safety
14		Code and the International Fire Code.
15	12.	Each BESS enclosure being equipped with a fire suppression system to respond to a
16		thermal event.
17	13.	Environmental cleanup and monitoring of the materials inside the battery, should they leak
18	10.	or corrode.
19	14.	BESS projects being considered non-agricultural production.
	14.	BESS projects being considered non-agricultural production.
20	14/	
21		ppose:
22	1.	BESS creating any negative impacts to both surface and subsurface soil productivity from
23		construction, deconstruction, or maintenance activities that violate construction during wet
24		weather regulations.
25	2.	Granting private BESS companies eminent domain authority.

Upon request, we will hold meetings with landowners before and after completion of the project to address questions and concerns of landowners.</li> <li>Working with American Farm Bureau Federation (AFBF) to seek federal legislation requiring all federally permitted utility projects to have minimum construction standards in place before granting permits to utility companies wishing to construct on farmland.</li> <li>Working with electric and gas suppliers in Illinois to evaluate potential load requirements</li> </ul>

1	9.	The appointment of the ICC and encourage the appointment of at least one commissioner
2 3	10.	who is knowledgeable about agriculture. Regulations requiring all pipeline companies to manage existing pipelines shallower than
4 5		two (2) feet and maintain to a level of five (5) feet of cover from existing grade within two years of discovery, subject to the landowner discretion.
6	11.	Legislation requiring all future underground pipelines being buried across agricultural
7		lands to follow the contour of the surface maintaining a minimum topcover of 60 inches.
8	12.	Action by the ICC to adjust all Illinois utility companies' summer rate time period cut-off
9 10	13.	dates in order to achieve a statewide September 15 summer ending date. Legislation that would provide for some form of constitutional taxation of underground
10	15.	pipelines by the State of Illinois and payment in lieu of taxes to benefit local units of
12		government where pipelines are located.
13	14.	Regulatory oversight of anhydrous ammonia pipelines by the Surface Transportation
14	45	Board due to the monopolistic nature of the industry.
15 16	15.	Legislation that would create a surcharge or a fee-based "Pipeline Fund" to address potential environmental problems caused by abandoned pipelines.
17	16.	Legislation requiring pipeline companies to remove abandoned or obsolete pipelines from
18		the ground and to ensure that the affected areas be returned to the original productivity.
19	17.	Efforts to assess telecommunication needs in rural areas and ensure that
20		telecommunication providers in partnership with rural communities meet those identified
21 22	18.	needs. Legislation requiring utility companies to remove municipal taxes from bills of rural
23	10.	residences.
24	19.	Requiring appropriate landowner, trustee, or tenant notification in all utility easement
25		agreements.
26	20.	Requiring all utilities installing equipment on the right-of-ways to inform the adjacent
27 28		property owner at least 30 days prior to the proposed change so the landowner can inform the utility of field drainage tiles, and if needed, watch the work conducted to make sure
29		that the field tile is not damaged. If damaged, the utility should be required to properly fix
30		any damage as soon as possible or within 90 days at the discretion of the landowner or
31		tenant.
32	21.	Seeking to develop a positive approach, to protect farmland, farm owners, and operators
33 34		from losses caused by utility installations. The utilities should be constructed in a manner to cause the least possible interference with agriculture.
34 35	22.	Efforts to further enhance the 8-1-1 internet-based location service to accommodate whole
36		field utility location services, using whole field boundaries.
37	23.	Seeking the requirement, that upon notice to a utility company that owns or controls
38		underground utilities, including fiber optic equipment and lines, by an individual or entity
39 40		who is planning on excavating under or over such lines, the utility company shall excavate
40 41		a minimum area to expose such line. This minimum area excavated by the utility company shall be large enough to allow the individual or entity planning on excavating to conduct
42		their needed work in a way as not to damage the line.
43	24.	Legislation to allow landowners to recover attorney fees if they prevail in a lawsuit
44		enforcing the terms of an easement, or to recover damage to property or crops with a
45	05	public utility and/or their subcontractor.
46 47	25.	Seeking legislation requiring all utility and pipeline projects that are constructed/buried across agricultural land complete an Agricultural Impact Mitigation Agreement (AIMA) with
48		the IDOA before landowners are contacted about the project.
49	26.	Seeking legislation that requires pipelines and utilities to enter into an AIMA agreement
50		with the IDOA that strengthens the enforcement of the AIMA by the IDOA when the
51		agreement has been violated by a utility or pipeline company and the project can be
52 53	27.	stopped until the project violation has been corrected.
53 54	21.	Seeking legislation to establish an obligation on the part of the ICC to require a finding from the IDOA that minimum construction standards are required for any proposed utility
55		projects before companies are granted permits to construct improvements.
56		

1 2	28.	Seeking further study on the proper means to compensate farm owners affected by utility installations. This should require certain minimum standards for compensation
3 4 5 6 7	29.	agreements or annual payments for certain structures. Compensation should include cost of repairs to damaged infrastructure and crop losses as a result of damaged infrastructure. Seeking legislation to require all utilities, proposing acquisition of rights-of-way for utility projects, to send written notice of intention to acquire such right-of-way to landowners and lessees at least 90 days prior to any personal contact with the landowners and lessees for
8 9	30.	purposes of negotiating such right-of-way acquisition. Legislation that any blanket easement created after January 1, 2018, (or other appropriate
10 11 12 13 14 15	31.	future date) shall be void and considered against public policy and wholly unenforceable. Seeking legislation to amend the Expedited Review provisions of the Illinois Public Utilities Act to better protect the property rights of landowners who may be impacted by utility projects. Also remove the 45-day deadline the ICC must follow when ruling on eminent domain requests for electric transmission line projects filed under expedited review and instead, request a reasonable timeline for the ruling.
16	32.	Seeking to eliminate the practice of Citizens Utility Board (CUB) literature being inserted in
17 18 19 20 21 22 23 24	33.	<ul> <li>vehicle license renewal notices.</li> <li>Establishing minimum setbacks for overhead transmission lines from sensitive structures (private and public schools, licensed daycare facilities, residences, hospitals, agricultural irrigation systems, and agricultural livestock production facilities) of at least the following distances - unless waived by agreement - from the edge of respective power line easements for new electrical transmission line projects.</li> <li>A. 100 feet for 50-138 kV line.</li> <li>B. 150 feet for 139-339 kV line.</li> </ul>
25		C. 250 feet for 340 kV or larger line.
26 27	34.	Federal regulations requiring telephone and mobile phone customers to "opt in" before receiving phone calls from solicitors who they have not done business with.
28 29	35.	Requiring all entities to obtain explicit and obvious permission from customers before providing their phone number to another entity.
30 31	36.	Efforts to expedite the pipeline permitting process to bring Canadian crude oil to the United States.
32 33 34	37.	Requiring telecommunications companies to remove abandoned or obsolete above- ground telecommunications fixtures from rights-of-way or to properly maintain them, if still in use.
35 36 37 38	38.	Pipeline transportation of carbon dioxide captured from ethanol and fertilizer production to locations with favorable geological formations for permanent storage. All CO2 pipelines should be constructed to protect public safety and should adhere to the Pipeline Hazardous Materials Safety Administration (PHMSA) standards.
39 40 41	39.	A temporary moratorium on the approval of the construction and operation of any carbon dioxide pipeline until the PHMSA promulgates its revised federal safety standards for transportation of carbon dioxide.
42 43 44 45 46	40. 41.	CO2 pipelines should add a distinctive odor to the CO2 to alert people to its presence, utilize enhanced leak detection with automatic shutoffs, automatic notification of emergency services in an area where a leak has been detected, and provide training and equipment donations to first responders in the pipeline area. Legislation that prohibits the use of eminent domain for CO2 pipelines.
40 47 48 49 50 51 52	42.	Developers of carbon dioxide pipelines and storage projects demonstrating progress at securing willing agreements for pipeline easements and willing agreements for storage rights prior to approval of the project by the ICC.
53		13. ABOVEGROUND FUEL STORAGE TANKS
54 55 56		upport revisions to rules regarding aboveground fuel storage tanks to allow each farm to enough aboveground fuel storage to receive a transport load of each specific fuel.

1 2		14. AGRICULTURAL ENVIRONMENTAL PROTECTION
3	Wesi	ipport:
4	1.	Agricultural practices that recognize economic benefits and the ability to manage risks
5	1.	involved with production agriculture.
6 7	2.	Working with other interested agencies and organizations to assure pollution standards and tolerances are scientifically formulated and economically feasible.
8 9	3.	Farmer participation in voluntary, third-party environmental assessments as a means to demonstrate compliance prior to an Illinois Environmental Protection Agency (IEPA)
10		inspection as a means to meet IEPA requirements.
10	4.	A farmer's right to build livestock buildings and other agricultural structures without the
12	4.	threat of litigation as long as they abide by current regulations and guidelines at the time of
13		site approval.
13	F	
	5.	Efforts to provide adequate funds to state and federal agencies for the purpose of aiding in
15		the construction of agricultural pollution control devices and implementation of other
16	0	agricultural practices to meet mandated standards.
17	6.	Working closely with IEPA to develop communication strategies to livestock farmers that
18		are not intimidating, do not involve media or press releases, and develop reasonable
19	-	timelines to address enforcement issues.
20	7.	Modification of the Superfund Amendments and Reauthorization Act (SARA) to exclude
21		farms from the provisions of the Act. Reporting and notification requirements in SARA are
22		too stringent and inappropriate for farming operations.
23	8.	Efforts to exempt farmers from liability provisions of the Comprehensive Environmental
24		Regulatory Cleanup and Liability Act (CERCLA).
25	9.	Research and information examining the effects of crop protection and animal health
26		products on the food chain and the environment.
27	10.	The development of an overall rating system to measure the acute and chronic effects of
28		oral and dermal exposure to crop protection and animal health products.
29	11.	Exempting property owners from financial responsibility for pollution that resulted from
30		previously-accepted farming practices.
31	12.	The removal of setbacks on chemical application in conjunction with tile inlet structures
32		unless proven necessary by scientific data.
33	13.	Changes in the Worker Protection Standards so posting of field entrances does not unduly
34		alarm consumers about the use of certain crop protection products.
35	14.	Legislation which will require a verified name and address from the complainants on all
36	. –	pollution complaint reports.
37	15.	Increased government funding to ensure that landowners are adequately compensated
38		whenever farmland is used for purposes intended to achieve the government's natural
39		resource goals.
40	16.	Increased dollars for educational, promotional, incentive-based, and technical assistance
41		programs and developing the guidelines for the implementation of programs at the local
42		level. We also support developing a separate source of funding either under conventional
43		agricultural conservation programs or U.S. Department of Agriculture (USDA) Rural
44		Development for the establishment of buffers.
45	17.	Legislation indemnifying farmers and farm owners for the cost of clean-up and other
46		damages arising from the pollution of their land by the willful or negligent acts of others.
47	18.	Congress setting specific guidelines and restraints on federal agencies charged with
48		implementing and enforcing federal law. We believe that Congress should provide for
49		strong congressional oversight of regulatory and significant agency actions as well as a
50		willingness to override unacceptable agency actions. We support congressional scrutiny of
51		agencies to prohibit regulatory agencies from administering laws, to deter adoption of
52		agency rules and actions that circumvent statutory intent. Specific efforts should be made
53		to oversee and to reform the inspection and rule-making authority of the U.S.
54		Environmental Protection Agency (USEPA).
55	19.	Environmental regulations clarifying that any discharge occurring prior to the operation of
56		a livestock farm does not require the owner/operator of the farm to obtain a National

1		Pollutant Discharge Elimination System (NPDES) permit for the operation of the
2		Concentrated Animal Feeding Operation (CAFO).
3	20.	Efforts by the IDOA to protect pollinators that involve farmer stakeholders and arrive at
4		reasonable solutions that protect both crops and pollinators.
5	21.	The planting and maintenance of pollinator habitat in areas and using methods that will not
6		create a public safety hazard or a problem for production agriculture.
7	22.	The planting of pollinator habitat on land currently enrolled in USDA programs.
8		
9	We op	pose:
10	1. '	Efforts to place restrictions or moratoriums on a farmer's ability to manage his or her
11		farming operation in a manner consistent with BMPs. Existing operations should not be
12		restricted from expansion nor have undue limits placed upon them due to the
13		encroachment of others.
14	2.	Regulations for septic systems that are not science-based and do not take into
15	۷.	consideration the economic impacts on the homeowner and on the local government.
16	3.	Requiring a NPDES permit for pesticide applications when the applicator complies with the
17	5.	Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).
18	4.	The requirement of a CAFO to need an NPDES permit if it does not discharge.
	4. 5.	
19	5.	Efforts by the IEPA to regulate stored hay as a stored feed.
20		
21		
22		
23		15. ATMOSPHERIC QUALITY
24		
25	We su	
26	1.	Policies that keep agriculture viable and address the costs and benefits of those programs
27	_	using sound, economic analysis.
28	2.	Alternative energy sources which will minimize atmospheric pollution.
29	3.	Providing incentives to industries seeking to become more energy efficient or to reduce
30		emissions of identifiable atmospheric pollutants.
31	4.	Cooperation of organizations and governments, foreign and domestic, to develop better
32		understanding and research on the implications of atmospheric pollution and the means of
33		preventing it.
34	5.	Providing incentives to individuals seeking to reforest fragile lands that are currently in
35		agricultural production.
36	6.	The development of engines that utilize affordable technology to reduce pollution.
37	7.	Requiring the Illinois Environmental Protection Agency to use science-based methods
38		when identifying violations for atmospheric pollution.
39	8.	Passage of a Congressional resolution which strips the Environmental Protection Agency
40		of its authority to regulate greenhouse gases.
41	9.	Research on greenhouse gases.
42		
43	We op	pose:
44	1.	Restrictions on existing off-road equipment emissions.
45	2.	Any changes in the Corporate Average Fuel Economy (CAFE) standards that reduce the
46		availability of trucks.
47		
48		
49		
<del>-</del> 50		16. DISPOSAL OF WASTE
51		
52	We su	pport:
52 53	1.	
	1.	Waste volume reduction at the source. Every effort should be made to avoid generating
54 55		waste products.
55		
56		

1	2.	Recycling and reuse. We encourage manufacturers to develop cost-effective uses for
2		recyclable products. We will work towards the development of incentives to create
3		additional markets and uses for these recycled products.
4	3.	Retailers and consumers using returnable, recyclable, and degradable containers.
5	4.	Research on voluntary recycling options for agricultural plastics.
6	5.	Source separation, which includes:
7		A. Incentives for the return of all glass, plastic, or metal beverage containers.
8		B. Local recycling programs.
9		C. Composting. We support research on the effects of using yard waste on
10	•	agricultural land.
11	6.	Research on the effects of energy recovery from incineration.
12	7.	Combustion for volume reduction. Where it can be shown to be economically feasible and
13	0	environmentally safe, incineration of solid waste before disposing in a landfill.
14 15	8.	Landfilling as a final alternative.
15	9.	Legislation specifying that publication requirements for public hearings on the siting of
16 17	10	solid waste disposal facilities be the same as those of the Illinois Truth in Taxation Act.
18	10.	The ability of a municipality to reject the location of a landfill within 1 1/2 miles of the municipality's boundary.
19	11.	municipality's boundary. Appropriate local governments providing refuse disposal services at a reasonable cost to
20	11.	residents within their area if no private services are available.
20	12.	Improvement of regulations to ensure safe transportation of hazardous waste.
22	12.	Enforcement of existing laws and regulatory programs which require environmentally safe
23	15.	waste disposal systems.
24	14.	Encouraging county Farm Bureaus to actively monitor permit applications for siting of non-
25	14.	agricultural pollution control facilities submitted to their County Boards.
26	15.	Delegation agreements granting counties authority to regulate landfill operations within
27	10.	their jurisdiction, including hours of operation and the height of landfills.
28	16.	Efforts to impose appropriate fines and penalties on waste disposal violations.
29	17.	Reasonable disposal fees on residential waste to help avoid dumping in rural areas.
30	18.	Allowing local governments to charge a higher fee, tax or surcharge on special waste and
31	-	out-of-area waste than on local residential waste.
32	19.	Efforts to have Illinois classify out-of-state waste as stringently as its classification in the
33		state of origin.
34	20.	Regular and thorough inspection of waste disposal sites.
35	21.	"Landfarming" of contaminated soils to preserve limited space available in landfills.
36	22.	Research into laser gasification for mining of landfills and disposal of garbage.
37	23.	Allowing farmers to burn or bury old agricultural buildings and brush on existing sites.
38	24.	Allowing the burning and burying of building debris in cases of natural disasters.
39	25.	Changes to the laws and policies regarding used tire collections, including:
40		A. An increase in the number of times an individual can participate in a tire clean-up
41		event.
42		<li>Allowing non-governmental organizations to sponsor a used tire collection</li>
43		program.
44		C. The Illinois Environmental Protection Agency (IEPA) setting up drop off areas for
45		used tires.
46	26.	Investigation into alternative methods for disposal of urban sludge containing heavy
47		metals and continued research on the safe application of urban sludge on agricultural
48		farmland. Agencies should make research results on immediate and long-term effects of
49	07	sludge application available to farmers.
50	27.	An environmentally safe and financially acceptable method to dispose of or recycle used
51 52		oil and unwanted farm and home chemicals.
52 52	11/0 0	
53 54		opose: Transportation of solid wasta over long distances for disposal
54 55	1. 2.	Transportation of solid waste over long distances for disposal. Efforts which lead to the importation of solid waste into rural areas without proper
55 56	۷.	consideration being given to residents neighboring the disposal site.
00		consideration being given to residents neighboring the disposal site.

1 2 3 4	3.	Attempts to weaken the role of local governments or the criteria by which the sites are judged in the siting of non-agricultural pollution control facilities.
5		
6 7		17. DRAINAGE AND STORMWATER MANAGEMENT
8		Drainage
9		upport:
10 11	1.	More coordination among drainage districts and other government entities in a common watershed.
12	2.	Landowners within an inactive drainage district to reactivate the district or to consolidate
13	۷.	the district with that of an active neighboring drainage district. In the event that reactivating
14		or consolidating a drainage district is not feasible, we encourage all property owners,
15		including state and federal entities, to maintain drainage systems on their property.
16	3.	Uniform interpretation of regulations to allow stream and drainage ditch maintenance
17		practices consistent with good husbandry, such as removing silt, trees, restoring stream
18		banks, and restoring drainage ditches to their optimal condition without the requirement of
19 20	4.	a permit. Coordination among the various district offices of the U.S. Army Corps of Engineers
20	4.	(Corps) serving Illinois to foster more fair and consistent administration of the Clean Water
22		Act and other laws and regulations.
23	5.	Working with other groups to develop appropriate means to resolve drainage problems
24		arising from land development and road construction. Such means should include holding
25		developers financially responsible for damages done to agricultural drainage.
26	6.	Mandating that units of local government require developers to provide surety bonds to
27 28		guarantee full compliance with the drainage law in regard to land development and road construction.
28 29	7.	Techniques and voluntary programs through agencies such as the Natural Resources
30	1.	Conservation Service (NRCS) that put more emphasis on stabilization of stream banks.
31	8.	Enforcement of the concepts within the Illinois Drainage Code which prevent all
32		governmental agencies from using public right-of-way to channel drainage water onto
33		private land without considering the volume of water being drained or the absorption rate
34	•	of the soils receiving the water.
35 36	9. 10.	A requirement that soil erosion control be considered as a part of all drainage plans.
30 37	10. 11.	A reasonable use standard for management of agricultural drainage. Making NRCS the lead agency in determining if a drainage project needs a 404 permit
38		and providing the local contact for that permitting process. If a 404 permit is needed, we
39		support making the Corps the only agency in charge of issuing a permit for drainage
40		projects.
41	12.	Means to require any incorporated area or drainage district with a population of 5,000 or
42		more to pay downstream drainage districts for maintenance and expansion of waterways
43	40	that receive the accumulated increase in water flow.
44 45	13.	Drainage districts as independent units of local government and their right to retain control.
43 46	14.	Educational programs for drainage district commissioners concerning their duties, state
47	14.	and federal regulations impacting them, and the need to properly and routinely maintain
48		the district's drainage facilities.
49	15.	Drainage commissioners' authority to accumulate or build up a fund which shall not
50		exceed an amount equal to the total of five years annual maintenance assessment.
51	16.	Efforts to exempt prior constructed waterways to drainage channels from archaeological
52	47	study requirements.
53 54	17. 18.	Efforts to remove beavers and their structures when they alter drainage resources. Requiring the payment of drainage district assessments levied on state owned land.
54 55	10.	requiring the payment of dramage district assessments levied on state owned land.
56		

<ol> <li>We oppose:         <ol> <li>Unwarranted interference with drainage work.</li> <li>Legislation that would forcibly diminish or usurp the power and authority of drainage districts.</li> </ol> </li> <li>Stormwater Management         <ol> <li>Requiring money collected for stormwater management be used exclusively for control of runoff in the watershed where it was collected, not in an unrelated watershed.</li> <li>Representation on any county stormwater management commission to have mandated broad-based makeup, including municipal, engineering, agricultural, industrial, commercial, and homeowner voting members.</li> <li>Requiring municipalities to integrate stormwater management control structures and plans into any new or existing development.</li> <li>The use of tax credits, abatements, or incentive payments to property owners who construct, maintain, and use approved stormwater management devices (e.g., catch ponds, lagoons, holding basins, terraces, contour farming, pasture land, timberland).</li> <li>Efforts requiring that new commercial and residential developments be planned for anticipated runoff and constructed with the structures necessary to control it.</li> <li>Encouraging local governmental units to unite to solve stormwater problems stemming from impervious surfaces in watersheds within their jurisdictions so long as the power and</li> </ol> </li> </ol>

<ol> <li>The use of tax credits, abatements, or incentive payments to property owners who</li> <li>construct, maintain, and use approved stormwater management devices (e.g., catch</li> <li>ponds, lagoons, holding basins, terraces, contour farming, pasture land, timberland).</li> <li>Efforts requiring that new commercial and residential developments be planned for</li> <li>anticipated runoff and constructed with the structures necessary to control it.</li> <li>Encouraging local governmental units to unite to solve stormwater problems stemming</li> <li>from impervious surfaces in watersheds within their jurisdictions so long as the power and</li> </ol>
<ul> <li>16 construct, maintain, and use approved stormwater management devices (e.g., catch</li> <li>17 ponds, lagoons, holding basins, terraces, contour farming, pasture land, timberland).</li> <li>18 5. Efforts requiring that new commercial and residential developments be planned for</li> <li>19 anticipated runoff and constructed with the structures necessary to control it.</li> <li>20 6. Encouraging local governmental units to unite to solve stormwater problems stemming</li> <li>21 form impervious surfaces in watersheds within their jurisdictions so long as the power and</li> </ul>
<ul> <li>ponds, lagoons, holding basins, terraces, contour farming, pasture land, timberland).</li> <li>Efforts requiring that new commercial and residential developments be planned for</li> <li>anticipated runoff and constructed with the structures necessary to control it.</li> <li>Encouraging local governmental units to unite to solve stormwater problems stemming</li> <li>from impervious surfaces in watersheds within their jurisdictions so long as the power and</li> </ul>
<ol> <li>Efforts requiring that new commercial and residential developments be planned for anticipated runoff and constructed with the structures necessary to control it.</li> <li>Encouraging local governmental units to unite to solve stormwater problems stemming from impervious surfaces in watersheds within their jurisdictions so long as the power and</li> </ol>
<ul> <li>anticipated runoff and constructed with the structures necessary to control it.</li> <li>Encouraging local governmental units to unite to solve stormwater problems stemming</li> <li>from impervious surfaces in watersheds within their jurisdictions so long as the power and</li> </ul>
21 from impervious surfaces in watersheds within their jurisdictions so long as the power and
22 authority of drainage districts are not forcibly usurped or diminished. For purposes of
23 stormwater management, farmland would not be considered an impervious surface.
24 7. Efforts to amend the Soil and Water Conservation District Act to expand the role of the
25 Soil and Water Conservation Districts to address urban wetland and stormwater
<ul> <li>26 management problems. The Soil and Water Conservation Districts should make every</li> <li>27 effort to coordinate and cooperate with other organizations and agencies within the district</li> </ul>
28 to achieve these goals.
29 8. Amendments to the enabling legislation of stormwater management agencies that would
30 explicitly exempt agricultural land and practices.
31 9. Reducing the amount of taxes and fees assessed against property for stormwater
32 management purposes by the amount of taxes and fees assessed against that property by
33 a drainage district.
34
35 We oppose:
36 1. Granting any stormwater management authority the power to regulate farmland drainage.
<ul> <li>37 2. The establishment of a county stormwater runoff management planning commission</li> <li>38 without voter approval.</li> </ul>
<ul> <li>without voter approval.</li> <li>39 3. The use of eminent domain by a stormwater commission except for specific and</li> </ul>
40 immediate use for stormwater runoff control.
4. The involuntary dissolution of agricultural drainage districts and their administration and
42 taxing levy being assumed by the county stormwater commission.
43 5. Any efforts to require agriculture to pay for more than its fair share of any taxing plan or
44 any effort to force agricultural lands to receive excessive and unobstructed runoff caused
45 by upstream development that lacks reasonable stormwater management structures.
46
47
49 18. DUE PROCESS
50 51 We support:
51 We support. 52 1. Requiring all governmental agencies to notify landowners and farm operators of possible
53 violations in writing, stating specific findings and charges on all farm visits.
54 2. Landowners and farm operators be given a reasonable amount of time to correct the
<ul> <li>55 possible violations before legal action is taken by the governmental agency.</li> <li>56</li> </ul>

1 2	3.	Governmental agencies being required to prove intent to violate as a part of every prosecution.
3	4.	Any conviction being based on due process, including trial by jury.
4 5	5.	Governmental agencies, should they lose a court case, being held accountable for court costs and associated costs to landowners and farm operators.
6 7		
8		
9 10		19. ENDANGERED SPECIES
11	We su	pport:
12	1.	A moratorium on additional listings under the Endangered Species Act (ESA) in its current
13		form until such time as it is amended and updated to accommodate the needs of both
14 15		endangered and threatened species and humans with complete respect for private property rights within the framework of the United States Constitution.
16	2.	Endangered and threatened species protection that is achieved through providing
17 18	2.	incentives to private landowners and public land users rather than by imposing land use restrictions and penalties.
19	3.	The burden of proof for listing being on the petitioner, the United States Fish and Wildlife
20 21	0.	Service or the National Marine Fisheries Service (together, the Agencies), rather than on the general public.
22	4.	Scientific and peer-reviewed data being used as the basis for listing a species, as well as
23 24	ч.	the basis for the development of regional or state conservation plans involving those species.
25	5.	A legitimate state-level process of involving stakeholders, including farm organizations, the
26 27	0.	Illinois Department of Agriculture, and agricultural representatives, in discussions around listing decisions and conservation planning.
28	6.	A more efficient process for the delisting of species that allows the Agencies to achieve
29		the stated objectives of the ESA: to recover and delist species.
30	7.	Reasonable assurance mechanisms at the federal and state level that allow farmers to
31		conduct normal farming activities without fear of liability under the ESA and Illinois'
32		Endangered Species Protection Act.
33		
34	We op	
35	1.	The recognition of species that are considered under threat versus endangered to be a
36		factor in liabilities to private landowners.
37	2.	A definition of critical habitat that includes areas without the current presence of an
38		endangered species.
39	3.	The listing of the monarch butterfly as a threatened or endangered species.
40	4.	Any group that receives funding pursuant to the ESA or as a result of litigation associated
41		with the ESA, from being able to petition, support or encourage the listing of a species.
42		
43		
44		
45		20. FARMING METHODS
46		
47		pport farming methods that result in:
48	1.	Profitability.
49	2.	Environmental stewardship.
50	3.	The production of a safe food supply.
51	4.	An adequate supply of high-quality agricultural commodities to meet current and future
52		demand.
53		
54	We su	
55 56	1.	Research aimed at reducing overall inputs needed to sustain a profitable farming operation.

1 2	2.	Incentives that encourage farmers to accept the risk of testing non-traditional means of farming.
3 4	3.	Efforts to provide information to farmers on proven means of improving the efficiency of inputs.
5	4.	Research to study soil health and its future productivity.
6	4. 5.	The use of an integrated pest management program to control pests in crop production.
7 8	We op	ppose any attempt to mandate low input methods of farming.
9 10		
11		
12 13		21. FORESTRY
13	We su	upport:
15	1.	State and federal incentives for active forest management of privately-owned forests and
16		woodlands in Illinois.
17	2.	The planting of trees on land that is unable to meet conservation compliance standards to
18		help control soil erosion and increase timber resources.
19	3.	Ongoing research monitoring and education regarding forest health.
20	4.	Repealing the Timber Tax.
21		
22	We op	opose:
23	1.	Any funds generated by a Timber Tax going to anything besides forest management
24		incentives for landowners. Until repeal, we support.
25	2.	The change of the Shawnee National Forest becoming a designated National Park and
26		Climate Preserve.
27		
28		
29		
30		22. GLOBAL CLIMATE CHANGE
31		
32		upport:
33	1.	Quantitative and updated scientific research on carbon emissions (livestock, modern farm
34 35		equipment, and current agricultural production practices) and carbon capture to establish
36	2.	a baseline. Science-based research and economic analysis, not cultural consensus, to conclusively
30 37	۷.	determine the causes and impacts of global climate change.
38	3.	Scientific research to document the continuous improvement and beneficial impact of
39	5.	agricultural efforts to date with regard to increasing climate resiliency, improving water
40		quality and soil health, sequestering carbon in the soil, and preventing soil erosion.
41	4.	A campaign to communicate to the general public and policy makers about the continuous
42		improvement and beneficial impact of agricultural efforts to date with regard to increasing
43		climate resiliency, improving water quality and soil health, sequestering carbon in the soil,
44		and prevent soil erosion.
45	5.	Expanding and improving state and federal conservation programs that allow farmers to
46		voluntarily adopt conservation practices that increase climate resiliency, improve water
47		quality and soil health, sequester more carbon in the soil, and prevent soil erosion.
<b>T</b> 1		
	6.	
48	6.	Market-based solutions that establish economic incentives for farmers to voluntarily adopt
	6.	Market-based solutions that establish economic incentives for farmers to voluntarily adopt conservation practices that increase climate resilience, improve water quality and soil
48 49	6.	Market-based solutions that establish economic incentives for farmers to voluntarily adopt
48 49 50 51 52	6.	Market-based solutions that establish economic incentives for farmers to voluntarily adopt conservation practices that increase climate resilience, improve water quality and soil health, sequester more carbon in the soil, and prevent soil erosion. Market-based
48 49 50 51 52 53	6.	Market-based solutions that establish economic incentives for farmers to voluntarily adopt conservation practices that increase climate resilience, improve water quality and soil health, sequester more carbon in the soil, and prevent soil erosion. Market-based solutions should:
48 49 50 51 52 53 54	6.	<ul> <li>Market-based solutions that establish economic incentives for farmers to voluntarily adopt conservation practices that increase climate resilience, improve water quality and soil health, sequester more carbon in the soil, and prevent soil erosion. Market-based solutions should:</li> <li>A. Provide open, transparent, and consistent measurement, certification, and verification for carbon sequestration.</li> <li>B. Provide price transparency to market participants.</li> </ul>
48 49 50 51 52 53	6.	<ul> <li>Market-based solutions that establish economic incentives for farmers to voluntarily adopt conservation practices that increase climate resilience, improve water quality and soil health, sequester more carbon in the soil, and prevent soil erosion. Market-based solutions should:</li> <li>A. Provide open, transparent, and consistent measurement, certification, and verification for carbon sequestration.</li> </ul>

1		E.	Address data collection:
2			1) Limit data collection to only participating acres.
3			2) Limit the contract length and data use to five (5) years.
4			3) Establish standard provisions for data retention, ownership, security, and
5			privacy.
6		F.	Reserve any compensation from United States Department of Agriculture (USDA)
7			programs as a result of the practice to the farmer.
8		G.	Include:
9			1) Practices previously adopted.
10			2) Ecosystems credit remaining with the farmer unless otherwise designated in
11			the farmland lease.
12			3) A collaboration between government, purchasers, aggregators, and farmers
13			to define parameters of carbon and sustainability contracts.
14	7.	Illinois	Farm Bureau providing education programs for farmers and farmland owners with
15		negotia	ating carbon and sustainability contract language to provide fair and equitable
16		compe	nsation, adequate legal protections and limit liability.
17	8.		sed funding for research of farming practices that mitigate climate change while
18		mainta	ining farm profitability, as well as technical assistance and educational efforts that
19		ensure	the research outcomes are transferred effectively to farmers.
20	9.	Resea	rch into methods of reducing the amounts of CO2, methane, and other greenhouse
21		gases	emitted into the atmosphere from agricultural related industries that does not
22		involve	transport or storage of these gases beneath agricultural land.
23	10.	Farme	rs to voluntarily improve on-farm energy efficiency.
24	11.	Improv	rements to the current electric grid.
25	12.	Use of	a broad spectrum of power sources like renewables, biofuels and nuclear power to
26		help fa	cilitate the market-derived cost of energy.
27	13.	Federa	al level climate change policy that reflects regional variations.
28	14.	Federa	al Crop Insurance premium benefits as one method for compensating farmers for
29		implem	nenting conservation practices.
30			
31	We op	pose:	
32	1.	Any reg	gulations or treaties relative to global climate change that will unfairly impact U.S.
33		agricul	ture and the U.S. economy.
34	2.	Penaliz	zing equipment like semi-trucks or farm machinery for consuming fossil fuels.
35	3.	Penaliz	zing animal agriculture for emissions related to their consumption and digestion of
36		feed.	
37	4.	A state	e-by-state patchwork of climate change policies.
38			
39			
40			
41			23. HIGHLY ERODIBLE LAND
42			
43	We su		
44	1.		g Highly Erodible Lands (HEL) determination and classification to reflect the applied
45			nent conservation practices (i.e., terraces and diversions) that reduce the soil loss
46			on soils that would normally be highly erodible. If the reduction in soil loss makes
47			d NON-HEL, the land should be so classified and remain so classified as long as
48			manent conservation practices are maintained as designed.
49	2.		ces in conservation practices for livestock farmers so they can utilize crops or crop
50			e without jeopardizing conservation compliance regulations. These practices should
51			e, but not be limited to, pasturing livestock, chopping silage, harvesting crop
52			es, and manure incorporation.
53	3.		Natural Resources Conservation Service (NRCS) personnel working directly with
54			s in coordinating the repair of damage from normal farming practices to fields with
55			designation. The NRCS should consider field condition limitations before imposing
56		penalti	es for non-compliance.

1		24. MINED LANDS
2 3	W/o o	upport
3 4	1.	upport: Working with private, county, state, and federal groups and agencies in the development
5 6 7	1.	and strict enforcement of regulations for mined and undermined lands which will give proper consideration to needs and priorities of agriculture as well as energy and which will protect and restore agricultural lands.
8 9 10	2.	Working with other interested groups in developing reasonable solutions to problems of subsidence and means to minimize subsidence in future mining operations. The landowner shall receive fair compensation for any subsidence which occurs.
11 12 13	3.	The Office of Mines and Minerals including irrigation and other agricultural wells in the protection clauses under Illinois regulations concerning subsidence from underground mines.
14 15	4.	A bonding requirement for coal companies that receive fly ash from coal combustion plants to address groundwater concerns and cleanup.
16	5.	Developing an educational program on mineral and subsidence rights for landowners.
17	6. 7.	Mining methods that maintain property values.
18 19 20	7.	The review of the impact of mining activity and how it affects the market value of property. Should this effect be negative, we will seek legislation to compensate landowners for this loss.
21	8.	Requiring mine operators to compensate landowners and tenants for production losses.
22	9.	Requiring mine operators to compensate landowners and tenants for increased cost of
23		federal crop insurance when the farmland has been rerated due to mining operations.
24	10.	County Farm Bureaus becoming involved in reviewing proposed reclamation plans prior to
25		the issuance of mining permits and to closely monitor such reclamation plans after mining
26 27		to see they are being properly implemented.
27 28		25. MINERAL INTERESTS
20 29		23. MINERAL INTERESTS
30	Wes	upport:
31	1.	A requirement that data from core tests of coal and fluorspar exploration be made
32 33		available to the public after one year in the same manner that data on oil and gas wells are made available to the public.
34 35	2.	Legislation to require the owners of oil and gas interests that have been severed from the existing surface ownership to provide to the surface owner:
36 37		<ul> <li>A 30-day notice before entry is made onto the surface for oil and gas exploration and recovery.</li> </ul>
38 39		B. Compliance with minimum reclamation standards to minimize surface impacts of such operation and full clean-up of oil and gas sites.
40		C. Complete compensation payable to the surface owner or tenant for damages
41 42		incurred during such operation and annual production losses incurred by the
42 43		presence of roads, tank batteries, well heads, and oil and gas production equipment.
43 44		D. Complete compensation for the loss in land value due to drilling operations.
45	3.	Legislation requiring the operator of an oil and gas well to bury all electrical lines to a
46	0.	depth not less than 36 inches from the surface unless otherwise agreed to by the
47		landowner.
48	4.	Continued efforts to strengthen and clarify existing rules and regulations relating to oil and
49 50		gas well site reclamation, well capping and well waste disposal, and to inform members of those regulations.
51	5.	Establishing regulations for hydraulic fracturing and horizontal drilling on site preparation,
52		drilling, well-casings, pipelines, waste-storage, and other appropriate safeguards in order
53		to protect land and water resources.
54	6.	Legislation requiring all new underground flow lines constructed as part of a high-volume
55 56		horizontal fracturing well site, production facility, or any oil or gas drilling operation which

1		crosses agricultural land, shall be buried following the contour of the surface with a
2		minimum of 60 inches of topcover.
3	7.	Legislation which requires an operator of an oil or gas well to post and maintain a
4		performance bond to protect the surface owner in the event that the operator abandons
5		drilling, fails to plug the well(s) or restore the surface; or fails to provide complete
6		compensation to the landowner for damage.
7	8.	Legislation requiring individuals or companies seeking to acquire oil and gas mineral
8		interests from landowners to provide the landowner a written summary of the landowner's
9		legal and property rights relating to the actual exploration and production of oil and gas
10		prior to any negotiation for the lease or purchase of such mineral interests.
11	9.	Efforts by government agencies or private sector to address salt water contamination from
12		abandoned oil wells.
13	10.	A dedicated fund to address environmental problems related to abandoned oil and gas
14		wells. Consideration should be given to additional funding for these activities.
15	11.	Efforts by government agencies or the private sector to create and maintain an accurate
16		and current listing of mineral rights owners for each tract of ground.
17	12.	Legislation that would revert ownership interests of coal, oil, gas, and all other minerals (if
18	12.	unclaimed, unused, or dormant for a period of up to 20 years) back to the surface estate
19		owner.
20	13.	Landowners and owners of rural property being justly compensated by coalbed methane
21	10.	operators when landowner's property is being drilled upon in the absence of an agreement
22		with the landowner.
23	14.	Legislation that would revert ownership rights of utility, pipeline, and underground gas
24	14.	storage easements or leases back to the surface owner if unused, abandoned, or dormant
24 25		for a period of 20 years.
23 26	15.	Efforts by the Illinois County Assessment Officers Association to require oil and gas
20 27	15.	operators and first purchasers of oil and gas to report well production with accuracy to
28		
		county assessing officials within a workable timeframe each year or be subject to a fine for
29		failure to report. This would include each county assessing official, where oil and gas
30	4.0	production occurs, receiving an annual free copy of all pipeline reports.
31	16.	Penalties being issued for violations with oil wells.
32	17.	Plugging of oil wells on land where they are non-producing.
33	14/	
34		
35	1.	The transfer or production of mineral rights or related rights (including subsidence rights)
36		by any public body without first offering those rights back to the current owner of the
37		surface estate.
38	2.	Any moratorium on horizontal drilling and hydraulic fracturing in Illinois.
39		
40		
41		
42		26. ORGANIC NUTRIENT MANAGEMENT
43		
44		re is a plant nutrient material. It is a valuable resource and, when combined with bedding
45	materi	ial, a residue source.
46		
47	We be	
48	1.	County Farm Bureaus should develop a better understanding among farmers and the
49		public of issues concerning organic nutrient management.
50	2.	Ongoing research should be encouraged to determine air quality and odor parameters that
51		provide scientifically-proven levels for livestock health and worker safety.
52	3.	There must be no direct discharge from manure storage systems or livestock facilities to
53		surface waters, drainage ditches, or field tiles due to negligence, poor management, and
54		faulty structural design. Direct discharges due to natural causes should be exempt from
55		civil and punitive penalties and damages.
56		

1	4.	Research on manure management is a high priority including such topics as odor
2		reduction, waste and nutrient management, and artificial wetland remediation of nutrients.
3	F	Some flexibility should be allowed in wetlands management.
4 5	5.	Any proposed law, rule, or regulation which would restrict a farmer's nutrient management plan shall only be implemented if consistent with Best Management Practices (BMPs)
6		developed at the state level with the cooperation and assistance of our state land grant
7		institutions with considerations given for local conditions.
8	6.	Government agencies must utilize proven scientific practices and cost/benefit analyses
9	0.	when developing policies concerning organic nutrient management facilities and
10		application of manure.
11	7.	Additional government cost-share funding should be made available to farmers for
12		constructing manure handling facilities to correct existing problems.
13	8.	That the development and enforcement of organic nutrient management standards are
14		best handled at the state level but any dialog on national environmental standards or
15		legislation for organic nutrient management must be based on proven science and
16		generally-accepted agricultural BMPs and should comply with the above points. The
17		authority for enforcement and implementation of these standards should be clearly defined
18		to protect farmers from differing interpretations by state or federal agencies.
19 20	Wo s	upport:
20	1.	Programs to educate farmers on techniques regarding properly-managed organic nutrient
22	1.	systems.
23	2.	A public relations program to emphasize methods by which farmers protect the
24		environment by using properly-managed organic nutrient systems.
25		
26	We o	ppose requiring livestock operations to obtain permits for application of livestock manure.
27		
28		
29		
30		27. CROP PROTECTION APPLICATION, EDUCATION, AND RECORDKEEPING
31 32	Drop	or understanding and handling of eran protection products is important to even former
32 33	Piope	er understanding and handling of crop protection products is important to every farmer.

1 2	10.	Increased funding for the United States Department of Agriculture (USDA) to increase credible information on pesticide use collected by the National Agricultural Statistics
3		Service (NASS).
4	11.	A change in statute and/or regulations that would allow a custom applicator service to be
5		assigned the responsibility of keeping pesticide application records for landowners and
6		operators.
7	12.	Consideration being given to IDOA pesticide misuse complaint findings, when determining
8	12.	liability for pesticide damage.
9	13.	Continuation and development of research programs through state university agricultural
10		departments that identify the optimum timing for application of herbicides to achieve the
11		greatest weed control, while reducing any potential negative impact to row crop and
12		specialty crop plant development.
13	14.	Farmer participation in the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA)
14		registration discussions on products important to Illinois agriculture.
15	15.	State regulatory agencies accounting for the following factors when making changes to
16		pesticide labels:
17		A. The economic value of the product being regulated and the economic cost of
18		alternatives.
19		B. Geographical and climatic differences throughout the State.
20		C. Science based evidence of the need for and results of regulations.
21	16.	Interagency cooperation during the registration process of crop protection tools and traits.
22	17.	Illinois Farm Bureau participation in the State of Illinois Interagency Committee on
23		Pesticides.
24	18.	EPA's policy that allows the expeditious use of existing stocks of pesticide products whose
25		registrations have been amended, canceled or suspended.
26	19.	Development of new crop protection technologies that benefit specialty growers and row-
27		crop farmers alike, while minimizing the effects on other plant habitat and the environment.
28	20.	The establishment of an industry standard for voluntary field marking that displays the
29		traits planted in a field.
30		
31	We op	pose any pesticide recordkeeping requirements that create additional farmer liability for
32	applyi	ng pesticides according to label instructions.
33		
34		
35		
36		28. RIVER CONSERVANCY DISTRICTS
37		
38	We su	
39	1.	Legislation requiring petition signatures containing at least 10 percent of the registered
40		voters within a proposed district be secured in order to place the question of creating a
41		new district on the ballot.
42	2.	Legislation providing means for disconnecting lands not benefited from an established
43	-	district.
44	3.	Legislation requiring wider publication and notice of public hearings.
45		
46		
47		
48		29. RIVERS, LEVEES AND FLOODPLAINS
49		<b>D</b> <sup>1</sup> and <b>a</b>
50	14/	Rivers
51	We su	
52	1.	The ability of Congress to earmark discretionary funds for specific projects in a transparent
53	2	way that identifies the purpose and intended beneficiaries.
54 55	2.	Pursuing actions in Congress and appropriate federal and state agencies to ensure that
55 56		we have an efficient and competitive transportation system through which we can
56		effectively move agricultural and commercial products.

1 2 3	3.	Working with other interested groups to improve the lock and dam systems on the Mississippi and Illinois Rivers. As a part of that effort, we support construction of 1,200-foot locks on the Mississippi River at least at Keokuk and below and on the Illinois River at
4 5 7 8 9 10 11	4.	least at Peoria and below. A Midwestern, multi-state effort to review results of existing river and related studies and identify impacts of associated state and federal regulations. Based on these studies, we will promote a multiple-use strategy for the Upper Mississippi River and its navigable tributaries to serve agriculture, industry, recreation, transportation, and the environment. A comprehensive plan must be fair, clear, and equitable for all counties adjacent to or affected by river flooding. Money appropriated for projects should be used by that project if at all possible.
12 13 14	5.	The development of a balanced and comprehensive river management plan by the U.S. Army Corps of Engineers (Corps) under the auspices of the Mississippi River Commission
15 16 17	6.	(MRC). Encouraging the MRC to use its authority to promote improvements to navigation, economic development, flood control, recreation, and environment within the Upper Mississippi River basin.
18 19	7.	Seeking representation on the MRC to include at least one member from the Upper Mississippi River area.
20 21	8.	Encouraging members of Congress to become actively involved in the Mississippi River Congressional Caucus.
22 23	9.	Efforts to increase the Operations and Maintenance budget to maintain navigation, recreation, and flood control systems.
24	10.	Encouraging the consideration of Public Private Partnerships (P3) as a way to capitalize
25 26	11.	Corps of Engineers' infrastructure projects. An analysis of the effects of changing the hours of operations of any lock and dam. This
20 27 28	11.	analysis should look at the effect on the Corps, local communities, and the businesses who use or are affected by the lock and dam. Public input should be sought.
29 30 31 32	12. 13.	Appropriations for the maintenance and operation of the Kaskaskia River lock and dam. Requiring government agencies to send notification about new streambank initiatives to landowners whose property is adjacent to and may be impacted by those initiatives.
33 34		Levees
35 36 37	system	has greatly benefited from the construction of flood control levees and their associated as along its rivers. Many have now exceeded their life expectancy and flooding poses a ant threat to surrounding property.
38 39 40 41 42 43 44	timely occurs made a	lieve federal and state government agencies should be committed to assisting with the repair and maintenance of levees on the main rivers and their tributaries. After a disaster , repairs should be made in "emergency" mode. We believe adequate funds should be available to the Corps, Natural Resources Conservation Service, and other appropriate es to assist in the repair of levees on the main rivers and their tributaries.
44 45 46 47	protect	orps of Engineers should be the lead agency for setting standards used to certify levees as ing against certain levels of flooding. These standards should include provisions to allow able flexibility in administration of the rules such as:
48 49	1.	If the capacity of the levee is found deficient, adequate time should be allowed for repairs before decertification.
50 51 52	2.	Rules should account for acceptable levels of permeability in sand levees and the capability to bolster levees during flood fights.
53	We su	
54 55	1.	Efforts to remove silt from rivers and to promote the use of that material behind the levee for strengthening the levee system.

56

4	0	Efforts to secure federal and state funds for constructing contified lawson and consisted
1 2	2.	Efforts to secure federal and state funds for constructing certified levees and associated
		systems on major rivers. To evaluate the appropriateness of that funding, we support the
3		concept of using Risk Informed Decision Framework (RIDF) that would address four
4		evaluation areas: national economic development, environmental quality, regional
5		economic development, and other social effects. The RIDF approach should recognize the
6	0	potential for future economic development.
7	3.	The use of regional economic development benefit:cost ratios in addition to other
8		considerations in determining support for waterway and flood control projects.
9	4.	Equitable treatment of intangible benefits in calculating the benefits of levee construction
10		projects. We encourage the Corps to fully restore damaged levees to no less than pre-
11		existing conditions in a timely fashion. Those levees that are purposely destroyed by the
12		Corps should be fully restored prior to the next normal high water season.
13	5.	Efforts to allow drainage and levee districts to restore a levee to its highest approved flood
14		frequency design and/or profile without being limited by water level mitigation
15		requirements.
16	6.	A uniform federal floodplain standard (also adopted by the states) allowing a one-foot rise
17		in floodwater height for flood protection projects on major rivers and other bodies of water
18		bordering two or more adjoining states.
19	7.	Streamlining the process of permitting the repair and/or construction of levees and other
20		flood control devices while maintaining the strict adherence to that section within the
21		Illinois Rivers, Lakes and Streams Act that requires permitting prior to repair and/or
22		construction.
23	8.	Using hydrology studies and other pertinent information developed within the
24		Comprehensive Plan to expedite the permitting process for flood control projects within the
25		scope of the plan. A timeline should be developed to establish target beginning and
26		completion dates for each project within the Comprehensive Plan to help move those
27		projects along in a more efficient and timely manner.
28	9.	Legislation that provides the Corps the authority and funding to develop and construct
29		streambank and shoreline protection projects to prevent erosion damages to
30		infrastructure.
31	10.	Adoption of Base Flood Elevation impact mitigation standards for construction within the
32		floodway in Illinois similar to those in Iowa or Missouri so that the same level of activity can
33		occur on the Illinois side of the Mississippi River as does in those adjoining states.
34	11.	The Corps' Comprehensive Plan with the following conditions:
35		A. The Plan must include reconstruction of existing levees and ancillary flood
36		reduction system components to ensure they function at their approved design
37		capacity.
38		B. Existing levees within the reach of the Plan that are of sufficient height but lack
39		other necessary features (such as seepage wells and proper slope) should be
40		allowed to be improved to qualify for Federal Emergency Management Agency
41		(FEMA) certifiable 100-year flood frequency protection.
42		C. The Len Small Levee and Drainage District should be incorporated as part of the
43		Plan. It should enjoy the same right to pursue improvement and rehabilitation as is
44		afforded other levee districts not eligible for 500-year flood frequency protection.
45		D. All acres currently protected by levees should maintain at least their current level of
46		protection.
47	12.	Federal funding for improvement to levees to maintain the existing level of flood frequency
48		protection when induced increases in floodwaters occur due to the adoption of a
49		Comprehensive Plan for Flood Control.
50	13.	Urging the Corps to adopt water flow management policies that avoid the flooding of
51		farmland situated below any reservoir, dam, or behind any levee system managed or
52		controlled by the Corps.
53	14.	Urging state and federal agencies to provide timely assistance to local levees during a
54		crisis.
55	15.	Eliminating the duplication of levee inspections with resulting cost savings to be used for
56		levee improvements.

1 2	Floodplains		
2 3 4 5 6 7	regulat undeve	ational Flood Insurance Program (NFIP) should be designed to provide insurance, not te land use. It should not be designed to revert the floodplain to its (historic, former) eloped state. Furthermore, rules and regulations regarding floodplain management should persede private property rights.	
8 9 10	enviro	Iture in a floodplain should be given recognition as providing positive benefits to the nment and the public good. These intangible benefits should receive the same eration in benefit: cost analysis as do other environmental benefits.	
11 12 13 14 15 16	differe	size-fits-all approach to floodplain regulations does not accommodate the unique physical nces among floodplains. Regulations, including NFIP, should recognize those differences, range from the expansive floodplains of major rivers to narrow riverines to non-riverine sions.	
17	We wil	I seek revisions in FEMA regulations to:	
18 19 20 21	1. 2.	Fund and allow the Army Corps of Engineers to coordinate all flood fighting efforts. Increase efforts to improve the coordination and cooperation of FEMA and other government agencies in order to streamline the process to deliver emergency assistance in a timely manner during a disaster and the disaster recovery process.	
22 23 24 25	3.	Allow the limited issuance of certain construction permits by units of local government where the applicant has assumed all risk for flood damage to the structure without jeopardizing the receipt of NFIP funds and other federal monies for those who wish to participate in federal insurance, disaster, and loan programs.	
26 27 28	4.	Provide NFIP and disaster payment eligibility for production agriculture facilities and farm residences protected by a levee, including levees that provide protection from less than 100-year floods. The insurance offered for such structures should be at a rate which	
29 30 31 32 33	5.	reflects the degree of protection provided by the levee. Allow structures located in a floodplain that are "substantially damaged" by means other than a flood to be rebuilt without regard to NFIP regulations and to maintain flood insurance eligibility.	
33 34	We su	pport:	
35	1.	Amendments to federal regulations and policy that would require dewatering of agricultural	
36 37	2.	land as part of flood recovery efforts. FEMA interim guidelines for wet flood-proofing of agricultural structures and efforts to	
38 39 40 41	3.	make them permanent. Allowing the replacement construction costs of a structure to be used instead of market value to measure the damage to a structure for purposes of determining whether "substantial damage" has been done.	
42 43 44 45	4.	Revising NFIP regulations to allow counties and municipalities, at the local unit's discretion, to sell to private owners those properties bought out by FEMA. In such cases, the property should include an easement restricting surface development rights but allowing normal agricultural practices.	
46 47	5.	Continuation of NFIP exemption of property behind properly designed, built, and maintained 100-year certified levees, dams, and other flood control infrastructure.	
48 49	6.	Efforts to educate and inform legislators, regulators, media, farmers, environmental leaders, and the public about the economic and societal benefits and issues associated	
50 51 52 53 54 55 56	7.	with the agricultural and commercial use of expansive floodplains. Working to preserve statewide permits authorized by the Illinois Department of Natural Resources-Office of Water Resources for certain construction, transportation, and infrastructure maintenance projects in floodplains at no cost to individuals, businesses, or units of government.	

1	lf a lev	ee's flood level protection certification would be lowered due to a revised flow frequency
2		structures that existed behind the levee prior to the re-certification should be grandfathered
3		anaged under the NFIP as though the higher flood protection certification still applies.
4		ures built after the levee's re-certification should be managed under the rules that apply
5		e then current certified flood protection level.
	WILLI LI	e then current certified hood protection level.
6		
7		
8		
9		30. SOIL CONSERVATION
10		
11	Soil er	osion is a threat to the long-term productivity of agriculture. Farmers and landowners
12		strive to implement soil conservation practices.
13		
14	We su	pport:
15	1.	Efforts to maintain local Soil and Water Conservation District (SWCD) offices, while
	1.	
16	~	improving efficiencies, to provide technological assistance and project certification.
17	2.	Soil conservation programs using education, voluntary compliance, financial incentives
18		and other non-punitive means to encourage compliance. Farmers should not be penalized
19		for a "first offense" failure to meet residue requirements if they have made a good faith
20		effort to follow their conservation plan, or for failure to obtain mandated residue cover
21		following crop failure. Any penalties for subsequent violations should not exceed the farm
22		program benefits on the tract number in violation. The provision of cost sharing by
23		government agencies must be a prerequisite to any compliance program.
24	3.	Increasing funding and technical support for various state and federal programs to assist
25		farmers, landowners, and drainage districts in controlling erosion and runoff, including
26		streambank stabilization. Available resources should be targeted to those areas where
27		greatest problems exist and programs are being implemented.
28	4.	Using available funding sources, such as the Regional Conservation Partnership Program
29	ч.	or Illinois EPA Section 319 grants, to support SWCD efforts.
30	5.	Inclusion of conservation practices that address soil erosion, sediment control, and water
31	5.	
		quality concerns brought on by community development in the Natural Resources
32	0	Conservation Services' (NRCS) National Handbook of Conservation Practices.
33	6.	Unrestricted technical and educational services of NRCS to municipalities, other local
34		governments, and non-governmental entities within funding parameters.
35	7.	Legislation that would protect landowners from liability resulting from the malfunction of
36		terraces and structures constructed according to NRCS guidelines.
37	8.	Amendment of the election process currently used by Soil and Water Conservation
38		Districts (SWCDs) to allow SWCD directors to be elected with the stipulation that the
39		election be structured so that no more than one director may be elected from any township
40		in any election.
41	9.	Maintaining county SWCDs under the administration of the Illinois Department of
42		Agriculture and funding for SWCD staff at compensation levels comparable to that of state
43		employees.
44	10.	Research on the concept of economic benefits of green payments to farmers.
45	11.	Concepts would include guaranteeing farmers a payment for implementing new
46		conservation practices. This could be initiated through a public/private partnership
47		program.
48	12.	Including funding for technical assistance in the overall costs to implement government
49	14.	programs addressing natural resource or environmental issues.
49 50	13.	Adequate state and federal funding for updating soil surveys.
50	13. 14.	
	14.	Amending the Prevailing Wage Act so it does not apply to state funded conservation
52	15	incentive payments.
53	15.	Public/private partnerships to provide consumer education programs on conservation
54	4.0	practices.
55	16.	Encouraging local governments and developers to utilize all practical means to control
56		non- farm soil erosion.

1 2 3 4 5 6	is in th returne	pose the use of state or federal conservation funds for conservation practices on land that e process of being developed. The SWCD and/or the NRCS shall require monies to be ed if land is converted to non-production agriculture use in ten years or less after receipt of r federal funds. This may include land that has been platted or sold to a developer.
7 8		31. VOLUNTARY ECOSYSTEM PRESERVATION
9 10 11		lieve there is an opportunity to preserve in a natural condition at least a portion of Illinois stems. We are willing to work with others to accomplish this goal.
12 13 14	A pres 1.	ervation habitat program should: Be voluntary.
15 16	2. 3.	Provide the ability for the landowner to terminate the agreement. Not use eminent domain.
17 18 19	4. 5.	Not rely on property taxes. Have no negative impact on adjoining property owners.
20 21 22 23 24	keep d	rmore, drainage must be maintained through wildlife refuges and conservation areas to itches, rivers, and other drainage conveyances free of sand, silt, and vegetation so that oring lands are not ill affected by the reduction of water capacities.
25 26 27		32. WATER QUALITY AND WATERSHED PROJECTS
28	We su	oport:
29 30	1.	Sound scientific peer-reviewed data being used as the basis for treatment of non-point sources under the Clean Water Act or other similar water quality laws at the federal or
31 32 33	2.	state level. Funding research on best management practices (BMPs) of agricultural crop production products.
34 35	3.	The involvement of agriculture, including county Farm Bureaus and drainage districts, in watershed group planning efforts.
36 37	4.	Increased funding for comprehensive watershed planning and voluntary, incentive-based implementation of BMPs as a result of the planning.
38 39 40	5. 6.	Programs to educate farmers and the general public of the need to protect and/or improve water quality and the various BMPs to accomplish those goals. Voluntary programs between the state or municipalities with farmers to solve issues with
40 41 42	7.	water quality and/or nutrient management. Farmer adoption of the Nutrient Loss Reduction Strategy (NLRS) through voluntary
43 44	8.	implementation of BMPs. The development of new and the enhancement of existing incentives for adopting
45 46 47	9.	voluntary BMPs on all private land to improve water quality and wildlife habitat. Policies made regarding the Gulf of Mexico hypoxic zone to be backed by reliable, broad- based, scientific research. We should unite with other like-minded stakeholders to form a
48 49		coalition on the issue to: A. Coordinate a plan of action.
50 51		B. Communicate with each other, the general public, elected officials, and members regarding the hypoxia area.
52 53 54		<ul><li>C. Evaluate current research data and encourage further research on the hypoxic area and issues related to it.</li><li>D. Use all means at our disposal to address the issue in a way that gives proper</li></ul>
54 55 56		consideration to the impact it has on agricultural production.

1 2 3	10.	A portion of water consumption fees collected from any user of water from a drinking water supply lake be used for payments to landowners and tenants who adopt conservation practices within the watershed of the lake.	
4 5	\//a am		
6	We op 1.	Using mandatory methods to address agricultural, non-point source issues related to Total	
7 8 9	2.	Maximum Daily Loads (TMDLs) of pollutants in streams. Any increased regulation on tile drainage from farm fields, including designating water flow from farm fields through or over conveyances, such as drain tile or grass waterways, as a	
10		point source of pollution under the Clean Water Act.	
11	3.	Fines, assessments, and penalties on non-point source pollutions allegedly caused by	
12	0.	agriculture but not confirmed by sound scientific peer-reviewed data.	
13	4.	Water management programs that restrict the ability of landowners to provide effective	
14		drainage and flood control in rural and urban areas.	
15			
16			
17			
18		33. WATER WITHDRAWALS	
19			
20	We be	lieve that the ability of a landowner to reasonably use water on or beneath his property is a	
21		be enjoyed. This right should not be taken without due process of law. Just compensation	
22	should	be given to those regions or individuals whose ability to use the water is diminished.	
23			
24	We be	lieve agricultural uses must receive a high priority in the allocation of water supplies.	
25	Consid	leration should be given to businesses or consumers which would feel an economic impact	
26	from w	ater restrictions.	
27			
28		lieve it is the duty of all users to conserve water to avoid waste of a critical natural	
29	resource. Conservation programs should encourage use of water recycling where feasible.		
30		y should be encouraged to use recycled effluent water produced by local municipal	
31	wastev	vater treatment facilities in the production process.	
32	14/		
33	We su		
34	1.	The establishment of water authorities by referendum of affected property owners, for the	
35		purpose of managing the water resource. Water authorities should be established within	
36		aquifers or recharge lines and be governed by elected or appointed directors who are	
37		resident landowners representing the various water users in the district. Regulations,	
38 39		developed by authorities, should be based upon the availability of supply and needs and	
39 40	2.	desires of affected property owners. Soil and Water Conservation Districts and Illinois Department of Agriculture (IDOA) should	
40	Ζ.	receive support to implement provisions of the Water Use Act to collect necessary data on	
42		water wells.	
43	3.	Water withdrawal regulations recognizing the responsibility of all users to construct and	
44	0.	maintain proper wells. Illinois Department of Public Health regulations provide the	
45		guidelines for well construction and should be based on facts and research data collected	
46		from scientifically valid groundwater studies.	
47	4.	Continuing research on groundwater availability, recharge and the efficient use of water	
48		resources. Such research should be designed to develop a conservation program with	
49		emphasis on individual, local and state participation.	
50	5.	Local, state, and federal appropriations to bring about groundwater research and technical	
51	-	assistance from state agencies to assist local water planning and management efforts.	
52	6.	The Illinois State Water Survey monitoring groundwater movement in aquifers to	
53		determine where water shortages may potentially arise.	
54			
55	We op	pose the granting of eminent domain authority for water resource exploration.	
56		- · ·	

1		34. WEED CONTROL
2 3	W/A S	upport:
4	1.	Seeking to improve the enforcement of the Illinois Noxious Weed Law.
5 6	2.	Efforts by the United States Department of Agriculture (USDA) and the Illinois Department of Agriculture (IDOA) to restrict the importation and sale of viable Niger Thistle seed.
7 8	3.	Providing information to counties on the process by which weeds can be classified as noxious.
9	4.	Seeking to improve the purity of crop and bird seed and sterilization of all weed seed
10		included in bird seed to deter the spread of viable weed seed.
11	5.	Working with the Farm Service Agency and other governmental agencies in developing an
12	c	effective eradication program for multiflora rose.
13 14 15	6.	The development of a control program for autumn olive and bush honeysuckle, and seek the necessary funds from the state and federal government to adequately eradicate the weed.
16	7.	Legislation to require all governmental agencies to develop, coordinate, and implement
17 18		proper management practices to control the population and spread of noxious and other weeds on all their properties.
19 20	8.	Working to add Shattercane, Bull Thistle, Tall Thistle, and Poison Hemlock to the Illinois Noxious Weed List.
21 22	9.	Encouraging the IDOA to notify the county boards whenever there is a change to the Illinois Noxious Weed Law and/or rules.
22	10.	USDA requiring that seed for program acres be free of pesticide resistant weed seed such
24	10.	as Palmer Amaranth.
25		
26 27		35. WETLANDS
27 28 29 30 31 32 33 34	wetla prote to dis conve wetla	ecognize that while our country has had a history of programs encouraging the conversion of ands to uses considered more productive, public opinion now sees significant benefits in acting wetlands. We agree wetlands provide certain benefits and support reasonable efforts acourage their conversion. However, this should not mean that in all instances wetland ersion is unnecessary or that private landowners should solely bear the cost of protecting ands. Any effort to protect wetlands should recognize the rights of private property owners drainage districts.
35		
36	We s	upport:
37	1.	A definition that requires all three benchmarks of hydric soil, hydrophytic vegetation, and
38 39		standing water during a predominance of the growing season, supported by a minimum of three consecutive years of sampling data, before a wetland designation is made. Any
40		definition should be subject to public review and legislative approval.
41	2.	Scientific soil vegetation sampling on all lands that are to be designated a wetland. Data
42		should be made available to the landowner and be maintained by the Natural Resources
43		Conservation Service (NRCS) as long as that parcel continues to be designated a
44		wetland.
45	3.	An equitable wetland designation appeals process for landowners.
46 47	4.	A mapping program, as a prerequisite to regulation, which: A. Accurately identifies land which has a predominance of hydric soils, hydrophytic
48		vegetation and standing water.
49		B. Has been subject to the review of locally affected landowners and operators.
50		C. Has a standard interpretation from the state NRCS office which ensures equality
51		across county lines.
52	5.	The exemption from regulation under Section 404 of the Clean Water Act and
53 54 55		Swampbuster of prior converted cropland and any land that has been cropped in at least six of the last ten years.
56		

1	6.	Compensation to property owners when their ability to make management decisions as to
2		the best economic use of their property is restricted by laws or regulations aimed at
3		protecting wetlands.
4	7.	The ability for private wetland landowners to be able to mitigate wetland conversion on an
5		acre-for-acre or value-for-value basis.
6	8.	Compensation to local units of government which lose tax revenue due to governmental
7	•	development or acquisition of wetland areas.
8	9.	Education programs which seek to inform landowners of the benefits of wetlands and to
9	0.	urge voluntary conservation of wetland areas.
10	10.	State regulatory control of wetlands programs if they are administered through the Illinois
11	10.	Department of Agriculture (IDOA). State regulations should be no more restrictive than
12		federal regulations.
13	11.	The ability to maintain existing drainage structures and tile lines without prior permits or
14	11.	
	10	permission.
15	12.	The United States Department of Agriculture (USDA) NRCS being responsible for
16		identification and regulations of all wetlands.
17	14/	and a later of the second as the second second second
18		pose the delineation of these areas as linear wetlands:
19	1.	Man-made drainage ditches.
20	2.	Fence lines.
21	3.	Either existing waterways or land previously used for natural drainage.
22		
23		
24		
25		36. WILDLIFE MANAGEMENT
26		
27		lieve agriculture maintains a vital role in ensuring a safe food supply for future generations.
28	The ro	le of farmers in this system is to be responsible managers of the land and the business
29	operat	ions. In order to achieve these goals, effective wildlife management is essential.
30		
31	The fo	llowing basic principles are key to effectively implementing wildlife management:
32	1.	Programs that strengthen a landowner's and operator's ability to control wildlife that cause
33		damage on property they own or operate.
34	2.	Educational and informational programs for landowners and operators that promote
35		wildlife management and provide additional income opportunities.
36		
37		Hunting and Trapping
38	We su	
39	1.	Quality wildlife management based on economic, biological, and sociological practices.
40	2.	Hunting and trapping because we recognize their vital role in wildlife management, their
41		economic benefit to the state and its citizens, and that they are a legitimate form of
42		recreation that provides positive influences in our society.
43	3.	Streamlining the Illinois Department of Natural Resources (IDNR) licensing and permitting
43	0.	process to make it more efficient and beneficial for the landowner.
45	4.	Programs to control wildlife populations on public lands and in urban areas, including
40	т.	agricultural land within urban areas, where problems exist.
40	5.	
	5.	Expanded access, with the landowner's permission, to public and private lands to allow
48	c	more hunting opportunities.
49	6. 7.	Efforts to extend all firearm, muzzle loading, and late winter antierless-only deer seasons.
50	/	The IDNR issuing combination permits consisting of one antlered and two antlerless deer
	1.	and hence dee antice and the technical and a second second second state of the second second second second second
51	7.	and bonus doe-only permits to hunters to control over-population of deer and reduce
51 52		health and safety concerns.
51 52 53	8.	health and safety concerns. Encouraging the IDNR to pursue enterprising methods, such as youth or handicap hunts,
51 52 53 54	8.	health and safety concerns. Encouraging the IDNR to pursue enterprising methods, such as youth or handicap hunts, to control wildlife in areas where problems exist.
51 52 53		health and safety concerns. Encouraging the IDNR to pursue enterprising methods, such as youth or handicap hunts,

1		support the requirement for public notification and public hearings in the proposed release
2		area 90 days prior to the final decision concerning this wildlife release. Landowners should
3		have the right to stop a release on their property.
4	10.	Encouraging IDNR to allow landowners/tenants to purchase additional firearm deer and
5		turkey permits without having to surrender their landowner/tenant free permits.
6	11.	Encouraging the IDNR to allow the harvest of both hens and toms during any turkey
7		season in those counties where population control is necessary.
8	12.	The establishment of an additional fall firearm season for hen-only after the regulation
9	10	turkey season is complete in those counties where population control is necessary.
10 11	13.	Legislation or administrative rule to allow landowners to assign free landowner/tenant permits for deer or turkey to family members outside of the household.
12	14.	The IDNR providing landowner's extra free doe permits for firearm and archery seasons.
13	15.	Legislation requiring the IDNR to amend the permitting process allowing for fair, non-
14	10.	preferential access and earlier permit acquisition (February or March) at reasonable fees
15		to non-resident hunters. We also support requiring the IDNR to eliminate the cap on non-
16		resident archery permits and to issue all permits allowed by law. We will aggressively
17		pursue legislation to eliminate the cap on non-resident archery permits.
18	16.	Programs that encourage and educate youth on hunting and retain hunters in order to
19		enhance the economic viability of agriculture.
20	17.	Eliminating the law requiring landowner(s) and immediate family members to purchase
21	10	habitat stamps to hunt on property they own or operate.
22	18.	Legislation to allow individual members of farm partnerships and non-resident landowners
23 24	19.	to obtain free landowner deer and turkey permits. The ability of landowners to obtain a muzzleloader permit without going through the lottery
24 25	19.	system.
26	20.	An increase in the number of resident and non-resident firearm permits issued in each
27	20.	county.
28	21.	An increase in bag limits for the turkey season and also support an extension of the paid
29		permit season.
30	22.	A year-round season for Illinois residents to hunt, trap, or dispatch resident Canada
31		geese.
32	23.	The removal of resident geese from protection under the Migratory Bird Treaty Act of
33	~ (	1916.
34 25	24.	Assisting the University of Illinois Extension to develop a basic fee hunting lease
35 36	25.	agreement. Requiring that deer and turkey hunting permits be issued without charge to the lineal
37	25.	descendants of an Illinois resident who owns at least 40 acres of Illinois land, provided
38		that the lineal descendants hunt only upon that landowner's land.
39	26.	The late winter antierless-only deer season shall be open in those counties with a firearm
40		or muzzleloader season.
41	27.	Amending the rules for issuance of firearm deer and turkey hunting permits to allow
42		landowners/tenants the ability to buy a hunting permit and be eligible for the first drawing
43		of hunting permits.
44	28.	The ability of landowners to lease their land for hunting. Landowners should not be
45	~~	required to have a minimum number of acres or be required to become an outfitter.
46 47	29.	Continue to work with IDNR and others to monitor and fine tune the definition of outfitters,
47 48		the registration program, and the guidelines for outfitters.
40 49		Nuisance Programs
<del>-</del> 50	We si	upport:
51	1.	A wildlife nuisance permit program that embodies three elements to control nuisance
52		animals causing damage to crops and property. Those elements are:
53		A. Harvest time and management flexibility.
54		B. Transferability of permits.
55		C. Sufficient permits to reduce property damage.
56		

1 2 3 4 5	2. 3.	Assisting members in utilizing the law which provides for an IDNR permit to control wildlife where it is causing damage to crops or property. The American Farm Bureau Federation in seeking landowner authority to control federally regulated wildlife that is creating a nuisance.
6		Assistance/Incentives for Landowners
7 8 9 10 11	1.	upport: Assistance for landowners and operators in implementing management practices that enhance wildlife populations conducive to the economic well-being of landowners and operators. We support legislation or administrative rule changes, including those that govern controls in urban/adjacent agricultural areas, in order to achieve these goals.
12 13	2.	Incentive programs to enhance wildlife habitat, especially on environmentally-sensitive areas.
14 15 16 17 18 19 20	3.	Efforts to compensate landowners and operators for damage to agricultural crops, property, and livestock arising from wildlife especially on private property near areas managed by IDNR and the U.S. Fish and Wildlife Service (FWS) and acknowledgement by IDNR as well as FWS in the vital role of farm owners and operators in the feeding of the various forms of wildlife present on lands under our control. This should include compensation to owners/operators for the value added to wildlife community present on our lands.
21 22	4.	Providing incentives to hunters through the Sportsmen for Hunger program and various other means to help manage the doe population.
23 24 25 26 27	5.	Serving as a source of information for landowners on how they can benefit from voluntary, fee-based programs for recreational activities on their land, how landowners can participate in these voluntary programs, what programs (such as Access Illinois Outdoors) currently exist, and further investigate other possibilities.
28		Trespassing
29 30		upport:
31 32 33 34	1. 2.	Efforts to protect rights of farmers and farm owners with problems of trespassing or unauthorized entry by individuals and to require potential users to ask for written permission from landowners or tenants before using the land. Legislation that would make trespassing, when associated with deer driving, a class C misdemeanor.
35 36	We o	ppose the release of elk in Illinois.
37 38		
39		
40 41		<b>37. EMINENT DOMAIN</b>
42 43 44	We w 1.	vill seek legislation providing: That a public hearing be held before any land could be optioned or purchased by a public body for any purpose.
45	2.	That property owners' rights should be fully explained at the hearing.
46 47	3.	That at least 60 days prior to the hearing, the public body proposing the acquisition send
47 48 49 50 51	4.	written notice of its intentions to property owners whose land would be taken or damaged. For a cause of action and standing for nearby landowners in court cases involving eminent domain. This should allow landowners in the impacted area the opportunity to seek monetary damages when their property values are adversely affected by such acquisitions.
52 53 54 55 56	5.	The elimination of eminent domain being used to acquire property for recreational uses.

1	We support:		
2 3 4	1.	Legislation to restrict the use of eminent domain to acquire property for wetlands mitigation, buffer zones, water diversion, or retention as part of a river flood management plan.	
5 6	2.	Restricting the use of eminent domain by a public utility for the installation of pipelines and other utilities.	
7 8 9	3.	Legislation in which fair market value compensation of private property taken as a part of an eminent domain proceeding receives an exemption from capital gains taxes.	
10	We op	0060.	
11	1.	The granting of quick-take powers to economic development authorities.	
12	2.	The use of eminent domain to acquire properties intended for future sale.	
13	3.	The use of eminent domain in the taking of private property for the purpose of economic	
14	0.	development by private parties.	
15 16 17	4.	The use of eminent domain for the purposes of economic development when the project in question has not received approval for construction.	
18 19			
20 21		38. FARMLAND OWNERSHIP	
22 23 24		pe of domestic ownership of farmland, farm facilities, or farm commodities should not e on the economic opportunities of the individual farmer.	
25	We su	pport.	
26 27	1.	Insisting that all foreign investors be required to conform to all local, state and federal tax laws.	
28 29	2.	Continuing to monitor the effect of foreign investment in agriculture, food distribution, banking, insurance and other businesses in the United States.	
30 31	3.	The continuation of programs to require the reporting of foreign ownership of farmland in the United States.	
32 33	4.	State and national programs and policies which encourage and facilitate the ownership of farmland by farmers and those directly involved with the practice of farming.	
34 35	5.	Continuing to monitor the effects of the entry of non-agricultural entities into farming or farm ownership.	
36 37 38	6.	The U.S. Department of Agriculture (USDA) and the Government Accountability Office analyzing and reporting on foreign influence in the U.S. agricultural industry.	
39	We op	DOSE.	
40	1.	The preferential tax treatment of foreign investments in agricultural land under federal tax	
41		law or treaty provisions.	
42 43	2.	The purchase of American farmland by all foreign entities.	
44			
45			
46 47		39. GOVERNMENTAL PROPERTY ACQUISITION AND OWNERSHIP	
48	We su	pport legislation:	
49	1.	Preventing any involuntary net loss of private property ownership in any state. All future	
50		forced acquisition or sanctioning of property by federal, state, or local government	
51		agencies except by universities for agricultural research must be balanced by	
52		disbursement or sales of property of equivalent value from government inventories within	
53		the state.	
54 55 56	2.	To prohibit additional purchases of real estate for recreational or preservation purposes by any level of government unless the property remains on local tax rolls at the prevailing tax rates and prevailing assessed value of similar local properties.	

1 2	3.	Providing for a method of compensating units of local government by the state or federal government where the amount of land taken by the state or federal government severely
3		reduces property tax revenues or where the demand for local services related to the state
4		or federal-owned or managed property is substantially increased.
5	4.	Requiring governmental units maintaining highways, parks or other areas which increase
6 7		road use or require added police or fire protection or other emergency services to compensate the appropriate local bodies maintaining those roads or providing such
8		services.
9	5.	Providing for a hearing and a referendum of registered voters in the county or counties in
10		which land is sought by a local governmental unit for recreational, forest or conservation
11		purposes. Existing public lands should be developed for the purpose for which it was
12		purchased before additional property is acquired.
13 14	6.	Providing that agricultural land owned by local governmental units may be rented for
14	7.	agricultural purposes until developed. To ensure that those government-owned lands, which are commercially farmed and
16	1.	produce a cash crop, should not be farmed by government, but instead are leased to
17		farmers with the exception of those used for agricultural research.
18	8.	Requiring the governmental unit to offer land for resale to the previous owner or their heirs
19		at the lower of the original purchase price or current market value if the property acquired
20		by an agency will not be used for the original purpose for which it was acquired or to
21 22		adjacent landowners if the original landowner or their heirs do not exercise the right to purchase. If the original or adjacent landowner does not exercise the right to purchase
23		within one year of the offer to sell, then the governmental unit should be allowed to sell
24		such property to other interested parties. We support a sunset time limit of ten years for
25		the property to be used as intended or the buy-back provisions go into effect.
26	9.	Providing that on land owned by the State or local taxing authority where benefits from
27		barter or income are received from such land, a portion of this income or exchange will be
28 29	10.	returned to the county in which the land is located in lieu of taxes. Requiring units of government acquiring railroad right-of-way property (i.e., for trails) to
29 30	10.	follow the same provisions for fencing and farm crossings as the railroad was required to
31		follow.
32	11.	Requiring public bodies making acquisition of property for public purposes to make
33		financial settlement within 60 days of the date that the purchase price is determined or be
34		required to pay the property owner the prime interest rate plus 2 percent interest per year
35 36	12.	on the purchase price until final settlement is made. To limit state and federal agencies in their purchase of additional recreational or wildlife
37	12.	habitat until existing sites, other than farmland, are developed and maintained for the
38		purpose for which they were intended.
39	13.	That would require governmental agencies to document the impact on agriculture of any
40		infrastructure projects, show whether that impact is justified, and if so, take all reasonable
41	4.4	steps to reduce or eliminate any negative impact.
42 43	14.	That clearly defines scenic easements, establishes parameters on the use of such easements, and restricts the ability of the government to use federal highway funds to
44		purchase scenic easements.
45		
46	We o	ppose:
47	1.	Any effort to establish buffer areas around parks, preserves, or other areas being
48		protected for their environmental or ecological value without just compensation to affected
49 50	2.	landowners. The formation of any state or federal wildlife refuges, recreational or conservation areas
50 51	۷.	until such time as the boundaries of such projects are clearly defined and the property
52		targeted for acquisition is clearly identified.
53	3.	The creation or expansion of local, state, and federal refuges, recreational or conservation
54		areas when the aggregate acreage of such proposed focus areas account for more than
55		two percent of the county's farmland.
56		

1 2 3	4.	The formation of state or national wildlife refuges, recreation, or conservation areas that impede the existing natural and artificial drainage systems of landowners in the watershed.
4	5.	The continued encroachment of federal and state agencies and local governments on
5	<u> </u>	agricultural and forest lands.
6 7	6.	The closing of Illinois State parks and state historic sites since they are valuable assets for the social and economic survival of rural Illinois.
8		
9		ill work with state and federal agencies to allow the farming of lands acquired under the
10		Lands Trust or other federal or state grant programs. Applications for Open Lands Trust
11 12		to be used for wetlands or riparian areas must include a mosquito abatement and gement plan. The timetable for development of the land acquired through such grant
13		ams shall be established by the unit of local government but is not to exceed ten years.
14		ncourage public universities to utilize more equitable and risk-sharing adjustable rate leases
15		r than a competitive bidding cash rent lease process on university-owned farmland. All
16 17	lesse	es of Illinois farmland controlled by public Illinois universities shall be Illinois based farmers.
18	Wher	evaluating farm lease policies on farmland owned by the University of Illinois and other
19	public	c universities, the long-term land stewardship commitments, the full potential local effects on
20		communities and their economies, and future university relations with possible land donors
21 22	shoul	d be considered in addition to the immediate economic benefits for the universities.
22	Wher	determining farmland lease policies, the public institutions should consider taking the
24	oppor	tunity to use best management practices on the universities' owned farmland consistent
25	with t	he information being provided through the University of Illinois Extension Service.
26 27		
27 28		
29		40. HERITAGE AREAS AND CORRIDORS
30		
31		ppose heritage areas and corridors, heritage rivers, scenic byways, and any other such
32 33	1.	al or state programs that: Have regulatory authority.
34	2.	Have the power of eminent domain.
35	3.	Are involuntary.
36	4.	Are not grassroots, consensus-based programs that actively involve agricultural interests
37 38	5.	in their creation, development, and execution. Do not provide a means for a private property owner, a county, or other state or municipal
39	5.	authority to opt out of the program.
40		
41		
42 43		41. LAND USE AND FARMLAND PRESERVATION
43 44		41: LAND USE AND FARMLAND PRESERVATION
45		Municipal Annexation
46		
47 49		upport:
48 49	1.	Legislation requiring notification of landowners by the petitioners via certified mail at least 90 days prior to any formal petition to incorporate their land into a municipality as defined
50		in Illinois Statutes.
51	2.	Legislation that allows only the landowners in a territory being considered for annexation
52	0	to be allowed to sign and submit a written petition to the corporate authorities.
53 54	3.	Efforts to reduce the impacts of municipal annexation on agriculture by reducing to 10 acres the size of the parcel that may be forcibly annexed, and/or establishing a fixed
54 55		minimum period of time during which agricultural practices may continue.
56		

1	We op	pose:	
2	1.	Strip and excessive annexation by municipalities.	
3	2.	Non-contiguous annexation agreements and the ability of municipalities to apply their	
4		ordinances to parcels that have not been annexed.	
5			
6	Whene	ever the governing body of any municipality has adopted a resolution to annex any	
7		rporated area of land, such municipality shall, before proceeding, present at a public	
8		g the following information:	
9	1.	A map and description of the area to be annexed.	
10	2.	Evidence that such annexation is reasonable and necessary to the proper development of	
11	۷.	the municipality.	
12	3.		
	з.	Evidence of the ability to furnish normal municipal services to the unincorporated area at	
13		the time of annexation.	
14 15		Farmland Preservation	
15		Farmiand Preservation	
16	W/bile	anatastina the severity tional visits of landours are use support.	
17		protecting the constitutional rights of landowners, we support:	
18	1.	Legislation to broaden the legal basis for farmland preservation approaches and efforts to	
19		implement and utilize the following farmland preservation tools:	
20		A. Purchase of Agricultural Conservation Easements (PACE) to be implemented at	
21		the state, county, or local levels or in collaborative arrangements between entities.	
22		B. Transfer of Development Rights (TDR) to be supported and implemented at the	
23		state, county, or local levels.	
24		C. Growth Management Laws including limited annexation rights for municipalities	
25		where prime agricultural land is involved and agricultural protection zones based	
26		on referendum secured from encroachment of conversion.	
27		D. Mitigation standards requiring that conversion of farmland to a non-farm use be	
28		considered only if an equal amount of equal quality land is protected by an	
29		agricultural conservation easement.	
30	2.	Efforts to encourage preservation of appropriate lands for agriculture and open space	
31		uses through land use programs which include:	
32		A. A policy statement by all counties to:	
33		<ol> <li>Preserve Class I and II farmland as defined by the Natural Resources</li> </ol>	
34		Conservation Service.	
35		2) Conserve Class III and IV farmland.	
36		<ol> <li>Protect all classes of farmland from indiscriminate conversion to non-farm</li> </ol>	
37		use.	
38		B. Establishment of a review process with local involvement prior to acquisition of real	
39		property by public agencies for public uses.	
40		C. Identification of the various classes of farmland in all counties.	
41		D. Identification of land in each county appropriate for development because of class,	
42		size or location.	
43		E. The concept of agricultural areas as found in the Illinois Agricultural Areas	
44		Conservation and Protection Act. We will take a strong leadership role in	
45		strengthening the Act to ensure that it becomes an effective farmland preservation	
46		tool.	
47		F. Reducing the required acres enrolled to create an Ag Area.	
48	3.	Requiring consideration of the impact on agriculture and the local tax base and the desires	3
49		of local voters in proposals to take agricultural lands for any public use.	
50	4.	Encouraging counties and municipalities to implement boundary and land use agreements	3
51		that protect farmland. Boundary agreements should not be used as a tool in lieu of the	
52		purchase of development rights.	
53	5.	Seeking legislation that limits the term of county/municipal boundary agreements to five	
54		years in length and subjects such agreements to public notice and public hearing.	
55	6.	Maintaining involvement in reviewing federal, state and local proposals to convert	
56		farmland to non-farm purposes.	

1	7.	Monitoring actions by state agencies regarding implementation of the Farmland Protection
2		Act.
3	8.	Working with major urban interests to develop policies and programs which will encourage
4		compact cities and discourage conversion of farmland. We support the concept of cluster
5		development if the remaining property in the original parcel of property will be preserved
6	-	for agricultural or conservation purposes.
7	9.	Cooperating with other organizations on farmland preservation issues.
8	10.	Encouraging municipalities to explore all possible avenues to redevelop areas within their
9		borders before annexing farmland.
10	11.	The consideration of impacts on farmland in the development of Environmental Impact
11		Statements as being as significant as the impacts to other environmentally sensitive areas
12		(i.e., historical sites, wildlife/waterfowl refuges, and publicly owned parks and recreational
13		areas). We will work with state and federal agencies to develop an Environmental Impact
14		Statement methodology that increases the contributory value of farmland to the public
15	10	good.
16	12.	Legislation authorizing a graduated conversion fee program for agricultural land that is
17		converted to non-agricultural use based on the parcel's Land Evaluation score. The
18		collected fees would support local PACE programs.
19 20		need the use of condemnetion by governmental bodies to equire formland for formland
20 21	preser	pose the use of condemnation by governmental bodies to acquire farmland for farmland
22	preser	
23	Tho fo	deral government should assist in funding the purchase of agricultural conservation
23		ents for agricultural purposes from willing sellers as a means of preserving farmland
25		t intruding on private property rights. Information about federal, state, local, and private
26		to acquire private property using tax money should be catalogued and publicized through a
27		evel clearinghouse.
28	01010	Planning & Zoning
29	We su	
30	1.	Requiring members of a county zoning Board of Appeals to reside within the area covered
31		by the county zoning ordinance.
32	2.	Making it mandatory that County Boards require zoning Boards of Appeal to read and
33		include the report of the Soil and Water Conservation District concerning all zoning
34		applications in the hearing and in the report on the application which is made to the
35		County Board.
36	3.	Basing the extent of the municipality's extraterritorial jurisdiction (ETJ) and zoning
37		capability outside its boundaries on the population of the municipality. The smaller the
38		municipality, the smaller its reach of ETJ and authority should be. No ETJ and
39		municipality's zoning authority should extend beyond 1 1/2 miles.
40	4.	Limiting the ETJ and zoning capabilities of a municipality to either a municipality's utility
41	_	boundary or corporate limits, whichever lies closer to the city core.
42	5.	Removing the veto power of municipalities over proposed agricultural areas within their
43	-	1 1/2 mile jurisdiction.
44	6.	Assisting counties and municipalities in considering adoption of zoning.
45	7.	Assisting counties and municipalities in considering the adoption of a comprehensive land
46 47	0	use plan.
47 49	8.	Encouraging zoned counties to design and implement land use and zoning techniques to
48 40		protect the integrity of agricultural practices including the option of strict agricultural
49 50	9.	protection zones. Establishing reverse setbacks, comparable to those in the Livestock Management
50 51	ອ.	Facilities Act, for new rural residences built near established livestock facilities.
52	10.	Ensuring local land use administrators have the resources necessary to properly develop
52 53	10.	and implement land use plans which accommodate production agriculture and ensure the
55 54		effective and efficient administration of the plan.
54 55	11.	Incorporating the use of a Land Evaluation and Site Assessment (LESA) system in
56		evaluating the suitability of land for agriculture/development.

1 2	12.	Incorporating the principles of the Land Use Evolution and Impact Assessment Model (LEAM) and encourage its use in planning efforts.
3 4	13.	Developing legislation giving counties protest rights over municipal zoning and planning proposals within the unincorporated area of a county, thus requiring a municipality to have
5 6 7 8	14.	a supermajority vote. Requiring municipalities to have at least one voting representative from the 1 1/2 mile ETJ on their planning commission with the possibility of additional representatives from the ETJ based on the population of the municipality.
9 10	15.	Maintaining active involvement in county planning and zoning and in the establishment of agricultural areas as tools to guide development and limit farmland conversion.
11 12 13 14 15	16. 17.	Encouraging the State of Illinois to develop a statewide zoning model that can be used by county boards and municipal corporate authorities in adopting and amending zoning ordinances that accommodate agriculture and agricultural tourism. Such a model should account for current agricultural-related federal and state laws and regulations. The provisions of the Local Legacy Act and the Local Planning Technical Assistance Act
16 17	17.	and work to secure state funding for them by reallocations within the Department of Commerce and Economic Development.
18 19	18.	Supporting legislation that would exempt agriculture from zoning imposed by municipalities within the extraterritorial area outside municipal boundaries.
20 21 22	19.	Encouraging county Farm Bureaus to develop relationships with local zoning boards to allow an exchange of information on proposed zoning changes that will impact agriculture on the county level.
23 24 25 26	20.	Seeking legislation requiring 30 days advanced written notification of all landowners and governmental entities whose property or district boundary is within 1 1/2 miles of any parcel in an unincorporated area for which a zoning change is proposed or on which a special use permit is sought. If a petition of protest from 20 percent of those landowners or
27 28 29 20		a written notice from that governing board opposing the change or permit is presented, the amendment shall not be passed nor the special permit issued except by the favorable vote of 3/4 of all the members of the county board. Landowners also need to be given 30 days written advance paties of any new or proposed dapages to municipal future planning or pro-
30 31		written advance notice of any new or proposed changes to municipal future planning area or land use.
32 33	21.	Seeking legislation that strengthens the Illinois Counties Code to limit the arranging of "by- right" lots between a proposed rural subdivision and neighboring property owners in a
34 35	22.	manner intended to extinguish the neighbors' protest rights. Encouraging townships with planning commissions to have township government
36		approved land use plans or goals with corresponding policies that reflect a consensus of
37 38		the townships' residents. These plans, goals, and policies should be used as a basis for recommendations to the county board.
39		
40	14/2 20	Other
41 42	We su 1.	Working with units of local government to enact "Right to Farm" ordinances or resolutions.
43	2.	Efforts to disclose to potential buyers of rural residential property those conditions
44		associated with living in an agricultural or rural area. These efforts should include state
45 46	3.	legislation linking such notice to the Residential Real Property Disclosure Act.
40 47	э.	Encouraging county Farm Bureaus to distribute The Code of Country Living to potential new residents of rural areas so that they better understand rural living.
48	4.	Seeking changes in the process of development of Greenway Plans or other related
49 50		<ul><li>Illinois Department of Natural Resources (IDNR) plans.</li><li>A. Where proposed passive or active greenways are targeted, the landowners should</li></ul>
50 51		have direct input on the creation of the plan.
52		B. Before their county board votes on a plan, the board should be given sufficient time
53 54 55 56		<ul><li>county the plan and get input from citizens of the county.</li><li>c. If a county board has approved a plan, there should be the option the county can withdraw from the plan in the future.</li></ul>
52 53 54 55		<ul><li>B. Before their county board votes on a plan, the board should be given sufficien to study the plan and get input from citizens of the county.</li><li>C. If a county board has approved a plan, there should be the option the county</li></ul>

1 2			If a plan is developed, it should include provisions to ensure that greenways remain voluntary.
3			42. LEGAL ADVOCACY
4 5 6 7 8 9	taken l	by gove	national legal advocacy strategy that actively addresses legal or regulatory actions rnments, groups, or third parties that impact our members' private property rights n agriculture.
9 10 11			43. PRIVATE PROPERTY RIGHTS
12			
13 14 15 16	Consti	tution, a	the sanctity of private property and individual rights as provided by the U.S. as the basis of American freedom and progress. Private property should be defined and, timber or other valuable considerations associated with land ownership.
17	We su	pport:	
18 19 20 21 22	1.	Develo govern affecte propert	ping and seeking legislation defining how private property rights are impacted by ment regulations and takings. Such legislation should provide for compensation to d property owners for a total or reasonably measurable partial loss of use of ty resulting from governmental regulations and takings including expanded setback ments.
23 24 25	2.	Efforts organiz This as	to assist landowners when the rightful ownership of land is questioned by an zed group outside the control of the state in which the land was originally deeded. ssistance should include legal and financial assistance from the State of Illinois.
26 27 28	3.	compa and da	Ig landowners to select who does the field tile repairs, at the cost of the utility ny or government entity, on their land when private or public projects go through mage their tile lines.
29 30	4.		tion reforming Illinois law on the partition of property owned by heirs to provide due s protections like the Uniform Partition of Heirs Property Act.
31 32 33 34	5.	issue v	quirement that an individual must indicate how they are directly impacted by an when filing public comments on legislation, regulation, or related rules, to the county, State of Illinois, the U.S. Government, and/or their agencies.
34 35	We op	nose.	
36 37	1.	Any eff	fort to take away or transfer the right of a landowner to grant or deny easements ally on land where easements have previously been given for other purposes.
38 39 40	2.	Legisla	tion allowing the public access to private property without the consent of the ty owner.
41			
42			
43 44			44. AGRICULTURAL COOPERATIVES
44 45	We su	pport.	
46	1.		ary participation in cooperative marketing to better serve Illinois Agricultural
47			ation and county Farm Bureau members.
48 49	2.	Studyir	ng and the development of successful marketing programs consistent with good so practices and encourage affiliates to follow these guidelines.
50 51	3.		raging and assisting cooperatives to expand member information and involvement
52 53	4.	Encour	raging all agricultural cooperatives to have an aggressive revolving stock otion policy.
54 55 56	5.	Evalua	ting processing or further integration into the marketing of farm products as a of increasing members' income.

1	6.			co-ops to play a larger role in the meat industry by building or acquiring
2				e/processing cooperatives.
3	7.			cooperatives to resist entry into production agriculture that would directly
4	-			cooperative farmers.
5	8.			armers, when direct competition in production agriculture is involved, to
6				tes through their cooperative boards (including discontinuation of enterprises
7				with the individual stockholder). In the event voluntary efforts are
8 9				to provide resolution to these competitive issues, we will seek avenues to live disputes between cooperatives and their shareholders/members when
10				hether the cooperative is directly competing with any shareholder/members in
11				riculture activities. Such avenues may include arbitration or mediation.
12		A.		llowing competition guidelines should be addressed:
13		<i>,</i>	1)	Competition could exist between a cooperative and its members if:
14			- /	a) A cooperative purchases or rents ground for the sole purpose of
15				producing agricultural commodities.
16				b) A cooperative engages in custom farming service.
17				c) A cooperative owns livestock or grows out livestock owned by
18				others.
19			2)	If a cooperative member decides to enter a venture in competition with the
20				cooperative, he/she does not have cause to find fault if the cooperative was
21				already engaged in that activity.
22			3)	Competitive production activities should not include seed sales, grain
23				trucking, the application of plant health products such as fertilizer, lime and
24			-	crop protection products (e.g., pesticides).
25		В.		llowing guidelines of remedy should be considered:
26 27			1)	Member must make a written request to the cooperative that it cease production activity.
28			2)	The cooperative shall have a specific period of time to resolve the dispute.
29			2) 3)	If the dispute cannot be resolved with the cooperative board, the member
30			3)	may seek to be released from the cooperative. Upon release, the member
31				shall receive the retained earnings allocated plus any outstanding stock,
32				patronage or otherwise, which is held by the member seeking release. The
33				only earnings considered are those on the books of the cooperative that are
34				specifically credited to the account of the named member/patron.
35			4)	The cooperative may refuse services to released members and/or require
36				them to reinvest to obtain future services.
37			5)	Provisions should be made to allow members to legally waive their rights of
38		_		redemption and release.
39		C.		ting ongoing personal contact between state and county Farm Bureaus and
40				ooperatives to raise issues and to resolve problems.
41		D.		rated cooperative structure whereby the regional cooperative continues to
42			assist	local cooperatives in serving their farmer members.
43 44				
44				
46				45. AGRICULTURAL RESEARCH
47				
48	We su	pport:		
49	1.		eaningf	ul involvement of food and agriculture stakeholders in priority setting,
50				accountability for federal and state food and agricultural research, extension,
51		and ec	ducatior	n programs.
52	2.			he need and financing necessary to provide appropriate incentives for
53				naintaining a critical mass of well-trained scientists in the public sector to
54	_			nsure that the U.S. remains the leader in global agricultural production.
55	3.	A natio	onal cou	incil with an emphasis on food and agricultural research.
56				

1	4.	Research funding efforts for the Illinois Council for Food and Agricultural Research
2	-	(C-FAR).
3	5.	Redesigning the system of research farms and other pilot scale research facilities to
4		assure that new information and technologies generated in public and/or private efforts
5	6	around the world are rapidly selected for and adapted to Illinois conditions.
6 7	6.	Awarding some federal special grants on a competitive basis that address high-priority
8		objectives identified by stakeholders and requiring large-scale, well-coordinated efforts by federal and state institutions and agencies working in cooperation with food and
9		agriculture organizations and firms.
10	7.	Annual increases in the federal investment in public food and agriculture research,
11	7.	extension, and education programs to adjust for inflation in costs.
12	8.	Federal investment in research that provides a mix of formula, competitive, and special
13	0.	grants.
14	9.	Continued federal funding for Cooperative State Research, Extension and Education
15	01	Service (CSREES) programs to support but be limited to the broad scope of research,
16		extension, and education programs that reflect activities in the U.S. food and agriculture
17		sector. Research, extension, and education programs should be tailored to the unique
18		situations of regions, states, and locales.
19	10.	The use of both federal and state funds to support basic, developmental, and adaptive
20		research and technology transfer.
21	11.	Allocation of funds based upon scholarship and quality of science in determining who
22		should receive funds to carry out federal, state, and local research, extension, and
23		education programs.
24	12.	A major personnel building effort in Illinois to restore and improve its public institutional
25	40	capacity for food and agriculture research, extension, and education.
26	13.	A major capital program in Illinois to provide modern facilities and equipment for its food
27	4.4	and agriculture research, extension, and teaching programs.
28 29	14.	The integration of research, extension, and education programs to ensure an effective and
29 30	15.	efficient transfer of knowledge and technology to farmers. Funding for the Plant Genome Research Project.
30 31	16.	Reauthorization of the competitive research facilities program for land grant universities.
32	17.	Maintaining viable, competitive regional agriculture research centers.
33	18.	Securing foreign investment in U.S. agriculture research where foreign countries stand to
34		benefit from the outcomes derived from such research.
35	19.	Programs to educate consumers about the necessity of research and its integral position
36	-	in the creation of a long-term, competitive, desirable agricultural growth industry.
37	20.	Land grant colleges keeping research facilities in the public sector.
38	21.	An increase of research dollars in the public and private sector dedicated to the
39		development of new domestic uses of agricultural products and commodities.
40	22.	Production research on efficient nutrient uptake, water quality and usage, and improved
41		pest and disease resistance for crops and livestock.
42	23.	An increased role for the Illinois Nutrient Research and Education Council (NREC) in
43		reaching the 25% phosphorus reduction goal stated in the Illinois Environmental
44		Protection Agency (IEPA) nutrient reduction strategy. We advocate facilitating this activity
45 46		by restructuring the NREC research committee to include a representative from the
46 47		southern region of the Illinois Wheat Association and a farmer producer from the southern
47		region appointed by Illinois Farm Bureau. This enables input from parties familiar with conditions and opportunities in the priority phosphorus watersheds.
40 49		conditions and opportunities in the phonty phosphorus watersheds.
<del>-</del> 50		
51		
52		46. AGRICULTURAL TOURISM
53		
54	We re	ecognize that agricultural tourism serves as an important marketing strategy and also helps
55		ucate the public about where and how food and farm products are grown.
56		

1	We su	
2	1.	Recognizing agricultural tourism as an economic development tool for rural areas and
3		support public policy that encourages the growth of agricultural tourism.
4	2.	Continuing to build a working relationship between agricultural tourism operations, state
5		agencies, and other associations.
6	3.	Encouraging the development and implementation of a statewide strategic plan for
7	0.	agricultural tourism with industry input and support.
	4	
8	4.	Promoting collaborative projects to raise the awareness of the importance of agricultural
9		tourism to the state's economy and expand growth opportunities in agricultural tourism for
10		Illinois farms including maintenance of appropriate existing databases and websites.
11	5.	A law establishing a broader protection for agritourism operators and facilities/grounds.
12	6.	Encouraging the insurance industry to offer insurance policies for agricultural tourism
13		farms that provide farm owners with coverage for nuisance lawsuits, property damage,
14		and liability, including liability for injuries to visitors invited to the farm.
15		
16		
17		
		17 5005 400500
18		47. FOOD ACCESS
19	_	
20		nsecurity occurs when food is either too distant or too expensive to purchase. A food
21	desert	is one type of food insecurity.
22		
23	The U.	S. Department of Agriculture (USDA) defines a food desert as any census tract where at
24		0 percent of the inhabitants are below the poverty line and 33 percent live over a mile or in
25		reas more than 10 miles from the nearest supermarket.
26		
	We su	
27	1.	Incentives, including but not limited to, offering tax credits or breaks to grocery stores in
28		underserved areas.
29	2.	Policy development to support grocery stores and neighborhood-based farmers markets.
30	3.	Simplifying the process for permitting and launching grocery stores.
31	4.	Programs to encourage heathy eating, food preparation, and proper food storage.
32	5.	Partnering with the community when selecting food desert measurements, policies, and
33		interventions.
34	6.	Increasing the use of third-party and digital platforms for all approved Supplemental
35	0.	Nutrition Assistance Program (SNAP) retailers providing that benefits are not used for
36		service fees or delivery charges.
	7	
37	7.	Increasing SNAP approved food sales outlets.
38	8.	Food insecurity networks, like food banks, nonprofit grocers, and produce carts.
39	9.	Farmer cooperatives to provide services such as crop marketing, distribution, guidance on
40		partnering with food banks, and farmer training.
41	10.	The aggregation of farm products and partners to connect institutions, municipalities,
42		school districts, hospitals, community-based organizations, government agencies, and
43		other groups to provide produce to families living in food deserts.
44	11.	Farms connecting directly with food banks, food recovery organizations, and other
45		distributing nonprofits.
46	12.	Expanding the existing tax deduction for food donations to nonprofits.
47	13.	Simplifying food pantry partnerships, expansions, and new development.
48		
49		
50		
51		48. URBAN AGRICULTURE
52		
53	Urban	agriculture encompasses a wide range of activities involving the raising, cultivation,
54		sing, marketing, and distribution of food in urban and suburban settings. Generally urban
55		ture involves outdoor and indoor vertical production, indoor warehouse farms,
56		nouses, rooftop farms, hydroponic and aquaponic facilities.
50	green	

1 Urban agriculture includes community gardens and urban farms. Community gardens are 2 smaller-scale urban agriculture sites, often serving a neighborhood, where individuals and 3 families grow food primarily for personal consumption or for donation. Urban farms are larger-4 scale, more intensive sites where food may be grown by an organization or private enterprise, 5 and often include entrepreneurial opportunities such as growing food for sale. Urban farms 6 include both for and nonprofit enterprises. 7 8 We support: 9 1. Recognizing the importance of urban agriculture and its contribution to the agricultural 10 economy. 11 2. Urban agriculture providing safe, attractive, and welcoming spaces for neighbors to gather 12 and foster a sense of community. 13 3. County Farm Bureaus working with units of government to develop agriculture-friendly 14 zoning policies. 15 4. Using land management tools such as land banks, land trusts, conservation easements, 16 and long-term leases on public and private lands so urban agriculture can flourish. 17 5. Advocating for new developments to include opportunities for agriculture, including rooftop 18 and home gardens, community gardens, and urban farms where appropriate. 19 6. Access to services including trash collection, composting, water, and storage opportunities 20 to minimize costs and reduce barriers to entry. 21 7. Ensuring that urban agricultural sites have access to affordable clean water sources. 22 Diverting organic waste into compost. 8. 23 Using raised beds or hydroponics to address soil-quality concerns. 9. 24 Using season extension tools such as indoor facilities and high tunnels. 10. 25 The keeping of bees and beehives in urban settings providing that best management 11. 26 practices are followed. 27 12. Urban agriculture sites gaining access to agricultural markets. 28 13. Developing infrastructure to transport and store food for market. 29 14. Providing job training and skills development to beginning farmers and garden managers. 30 31 32 49. FOOD WASTE AND RESOURCE RECOVERY 33 34 We support: 35 1. Implementing state-based liability protection for food donors and rescue organizations that 36 expand and strengthen those provided by the federal bill, Emerson Good Samaritan Food 37 Donation Act. Food rescue includes donation or recovery of surplus food used for feeding 38 hunary people. 39 The United States Department of Agriculture (USDA) offering an education campaign on 2. donation liability protection for potential food donors and food rescue organizations. 40 41 Expansion of tax deductions or credits, including the creation of a state tax credit, for food 3. 42 donors to offset the costs associated with food donation, even if the food is sold to families 43 at a reduced cost. 44 Incentivizing farmers to donate surplus crops and offset the costs associated with the 4. 45 donation. 46 The USDA and the Food and Drug Administration (FDA) clarifying food safety donation 5. 47 regulations, for pre-cooked and pre-packaged food items. 48 49 Composting 50 We support: 51 On-farm composting. 1. 52 2. The use of composted materials on farms, gardens, and in landscaping operations. 53 Updating USDA's definition of compost so that a greater number of potential buyers, 3. 54 including farms, golf courses, or other operations near waterways, are encouraged to 55 purchase compost. Compost refers to a mixture of various decaying organic waste

56 substances, such as food scraps, dead leaves, or manure, used as soil fertilizer.

1	4.	Developing a marketing campaign to build compost demand.
2 3		Compost Facilities
4 5	We su	
5 6 7 8	1.	Streamlining and simplifying the permitting process for compost facilities, including those that accept landscape waste and food scraps. Food scraps include pre-consumer food scraps, which includes waste generated during the manufacturing and production of food prior to the item being sold and processed as food scraps.
9	2.	Permitting exemptions for small-scale and/or community composting operations.
10	3.	Reducing barriers to entry for composting source-separated organics. Source-separated
11 12		organics are organic material that have been separated from non-compostable material at the point of generation.
13 14	4.	Encouraging local zoning to allow compost facilities as a normal agricultural or commercial operation.
15		
16		Food Scraps
17	We su	
18 19	1.	Minimizing regulatory constraints for on-farm composted materials, urban food scrap collection and processing facilities.
20 21	2.	A separate permitting pathway for anaerobic digestion of source-separated food waste that includes, requirements similar to those imposed on composting source-separated food waste
22 23 24		food waste.
25 26		50. ANIMAL AGRICULTURE
27	We wil	I aggressively work to encourage growth and enhancement of the livestock industry in
28 29	Illinois.	
30	We su	pport:
31	1.	Seeking legislation to preempt anticipatory nuisance claims against owners of proposed
32 33 34		livestock facilities or expansions to existing facilities, provided that such facilities are in compliance with statutory and regulatory requirements and the construction or expansion of the facility has been approved by the Illinois Department of Agriculture (IDOA) under the
35		Livestock Management Facilities Act (LMFA).
36 37	2.	Encouraging the IDOA to cease interpretation of cases or specific situations as "inherent in the law" when no documented or otherwise noted explanation can be found in the LMFA
38 39		(especially with using this language to explain that any expansion leads to the requirement of construction of a storage facility).
40	3.	Encouraging all agencies involved with livestock facilities management jurisdiction to
41		interact and cooperate so as to develop greater consistency, uniformity, and practicality in
42		rules and regulations.
43	4.	The care of livestock through accepted management practices which will provide for better
44		health and safety for the livestock while maintaining acceptable production levels.
45	5.	The research and development of approved alternatives to livestock rendering including
46		incineration, composting systems, and approval burial methods.
47	6.	Encouraging farmer participation and adoption of quality assurance programs.
48	7.	Informing the general public and the food industry concerning livestock handling
49		procedures with complement accepted livestock management practices, and we will be
50		involved in the development of any standards.
51	8.	IDOA being the entity which shall administer the laws and regulations regarding the care
52		of livestock and companion animals.
53	9.	Participating in supply chain coalitions to proactively address issues threatening the future
54		viability of the livestock industry.
55 56	10.	The use of signage notifying employees that the use of unauthorized audio, photographic, and video devices of any kind are prohibited in the workplace.

1 2	11.	Offering educational programs on employee-employer relationships and issues to members.
3 4 5	12.	Establishing a more aggressive and visible role in monitoring animal activists' activities, such as identifying sources of funding, legislative initiatives, and membership enrollment. We will work with these groups as needed to ensure complete and accurate public
6 7 8 9	13.	statements about animal agriculture. Counter efforts against the livestock industry by continuing to develop a public relations and public information strategy in cooperation with other agricultural interests to provide accurate information to the media concerning animal agriculture.
10 11 12	14.	Enforcement of the laws which protect animal production and continue to support criminal penalties for trespassing and damage that disrupts livestock production and/or research facilities.
13 14 15	15.	Providing information in conjunction with the county Farm Bureaus to the media and the public about the importance of the livestock industry. Assistance should also be provided to individual farmers to help them to deal with the public relations challenges faced by the
16 17 18 19 20	16.	livestock industry. Encouraging livestock exhibitors to only use practices based on responsible animal husbandry. Livestock exhibitors should continue to be educated with regard to what constitutes responsible, ethical, and accepted animal welfare practices, as they relate to the competitive exhibition of livestock.
21 22	17.	Encouraging livestock show officials to enforce the "Code of Ethics" and penalize violators appropriately.
23 24 25 26 27	18.	Seeking amendments to the Humane Care for Animals Act and the Illinois Administrative Code that limit the authority of approved volunteer animal investigators that are contracted through the county Humane Societies, to companion animals only, and make those investigators primarily responsible to the IDOA.
28 29 30 31 32 33 34	"hum practi	ppose federal, state, or local legislation and regulations that are promoted in the name of ane" treatment in situations where science shows those regulations would, in actual ice, adversely affect the health, longevity, or productivity of livestock and the economic ity of the operation.
35 36		51. ANIMAL HEALTH AND IDENTIFICATION
37	We s	upport:
38	1.	The Illinois State Fairs working with the livestock industry and the Illinois Department of
39 40	2.	Agriculture (IDOA) to regularly update a public listing of illegal drugs. Illinois State Fairs having a zero tolerance for animals testing positive for illegal drugs.
40	2. 3.	The Illinois State Fair allowing approved compounds to be present in tissue tests provided
42	0.	they exist below tolerance levels established by the Food and Drug Administration at the
43		time of slaughter.
44	4.	The Illinois State Fair allowing for the tissue presence of compounds administered off-
45		label under veterinarian guidance in consultation with Food Animal Residue Avoidance
46		Databank (FARAD) and Animal Medicinal Drug Use Clarification Act (AMDUCA) protocols.
47	_	Withdrawal time prior to slaughter must still be met for these off-label compounds.
48 49	5.	Changing U.S. Department of Agriculture's (USDA) Foot and Mouth Disease (FMD) response plan from a focus on eradicating infected animals to implementing a widely-
50 51	6.	available vaccination control program. State and federal disease eradication programs for livestock, and research designed to
52	7	develop and utilize swift and accurate tests to diagnose these diseases.
53 54	7.	The quarantine of animals from herd and flocks known to be infected with reportable
54 55 56		diseases and the destruction of animals which are infected with reportable diseases and the destruction of animals which are infected with zoonoses which may enter the human food chain.
50		

1	8.	USDA assistance for farmers with infected herds and flocks to develop an approved plan
2	0	to clean up or depopulate their herds and flocks within a reasonable period of time.
3 4	9.	Federal legislation, regulations, or programs which will: A. Encourage greater uniformity and reciprocity among states for the health
5		requirements necessary for interstate transportation of livestock.
6		B. Provide, at the state and federal levels, a voluntary management program for
7		Johne's Disease.
8		C. Encourage beef, dairy, goat, sheep, and cervid farmers to test their animals for
9 10		<ul><li>Mycobacterium paratuberculosis, the causative organism for Johne's Disease.</li><li>D. Encourage cooperation between livestock farmers and the Animal and Plant Health</li></ul>
10		Inspection Service (APHIS) in identifying animals from herds originating from
12		nations which have confirmed cases of Bovine Spongiform Encephalopathy (BSE).
13		E. Prioritize birth records over dentition, if available when USDA is testing for BSE in
14		cattle.
15 16		<ul><li>F. Provide for regionalization by APHIS to modernize animal movement regulations.</li><li>G. Work with stakeholders to develop a process which provides assurance among</li></ul>
17		G. Work with stakeholders to develop a process which provides assurance among livestock producers, veterinarians, and packers which will allow for the timely
18		marketing of animals from herds that have been infected with a non-reportable
19		disease, yet are deemed safe to travel, will not spread the disease, and will not
20		negatively impact the food supply.
21		H. Allow farmer/owner consumption of fallen stock.
22 23		<ol> <li>Allow slaughter of injured stock at either a federal inspected packing house or a state inspected local slaughter plant to be used for human consumption.</li> </ol>
24	10.	Implementation of an animal disease traceability program that:
25		A. Does not create a burdensome cost to livestock farmers.
26		B. Encourages uniformity between states.
27		C. Can quickly and accurately trace an animal in the event of a disease outbreak.
28 29		<ul><li>D. Initially uses minimal standards for identification and tracking.</li><li>E. Meets the expectations of foreign governments and out customers overseas.</li></ul>
30		F. Places a high priority on ensuring the U.S. reputation as a reliable supplier of meat
31		to foreign markets.
32		G. Uses low-cost tags and a "bookend" approach (the times an animal enters
33		commerce and harvest) to track an animal's movements and allows for the
34 35		replacement of lost tags. H. Allows for private sector incentives and disincentives for livestock that are uniquely
36		identified.
37		I. Requires all exhibition livestock in Illinois to have a unique identification number
38		(appropriate for each species) and premises number before allowing the animal to
39		show.
40 41	11.	Encouraging the IDOA to appoint a food animal practitioner to the position of the Illinois State Veterinarian.
42	12.	Encouraging USDA's APHIS to make any announcements related to BSE testing after the
43		markets have closed.
44	13.	Encouraging the use of electronic animal health papers with the ability to include actual
45		digital photos of the animal for relevant species.
46 47	14.	Encouraging producers to take advantage of educational opportunities regarding biological risk management (BRM) and implement these procedures in their operations.
47 48		nsk management (BRW) and implement these procedures in their operations.
49		
50		
51		52. APICULTURE
52 52	10/	upport and anapurage legislation or administrative rules for Illingia backgeners, regardly r
53 54		upport and encourage legislation or administrative rules for Illinois beekeepers, regarding arvesting and marketing of honey, that are no more stringent than those of neighboring
55	state	
56		

1		53. BIOSECURITY
2 3		upport:
3 4 5	1.	Department of Homeland Security (DHS) placing agricultural screening and inspections as a high priority with its Customs and Border Patrol officers.
6 7	2.	State and federal legislation to establish an indemnity program and contract relief when acts of terrorism result in losses in production and/or marketability of agricultural products.
8 9	3.	Import and export protocols that prevent the introduction of foreign animal and plant diseases.
10 11	4.	The concept of looking at animal health issues beyond our own borders and examining them as "North American" issues.
12 13	5.	Educational programs for farmers that will assist them in the early identification, treatment, and required reporting of animal and plant diseases.
14 15	6.	The testing and development of crops that are resistant to diseases not currently present in the United States. The research should be conducted in non-sensitive areas so that the
16 17 18 19 20	7.	spread of diseases would not cause any loss of value to U.S. agricultural production. Continuing to work with state agencies such as the Illinois Environmental Protection Agency (IEPA), Illinois Department of Public Health (IDPH), and Illinois Department of Agriculture (IDOA) to establish and implement uniform biosecurity protocol for all personnel to follow that is consistent with scientific biosecurity guidelines.
21 22	8.	Encouraging livestock producers to voluntarily develop biosecurity protocols for their operations.
23 24		
25 26 27		54. BIOTECHNOLOGY
28 29 30 31	maint effect	ill actively encourage and educate farmers to be good stewards of biotechnology in order to ain the integrity and image of the U.S. food and grain supply, ensure technology remains ive through regulatory compliance, and preserve opportunities for future biotech products rocesses.
32	14/2 21	
33		upport:
34 35	1.	Increased efforts through biotechnology to more rapidly develop traits which have recognized consumer benefits in order to:
36		<ul> <li>A. Increase the marketability of our products.</li> <li>B. Enhance the environment.</li> </ul>
37		
38		C. Increase net farm income.
39		D. Improve product quality.
40		E. Enhance U.S. agriculture's competitiveness in the world market.
41		F. Ensure worldwide consumers of stable, ample, safe, and nutritious U.S. products.
42	2.	The coordinated analysis of biotechnology products by United States Department of
43		Agriculture (USDA), Food and Drug Administration (FDA), and Environmental Protection
44		Agency (EPA) before they are approved for domestic use and commercialization.
45	3.	Utilizing science, including unbiased third-party research, on the development and use of
46		biotechnology enhanced products.
47	4.	Ongoing monitoring of the process of biotechnology product research and approval.
48 49	5.	Increased efforts to educate the public worldwide regarding the safety and benefits of products developed through biotechnology.
50	6.	Maintenance of U.S. export markets by securing foreign regulatory acceptance of
51 52		biotechnology products, including the following priorities: A. Manufacturers of biotechnology enhanced products must assume major
53		responsibility for this acceptance.
54 55 56		B. Companies offering biotechnology enhanced products for commercialization in the U.S. must first have approval for most major uses and markets, domestic and international.

1		C. Companies must provide adequate and accurate information on acceptable	
2		markets and market restrictions in writing to farmers prior to purchase of the	
3		original input product.	
4 5		D. An ongoing, written reporting system should be maintained for informing farmers	
5 6		what markets do not accept or might be adversely affected by currently unapproved varieties.	
7		E. Responsible production, marketing, and delivery of agricultural products by those	
8		growing varieties not approved for all major uses in all major markets.	
9	7.	Global commercialization and production of biotechnology-enhanced crops provided that	
10		U.S. farmers are not disadvantaged by business practices compared to our foreign	
11		competitors and continued monitoring and reporting of biotechnology fees in the U.S. and	
12	0	other countries.	
13 14	8.	Seed tags on packages of agricultural seed stock that clearly indicate the varietal (and genetic) purity of seed contained therein. We will also support legislation which allows	
15		farmers to recover all damages in those instances where the seed does not conform to the	
16		genetic purity indicated on the seed tag.	
17	9.	New or enhanced marketing methods for biotech and non-biotech seeds provided that	
18		they do not restrict market options and offer farmers:	
19		A. Improved cropping options.	
20		B. More cost-effective inputs.	
21 22		C. Better transportation, handling, planting, and yields.	
22 23		<ul><li>D. Uniformity in unit size (seed count per unit).</li><li>E. Uniformity in seed size.</li></ul>	
24	10.	Efforts to establish specific standards for biotechnology enhanced and non-biotechnology	
25		enhanced product certifications.	
26	11.	Adequate testing methods for all commercialized crops in order to protect farmers from	
27		liability and ensure the integrity of our grain supply, moreover:	
28		A. Tests should keep pace with the latest technology and product introductions.	
29		B. Sufficient competition should exist in the testing market to ensure cost-	
30 31		<ul><li>effectiveness.</li><li>C. Tests should be accurate, verifiable, and acceptable to end users.</li></ul>	
32		<ul><li>C. Tests should be accurate, verifiable, and acceptable to end users.</li><li>D. The first-purchaser should be responsible for testing upon taking delivery.</li></ul>	
33		E. The cost of testing should be shared along the agri-food chain.	
34	12.	Harmonization of international standards for biotech and non-biotech content, testing,	
35		adventitious presence, etc. via the World Trade Organization (WTO) and Codex	
36		Alimentarius.	
37	13.	Strict adherence to contracts and sales agreements covering the production, marketing,	
38		and use of biotechnology products.	
39 40	14.	The strict enforcement of 100 percent quarantine for the research, production, and	
40 41		processing of pharmaceutical and industrial crops that are not approved for food and feed use in the United States in order to protect the commercial grain industry and food safety.	
42	15.	Full compensation to farmers for market losses due to lack of enforcement of 100 percent	
43		quarantine on experimental crops.	
44	16.	Biotechnology products that are coming off patent to have:	
45		A. A product development clause allowing researchers to work with that trait, with	
46		proper stewardship restrictions, before the patent expires. This product	
47 48		development clause should allow for continued product development and the	
40 49		seeking of export market approvals, so products can be brought to market as soon as patents expire.	
49 50		<ul> <li>B. A system to provide timely access to data collected by the patent holder for the</li> </ul>	
51		biotechnology regulatory process. The patent holder should receive fair	
52		compensation for sharing its data.	
53		-	
54			
55			
56			

1 2		55. COMMODITY CHECKOFFS
2 3	We su	innort.
3 4 5 6	1.	Voluntary checkoffs for market promotion, development and research that are collected only once from individuals, marketing agencies or Commodity Credit Corporation (CCC) loans when forfeited and only if the farmer can have his checkoff refunded.
7 8	2.	Legislated mandatory checkoffs for market promotion, development and research if such checkoffs contain provisions calling for:
9		A. The program to be voted in or out by the farmers affected;
10		B. Control of the program by an independent committee of farmers;
11 12 13		<ul><li>C. A full refund of monies upon request to farmers until such time as a refund referendum (not a poll) is approved/disapproved by a majority of farmers voting;</li><li>D. The monies to be used only for purposes intended;</li></ul>
14		E. The checkoff to apply to all imported products;
15 16		F. Checkoff-funded research grants for end-user products that have royalty or licensing agreements, where feasible, signed with the research institution.
17 18 19	3.	Providing information to farmers which supports the need for increased funding of programs designed to expand domestic and foreign markets for commodities and commodity products.
20	4.	The use of technology to increase voting participation.
21	5.	Working with commodity checkoff groups to emphasize value-added benefits to farmers
22	0.	and to focus on higher net returns for farmers.
23 24	6.	Efforts to revise rules and regulations governing election of directors of commodity checkoff boards.
25 26		
27		
28 29		56. COMMODITY EXCHANGES
30	We su	innort.
31	1.	The integrity of the Chicago Mercantile Exchange (CME) Group as a pricing mechanism
32		for commodities.
33 34	2.	Regulation of the commodity futures business by the Commodity Futures Trading Commission (CFTC).
35 36	3.	Encouraging the commodity exchanges to have an active and viable agriculture advisory committee that meets on a regular basis.
37 38	4.	Monitoring expanded trading regulations and encourage Illinois Agricultural Association representation on advisory committees to the Commodity Exchanges.
39 40	5.	Urging the CFTC to minimize price manipulation and ensure the markets are effective as a price discovery mechanism.
41	6.	Reviewing price-setting mechanisms and make recommendations for the most effective
42	_	price-discovery systems for identity-preserved grains.
43	7.	Encouraging the CFTC to work with the CME Group to provide accessibility, usability, and
44		affordability of river terminals, and to increase the number of terminals to be used as
45		delivery points to fulfill hedged grain contracts. This should result in a means to force
46	0	convergence between the cash and futures market at expiration of the contract.
47 48 49	8.	Encouraging the CME Group to offer "mini" energy and fertilizer futures contracts to better allow farmers and others to hedge their input costs.
50 51	We op	ppose new or unnecessary fees being imposed on market price information.
52 53		
54		
55		
56		

1		57. COMMODITY GROUPS
2 3		support:
3 4 5	1.	Working closely with commodity groups operating in the state and encourage county Farm Bureaus to work closely with local representatives of commodity groups.
6 7 8	2.	Increased cooperation between commodity groups through the pooling of resources to create and continue a direct concentrated effort to educate consumers on the facts associated with the production of livestock and other agricultural commodities using
9 10 11	3.	accepted best management practices. Scheduling and holding a regular meeting or meetings with representatives of commodity groups affiliated or contractually related to Illinois Agricultural Association for purposes of
12 13 14		exchanging information and coordinating legislative and regulatory positions and actions.
15 16 17		58. CONTRACT PRODUCTION AND MARKETING
18	Wes	support:
19 20 21	1.	Monitoring the current changes in marketing practices for many farm commodities, which are moving from farmer to buyer without entering the open market but are being produced and marketed by contractual specifications.
22	2.	The representation of agriculture and assistance in the area of contract marketing.
23 24 25	3.	The assignment of staff to research contracts being considered and provide education, information, and advice to attorneys representing farmer members about the ramifications of contracts being entered into and ensure that farmers engaging in contract production
26 27	4.	and marketing are adequately protected.
28	4.	Seeking measures to ensure that adequate price discovery remains in place for all noncontracted farmers.
29 30	5.	An improved United States Department of Agriculture (USDA) commodity price reporting system based upon required price reporting by first purchasers.
31 32	6.	Seed and chemical companies to include local elevators in the premium structure, thus making specialty crops available to more farmers.
33 34 35	7.	Individual member farmers in their efforts to negotiate fair and equitable production contracts by developing an information clearinghouse and glossary of terms for production contracts.
36 37	8.	Educating farmers about the risks involved with buyers call provisions and ensuring that these provisions include:
38 39 40 41		<ul> <li>A. Specific delivery periods with negotiated final delivery date.</li> <li>B. Payments to seller if delivery period exceeds original contracted delivery period or if buyer "calls" for delivery prior to the contracted delivery period.</li> <li>C. Pricing ability to and beyond delivery.</li> </ul>
42 43	9.	Working to develop contract language that will limit farmer liability for grain quality or type to the initial point of delivery.
44 45	10.	Contracting options offered by a processor being transparent and available to all producers marketing through that processor with considerations for volume, delivery, and
46 47 48 49		quality.
50 51 52 53		
53 54 55		
56		

1 2		59. DAIRY MARKETING
2	W/A SI	upport:
4 5 6	1.	Input from leaders of the dairy industry and jointly search for solutions to dairy problems which are satisfactory to both our organization and the dairy industry. We urge the American Farm Bureau Federation (AFBF) to work constructively on a national dairy policy
7 8 9		<ul> <li>that can jointly be supported. Such policy should include a program that:</li> <li>A. Is market oriented, reflect current marketing conditions, and send the appropriate signals to dairy farmers to cause adjustments in the production of milk components</li> </ul>
10 11		according to market needs. It should allow farmers to look to the marketplace for their long-term economic prosperity.
12		<ul> <li>Enhances net farm income and ensure an adequate supply of milk.</li> <li>Dravides for a worldwide for a toda policy.</li> </ul>
13 14		<ul><li>C. Provides for a worldwide free trade policy.</li><li>D. Continues the present purchase-based price support program.</li></ul>
14		E. Maximizes the use of the Dairy Export Incentive Program (DEIP).
16 16 17		<ul> <li>F. Does not include dairy quota-type marketing concepts but are willing to consider a flexible supply management system.</li> </ul>
18		G. Does not include state or regional dairy compacts.
19		H. Supports risk management tools that will protect dairy farmers from catastrophic
20		swings in feed and milk prices.
21		I. Encourages development of new products targeted towards the export market.
22	2.	Changes in milk content standards on a national basis under the Pasteurized Milk
23	2	Ordinances so as not to interfere or obstruct interstate movement of milk.
24 25	3.	The principle whereby Boards of Directors of dairy cooperatives can vote for their members in milk marketing and state promotion plans. However, each farmer, whether or
26		not a member of a cooperative, should have the right to cast his own ballot in any
27		referendum.
28	4.	The increased use of dairy products by the school lunch program and by the armed
29		forces.
30	5.	Working with the dairy industry to coordinate federal and state inspections to eliminate
31 32	6.	duplication and to continue to allow the shipment of milk between states. Implementing a performance-based system that would allow for fewer inspections of dairy
32 33	0.	farmers that are achieving high ratings from the Illinois Department of Public Health.
34	7.	Monitoring the potential for dairy processor closures or losses of markets and work to
35	0	inform our membership on alternatives for milk marketing.
36 37	8.	The pasteurization of raw milk for sale to the public. We also recognize there is a segment of consumers that prefer to purchase raw, unpasteurized milk. For those farmers who sell
38		unpasteurized milk to consumers, the following guidelines should be followed:
39		A. Sales occur directly from farmers - on the farm - to consumers provided they bring
40		their own containers.
41		B. No wholesalers, retailers, grocery stores or third parties be allowed to sell these
42		products.
43 44		C. Farmers receive a raw milk permit from the Illinois Department of Public Health (IDPH) to produce and sell raw milk, subject to semi-annual inspections.
44 45	9.	Changes to national requirements to the legal limit of Somatic Cell Count (SCC) in bovine
46	0.	milk to 400,000 cells per milliliter and less.
47	10.	The development of a stable and robust pricing mechanism for Class I milk. This could
48		include: Class I milk price being based on the advanced price of Class III milk, plus the
49		historical differential of manufactured prices between Class III and Class IV on the
50 51		Chicago Mercantile Exchange (CME), based on the higher of the advanced Class III or
51 52	11.	Class IV skim price or another undescribed or novel pricing method. Federal Milk Market Order (FMMO) reforms to depooling rules in order to include limits on
52 53		the amount of milk that is depooled.
54	12.	The study and implementation of combining or reducing the number of classes of milk
55		within the FMMOs.
56		

1 2	60. BIG DATA, E-COMMERCE, PRIVACY, AND OWNERSHIP				
2	\//	We support:			
4	1.	Efforts to better educate stakeholders regarding utilizing new technology or equipment that			
5	1.	may receive, record and/or transmit data and the opportunities and risks associated with			
6		big data and e-commerce.			
7	2.	Requiring companies that are collecting, storing, and analyzing data to provide full			
8	۷.	disclosure of their intended use of the data.			
9	3.	Development of an alternative dispute resolution system for internet transactions.			
10	4.	Industry discussions regarding development of industry wide protocols including, but not			
11		limited to proper disclosure, privacy and use agreements.			
12	5.	Encouraging participants in data sharing use agreements to recognize the value			
13	0.	associated with data allowing farmers to receive fair compensations.			
14	6.	Efforts to educate farmers about the utilization and impacts of Global Positioning			
15	0.	Systems/Geographic Information Systems (GPS/GIS).			
16	7.	Uniform ownership standards for the collection, use and release of GPS/GIS data and			
17		other forms of data so it becomes the private property of the person who paid for it or			
18		whose assets are being utilized.			
19	8.	Requiring the consent of the farmer for the release of all personal and farm data.			
20	9.	Standardization of formats and protocols developed and used by industry for GPS/GIS			
21	0.	applications.			
22	10.	Efforts to prevent the use of personal and farm data for illegal activities.			
23	11.	Research to determine the appropriate role of government in the implementation of			
24		GPS/GIS systems.			
25	12.	The neutral and fair transfer of legal data between users by internet service providers.			
26		5			
27					
28					
29		61. DEVELOPMENT OF NEW USES AND NEW MARKETS			
30					
31	We su	upport:			
32	1.	Developing innovative uses for and increased consumption of farm commodities and co-			
33		products.			
34	2.	Developing promotional programs for businesses and restaurants that use U.Sproduced			
35		commodities in their daily business and efforts to develop programs which encourage			
36		consumption of Illinois-grown farm products.			
37	3.	The right of restaurants to market and sell agricultural products and prepared menu			
38		choices, without restrictions by local units of government, provided the products are legally			
39		produced using best management practices and industry standards.			
40	4.	Efforts to develop and procure financing for processing, distribution, storage, and			
41		marketing systems for value-added farm commodities with added emphasis on			
42		streamlining and expediting the approval process for farmer-owned projects.			
43	5.	Efforts to develop new local marketing points for specialty crops.			
44	6.	Cooperation with farmer-invested checkoff groups, organizations, and agencies seeking			
45		expanded domestic and export markets, placing special emphasis on value-added			
46		products.			
47	7.	Increased funding of grants and guaranteed loan programs to foster research and			
48		development of farm commodity and livestock value-enhanced initiatives. A majority of			
49		those funds should be targeted to enable farmers to form farmer-owned processing			
50		cooperatives.			
51	8.	Research on existing and proposed identity-preserved processes in order that government			
52		entities may lend their credibility to voluntary industry standards for certification of identity-			
53		preserved agricultural products.			
54	9.	Promoting the use of Illinois-grown produce in Illinois schools and state-funded			
55		institutions.			
56					

1 2 3	10.	An expanding sheep wool, goat hair, and other animal fiber (e.g., angora, mohair, alpaca, llama) industry in Illinois and recognize the need for continued promotion and development of value-added processing and marketing.
5 4 5 6	11.	Development of regional food hubs, a business or organization that actively manages the aggregation, distribution, and marketing of source-identified food products primarily from local and regional producers.
7 8 9	12.	The expansion of online market sales of agricultural and processed food products.
10 11		62. DIRECT FOOD MARKETING
12 13		upport.
13	1.	upport: Farms disclosing whether products will originate from a single farm or multiple farms.
15 16	2.	Farms utilizing Good Agriculture Practices and abiding by any state or federal statutes regarding food safety to prevent any food safety risk, including contamination.
17 18	3.	The acceptance of government nutrition programs at Community Supported Agriculture (CSAs), farmers markets, and farm stands.
19 20 21	4.	Farms operating as a CSA, in the event of any product substitution, notifying shareholders by providing a list of products and the physical address of the originating farm of where the product was grown.
22 23 24	5.	Farms maintaining records per applicable law including origin of all products, physical address and contact information to ensure traceability of CSA shares for a period of five
24 25 26	6.	years. Standardized statewide regulations governing refrigeration, freezer, and hand washing station requirements for farmers markets and other direct food sales opportunities.
27	7.	Interstate commerce for farmers markets.
28	8.	Programs, grants, and legislation to improve direct-to-consumer market opportunities for
29		specialty growers and livestock producers.
30		
31		
32 33		63. EQUINE AGRICULTURE
34		
35	We su	upport:
36	1.	Relationships with entities that would allow establishment, access, and maintenance for
37		equine trail activities on publicly-owned recreational trails.
38	2.	Simplifying the process allowing volunteers to assist state/federal workers in trail
39		maintenance and camping areas and to accept donations of items to enhance trails and
40	0	camping areas.
41 42	3.	Education programs to promote a viable and growing equine industry. Such programs may include: responsible ownership, animal husbandry, regulations affecting the equine
42 43		industry, and disease awareness.
44	4.	Efforts to provide insurance and liability coverage that is accessible and reasonable for
45		equine owners and participants involved in equine related activities.
46	5.	Seeking legislation allowing equine harvesting in Illinois.
47	6.	Options for end-of-life alternatives for equine including humane harvesting and processing
48		for human consumption, or other uses to produce marketable products, provided all state
49		and federal guidelines are observed.
50	7.	Continued full funding of federal meat inspectors for equine harvesting facilities.
51	8.	The expansion and economic welfare of the horse racing industry.
52	9.	Encouraging equine owners to work with veterinarians in practicing regular equine health
53 54	10	standards.
54 55	10. 11.	Performing an annual Coggins Testing to identify Equine Infectious Anemia (EIA). Administering vaccinations, relevant to travel, and exposure to regional disease and
55 56	11.	infection.
00		

1	12.	Using a routine schedule and strategy for treating and preventing internal equine
2		parasites.
3	13.	County Farm Bureaus creating and maintaining county and/or multi-county equine
4		committees.
5 6	14. 15.	Efforts to develop and execute an Illinois equine census.
6 7	15.	Seeking legislation classifying equine as livestock.
8	We o	ppose:
9	1.	Closing existing equestrian trails on federal and state property other than property where
10		irreversible damage could occur.
11	2.	Efforts to terminate, ban, effectively ban, or create an undue financial hardship relating to
12		the use of horses in commerce, service, agriculture, husbandry, transportation, ranching,
13 14		entertainment, education, or exhibition.
15		
16		
17		64. FARMER PROTECTION FOR PAYMENT OF GRAIN
18		
19 20		upport: The review of eivil and eximinal namelties to determine if they are adequate and enforced
20 21	1.	The review of civil and criminal penalties to determine if they are adequate and enforced to the full extent of the law.
22	2.	Changes in the U.S. Warehouse Act which would allow any state which has a warehouse
23		law which is more restrictive and more protective than the federal law, to require
24		warehouses operating in the state to comply with the state's provisions rather than the
25		federal statute.
26	3.	The maintenance of the current state powers of licensing of warehouses and grain
27 28		dealers, and general regulation of the grain industry, as embodied in the Illinois Grain Code, and oppose federal preemption of state authority.
20 29	4.	Educating farmers of the potential risks involved in selling grain to unlicensed parties and
30	ч.	how to better identify licensed grain buying facilities.
31	5.	The concept that farmers who buy more than 100,000 bushels of grain on an annual basis
32		from other farmers for use as seed or feed, and use price-later contracts, must provide a
33		bond to the Illinois Department of Agriculture (IDOA) to guarantee payment for all
34 35		purchases of grain, except no bond shall be required in those situations where a tenant
36	6.	purchases, from his landlord, grain produced by the tenant. The requirement of a reminder notification being made by licensee to the farmer no less
37	0.	than 30 days prior to the end of the 365-day period of coverage for price-later contracts.
38	7.	Continuing educational programs to inform members of potential problems of marketing
39		grain under priced later or deferred price contracts. Farmers should be encouraged to
40		request prompt payment available to them under laws and regulations. Farmers should be
41 42	8.	informed of the risks and costs involved in selling grain without receiving payment. Maintaining the target balance of the Illinois Grain Insurance Fund at a level that is
42 43	0.	commensurate with the cash value of Illinois grain commodities.
44	9.	Legislation requiring that arbitration be voluntary on the part of both parties to a grain
45		contract. This should be accomplished by specifying that both parties to a grain contract
46		must agree to arbitration in writing after the dispute arises, as opposed to allowing farmers
47		to be forced to give up their right to use the courts as part of a take-it-or-leave-it contract.
48	10.	Continuing active dialogue and cooperation with IDOA to ensure it has inspectors and
49 50		examiners in adequate numbers to fulfill the regulatory obligations of the Illinois Grain Code.
50 51		
52		
53		
54		
55 56		
56		

1 2	65. GRAIN AND HAY GRADING				
3	We support:				
4	1.	The United States Department of Agriculture's (USDA) efforts to improve standards for			
5	1.	grain which will reflect storability and highest potential use.			
6	2.	Moisture as a measurement of quantity, not quality.			
7	2. 3.	The development and funding of a voluntary certification process for identity-preserved			
8	З.	grain.			
9	4.	Maintaining close liaison with USDA to ensure proposed grade changes are in the best			
10	4.	interests of farmers with particular attention to the proper role for grade factors such as			
10		test weight, foreign material, and other quality factors such as breakability.			
12	5.	Working with the American Farm Bureau Federation (AFBF) to increase farmer			
12	5.	representation on the Grain Inspection, Packers, and Stockyards Act (GIPSA) Grain			
13					
	C	Inspection Advisory Committee.			
15	6.	An effective grain discount schedule that is determined at the time of contract instead of at			
16	-	the time of delivery.			
17	7.	Working with the USDA, private agencies and the State Department of Agriculture to			
18		develop and adopt more accurate equipment and procedures for testing moisture			
19	0	percentage and test weights in grain.			
20	8.	The State of Illinois and USDA to continue testing, developing grading standards, and			
21	0	identifying various qualities of hay and grain.			
22	9.	Changes in grain grading standards to compensate farmers for high quality products.			
23	10.	Research that identifies the advantages and disadvantages of selling grain on a value-			
24		based or component-pricing basis.			
25	11.	Efforts to maintain grain quality in transit.			
26	12.	Efforts to standardize and certify testing equipment and operators for all grain toxins.			
27	13.	Changes to have processors and elevators show documented economic justification,			
28		including actual cost of correction, for all discount rates concerning grain quality			
29		degradation, i.e., test weight, off-color, odor, or moisture.			
30	14.	Basing moisture and drying schedules for grain based on one-tenth increments of actual			
31		moisture recorded over the allowable moisture content instead of the current practice of			
32	. –	rounding up to the nearest one-half point.			
33	15.	15 percent grain moisture for corn to be recognized as the industry standard for all			
34		disposition excluding storage.			
35	16.	Enhanced training to improve grain grading standards for all grain elevators.			
36					
37					
38					
39		66. INDUSTRIAL HEMP PRODUCTION			
40	147				
41		upport:			
42	1.	The production, processing, commercialization, and utilization of industrial hemp.			
43	2.	Efforts to improve industrial hemp contracts between growers and processors.			
44	3.	The regulation and taxation of any hemp derived products that concentrate or synthesize			
45		intoxicating compounds.			
46					
47					
48					
49		67. LIVESTOCK PRICING AND MARKETING			
50 51		upport			
51 52		upport:			
52	1.	Legislation, on a state and national basis, establishing the Grain Inspection Packers and			
53		Stockyards Administration (GIPSA) as the overall authority and provider of oversight to			
54 55		ensure livestock contracts are clearly-written, confidentiality concerns are addressed,			
55 56		investments are protected, and contractors honor the terms of contracts.			
56					

1	2.	Providing GIPSA with the authority to enforce contract standards that enhance price
2		transparency and price discovery with livestock contracts.
3	3.	Including monthly slaughter capacity reporting in mandatory price reporting by packers.
4	4.	GIPSA be provided enforcement authority to ensure that all instruments used in
5		quantifying quality factors for value determination for livestock are performing to a set
6		standard.
7	5.	The inclusion of time and date stamp for reporting prices of livestock.
8	6.	The United States Department of Agriculture (USDA) and industry representatives
9		examining the practicality of an industry wide, uniform grading system for pork that
10		includes a quality grade.
11	7.	The development and implementation of value-based marketing systems which convey
12		the value of product quality from the retail market to the farm.
13	8.	Farmers fully understanding the risks involved with using but not participating in a market
14		to set a price.
15	9.	Cooperating with the USDA, livestock groups, and university researchers to develop and
16		utilize alternative price discovery methods.
17	10.	Illinois Department of Agriculture seeking the most efficient method for sale barns to report
18		prices for distribution to farmers.
19	11.	Working with the CME Group, other industry groups, and livestock packers to develop a
20		market mechanism that allows for improved forward pricing contracts and flexible pricing
21		opportunities for farmers.
22	12.	The CME Group and the Commodities Futures Trading Commission (CFTC) recognizing
23		packing plants as delivery points to fulfill livestock contracts, resulting in means to bring
24		convergence between the cash and futures market at expiration of the contract.
25	13.	The Illinois Livestock Development Group (ILDG) working with livestock packers in order
26		to facilitate the expansion of livestock buying stations in Illinois.
27	14.	All efforts to improve the livestock price reporting system.
28	15.	All reporting system changes that will generate reported market prices calculated on
29		premium prices paid as well as price lows in the quality range.
30	16.	Livestock packers securing at least 20 percent of their purchases from the cash market.
31	17.	Additional funding from USDA needed to enable GIPSA to conduct these activities.
32	18.	The creation and development of livestock pricing tools based on the blend of the cash
33		value for the animal and the carcass value from the boxed beef, wholesale pork, or boxed
34		lamb reported values, respectively.
35		
36	lf a pa	cker is offering a contract that is based upon a cash market, the packer needs to participate
37	in this	market and help set a price.
38		
39		perative that GIPSA has the oversight on mandatory price reporting - not Agricultural
40	Marke	ting Service (AMS).
41		
42		
43		
44		68. ORGANIC AGRICULTURE
45		
46		ic products are overseen by a United States Department of Agriculture (USDA) National
47		ic Program (NOP)-authorized certifying agency (ACA); produced without excluded or
48		ited methods; and produced using only allowed substances. Organic is a production
49		ard set by the USDA NOP for marketing label use (Title 7, Subtitle B, Chapter I,
50	Subch	apter M, Part 205).
51		
52	We su	
53	1.	All methods of agricultural production and marketing provided they offer opportunities to all
54		farmers who qualify or meet required standards.
55		
56		

1 2 3 4 5 6 7 8 9 10 11	2. 3. 4. 5. 6.	Broad availability of information on the USDA-certified organic program, certification process, and labeling requirements, as well as other unbiased information on organic products or production. Clarity and integrity of organic standards in the marketplace. Funding for organic agriculture, production, education, and technical assistance by non- government organization, universities, and extension. Enhanced marketing opportunities for producers of organically grown commodities just as we support such efforts for conventionally produced crops. Responsible use of buffer strips or other appropriate measures by organic farmers to protect their crops from pollen drift or other factors affecting the integrity of their crops.
12	14/2 21	Federal Programs and Support
13 14	1.	upport: Research into methods for improving soil health and the development of biological and
15	1.	cultural management of disease, weeds, and pests.
16	2.	Organic farmers using organic prices for all federal farmer support programs.
17 18 19 20	3.	Allowing first-year organic crop insurance applicants to the organic crop insurance program to receive the organic price for their crop insurance providing that organic inspection occurs by the Risk Management Agency (RMA) before the crop insurance deadline without final review and the final certificate required at a later date.
21 22 23	4.	Assisting farmers to meet current and future consumer demand and expand outreach and education opportunities using the National Organic Certification Cost Share Program (OCCSP).
24 25		Certification and Enforcement
26	We su	ipport:
27	1.	Third-party certification to verify compliance with NOP standards.
28	2.	Full and equitable enforcement of NOP standards.
29 30 31	3.	A certification and accreditation process that is transparent, risk-based and requires producers and certificate holders to uphold high integrity in their organic production practices.
32	4.	Transparency about enforcement actions taken by NOP.
33	 5.	Strict consequences for ACA implicated in domestic or foreign fraud and significant non-
34	0.	compliance.
35	6.	Strengthening USDA import inspection, review, and testing protocols to ensure organic
36		label integrity.
37	7.	Requiring farmers selling organic products to display the USDA Certified Organic logo and
38		their certification number.
39		
40		
41		
42		69. PACKERS AND STOCKYARDS ACT
43 44	10/0 01	upport:
44 45	1.	The Department of Justice (DOJ) and the Federal Trade Commission (FTC), with the
45 46	1.	support of the Grain Inspection Packers and Stockyards Administration (GIPSA), enforcing
40 47 48		current anti-trust laws pertaining to packer mergers, market concentrations, packer feeding, and contracting.
49	2.	Open, competitive markets which include access to slaughter space and the number of
50		contracted slaughter days should be monitored and enforced if necessary.
51	3.	The DOJ monitoring for a potential monopoly on a regional, rather than a national basis.
52	4.	Including the United States Department of Agriculture (USDA) in the decision-making
53		procedure with respect to proposed mergers and acquisitions of meat packing firms.
54 55 56	5.	Legislation that grants GIPSA authority to prosecute violators and seek restitution for farmers in cases involving agricultural production, processing, and marketing violations.

1 2 3 4	6.	Incorporation of a dealer trust provision to the Packers and Stockyards Act. The bonding requirement for livestock dealers and packers should be reviewed on an annual basis and be adjusted to reflect the volume of the maximum financial exposure to farmers and/or their brokers and then be made available to the public.
5 6 7 8	7.	Changes to the administration of the Illinois Livestock Auction Market Law that will clarify, as well as strengthen, language relating to the use of custodial accounts by livestock auctions.
9 10 11 12	coope	pose packers owning livestock before slaughter with the exception of farmer-owned closed ratives and farmer-owned livestock fed and retail-marketed within the provisions of a lty product marketing alliance.
13 14 15		70. PLANT PATENTS AND PLANT VARIETY PROTECTION
16		
17	We su	
18 19	1.	Plant and utility patents as well as the Plant Variety Protection Act (PVPA) as ways to enhance innovations in plant performance that benefit farmers.
20 21	2.	PVPA as the statute governing the Intellectual Property Rights for the breeders of plant varieties.
22 23	3.	Maintaining the international and domestic gene/germplasm banks/stores. These should remain easily accessible to the public.
24	4.	Continued plant variety research in the public sector.
25 26	5.	Compensation for the public contribution in a joint public-private venture.
27 28 29 30		71. SPECIALTY CROPS
31 32 33		alty crops are defined by the United States Department of Agriculture (USDA) as fruits and ables, tree nuts, dried fruits, horticulture and nursery crops including floriculture.
34	We su	pport:
35 36	1.	Enhancing the specialty crops industry's image through marketing, promotions, legislative engagement, and programming.
37 38	2.	Efforts to increase individuals' access to fresh, healthy, local food through direct marketing outlets.
39	3.	Providing programming, legislative, and marketing efforts for the continued growth of the
40 41		industry and development of various specialty crops that are not already defined by USDA.
42 43	4.	Funding for specialty crop research, extension services, pathologists, and entomologists to assist with the growth of the industry.
44	5.	The simplification and expansion of the Noninsured Crop Disaster Assistance Program
45 46		(NAP) to provide financial assistance to producers of non-insurable crops, including those grown for food or horticultural, to protect against natural disasters that prevent crop
47	0	planting or result in lower yields or losses.
48	6.	Cost-share funding for USDA Good Agricultural Practices (GAP) certification.
49 50	7.	Reduced cost of Good Handling Practices (GHP) certification for small and very small
50	0	producers.
51 52	8. 0	Standardization and clarity in the food grading system.
52 53	9.	Adoption of the FDA-State Produce Safety Implementation Cooperative Agreement
53 54	10.	Program.
54 55	10.	Implementation of and funding for the Value-Added Producer Working Grant Program for both food safety-only and working capital applicants.
55 56		beth food safety only and working capital applicants.

1 2	11.		Food Safety Intervention Technologies Research Unit to develop new approve the safety of the food supply and to determine the efficacy and					
3		suitability of new biological, chemical, and non-thermal physical technologies.						
4	12.	Development of technologies to reduce, control or eliminate foodborne pathogens from						
5	12.	food products and contact surfaces.						
6	13.	Simplification of state and federal agency food procurement processes.						
7	14.							
8	14.	An indemnification program funded by state or federal sources that provides for losses of plants and nursery stocks that must be eradicated to control the spread of serious						
9		communicable diseases. Indemnity payments should be based upon current market						
10		values.						
11		Valueel						
12								
13								
14			72. TRADE					
15								
16	We su	port:						
17	1.		ultural exports to efficiently utilize the productive resources of American					
18			nhance farm income and improve the farm economy through various trade					
19			ig-term investments.					
20	2.		ng authority for the President of the United States in order to achieve:					
21		A. A full ro	und of World Trade Organization (WTO) trade negotiations including all					
22		industry	sectors and giving agriculture a full seat at the table. The overall goal					
23			be to lower both tariff and non-tariff barriers for U.S. exports around the					
24		world.						
25			-based binding agreements that resolve sanitary and phytosanitary issues					
26			ly as possible.					
27 28			ualization and increased market access by requiring U.S. trading partners ate tariff barriers within specified timeframes.					
29			g international agreements and U.S. law to shorten dispute resolution					
30			res and processes.					
31			of all existing international agreements under the WTO and U.S.					
32			/ailing duty laws to prevent the dumping of subsidized agricultural products.					
33			ate, unrestricted trade and distribution of U.S. approved agricultural bio-tech					
34		products						
35			ate harmonization of domestic food safety and quality standards with our					
36			onal trading partners based on the guidelines set by the WTO and					
37		increase	ed funding to United States Department of Agriculture (USDA) and the Food					
38		and Dru	g Administration (FDA) to ensure adequate food inspections at the borders.					
39		H. Uniform	intellectual property protection standards.					
40	3.	Improved mark	et access and reduced trade barriers through support of bilateral, regional,					
41			I free trade agreements.					
42	4.		onetary Fund (IMF) efforts provided their actions are based upon sound					
43			omic policies and further facilitate world trade.					
44	5.		nembers, legislators and others on the importance of global currency					
45			agricultural trade and foreign competition.					
46	6.	Increased funding for, promotion of U.S. agricultural products through United States						
47			Agriculture (USDA) programs like Market Access Program (MAP) and					
48	_		Development (FMD).					
49	7.	-	approval of any embargoes of agricultural products proposed by the					
50	0	President.	rogram that companyates formars through market lass not market					
51 52	8.		rogram that compensates farmers through market loss payments:					
52 53			petitive disadvantages to U.S. farmers resulting from burdensome c regulations or standards that are more strict than those in other countries.					
53 54			cy values harm U.S. farm trade and if it can be achieved within WTO					
54 55		guidelin						
56	9.		es. normal trading relations and "most favored nation status" with Cuba.					
50	0.		normal training rolations and most avoid nation status with Ouba.					

1	10.	Inspections of imports to the U.S. to protect our domestic production capacity and supply
2 3	11.	of agricultural products from infestations. Improving informational, organizational, and marketing linkages between and among
4		North and South American farmers.
5	12.	A U.S. Foreign Aid Program that:
6		A. Provides leadership in enhancing global food security and economic development.
7		B. Increases federal commitment to food and agricultural assistance programs.
8 9		C. Provides foreign aid in the form of agricultural products and value-added agricultural products rather than cash, whenever feasible.
9 10		D. Encourage recipient nations to use or purchase U.S. agricultural goods and
11		services.
12		E. Gives emergency food relief needs the highest priority in foreign aid programs.
13		F. Does not stimulate production or distribution of farm commodities for export that
14		are in competition with the U.S.
15		G. Included P.L. 480 as an important part of a broader strategy for expanding U.S.
16		food aid.
17	14/0 00	
18 19	We op 1.	Any U.S. policies that restrict agricultural exports.
20	1. 2.	The subsidization of any direct foreign competition.
20	2. 3.	Use of the Precautionary Principle.
22	4.	Monetary policies that harm U.S. trade.
23	5.	Shipping restrictions that adversely affect agricultural products.
24		
25		
26		
27		73. USDA REPORTING AND OPERATIONS
28	14/	
29	We su	
30 31	1.	Continuance of the United States Department of Agriculture (USDA) as a cabinet level department.
32	2.	Efforts of the National Agricultural Statistics Service (NASS), the Illinois Agricultural
33	۷.	Statistics Service, and all other governmental agricultural agencies to transition from
34		survey-based data collection to fact-based data collection by using previously collected
35		data from said agencies and encourage members to provide their most accurate factual
36		data when requested for crop, livestock and other reports on a voluntary basis.
37	3.	The USDA improving the accuracy and timely release of national and international
38		statistics and maintain the confidentiality of individual farm reports.
39	4.	Legislation to reinstate public access of the Common Land Unit (CLU) data to Natural
40	_	Resources Conservation Service (NRCS) Data Gateway.
41	5.	Educational efforts to inform the American consumer that the USDA serves a variety of
42	c	consumer interests and not just those of the farm population.
43 44	6.	Locally-elected farmer county committees to administer and oversee USDA farm and agricultural credit programs.
45	7.	Maintaining the NRCS within the USDA.
46	8.	The USDA to adequately fund, staff, and train local offices to enhance farmer services.
47	9.	Maintaining the USDA's Agricultural Research Service (ARS) budget at levels no lower
48	0.	than the 2007 budget appropriation.
49	10.	Long-term funding of the USDA's Risk Management Agency (RMA).
50	11.	USDA plans to create a new soybean yield estimate model for the September crop report
51		that reflects the significant changes in soybean production models.
52	12.	The USDA including the number and origin of imported and destination of exported
53		livestock in monthly livestock reports.
54	13.	USDA efforts to enhance and expand electronic filing of USDA forms and dissemination of
55		information.
56		

1 2 3	14.	Upgrades of computer technology and appropriate software to allow the NRCS, Farm Service Agency (FSA), RMA, and NASS to utilize and share the same farm program enrollment and production information, provided appropriate privacy disclosures and
4 5 6	15.	safeguards are utilized. A thorough review, including local input, of any proposed closure of a local USDA or FSA office before a decision is made.
7 8	16.	NASS to regularly report data on the production and use of ethanol co-products used for livestock feed.
9 10	17.	Releasing USDA reports on grains during the morning mandated break to allow all market participants equal access to the information.
11 12 13 14		oppose the expansion of the locally-elected county committees by the addition of appointed nittee members.
15 16 17		74. GOVERNMENT CONSERVATION PROGRAMS
18		74. GOVERNMENT CONSERVATION PROGRAMS
19		support:
20 21	1.	Conservation programs with a focus on protecting environmentally sensitive areas with filter strips, buffers, and other beneficial practices while reducing overall program costs.
22 23 24	2. 3.	Legislation which ensures that both tenant and landlord interests will be fairly protected. Limitations on participation rates so as not to adversely affect local farmland rental rates.
25		FSA Programs
26		support:
27 28	1.	The continued funding of the Conservation Reserve Program (CRP) through current methods, plus private sources on contributions (e.g., conservation groups, hunting groups,
29		and environmental groups) to remove fragile lands from production.
30	2.	Basing the judging criteria for ("RP enrollment upon the land's erosion potential as
24		Basing the judging criteria for CRP enrollment upon the land's erosion potential as
31 32		cropland and not on its current erosion status.
32	3.	cropland and not on its current erosion status. An expansion of the continuous sign up CRP acreage to include:
32 33		cropland and not on its current erosion status. An expansion of the continuous sign up CRP acreage to include: A. Filter strips along waterways.
32		cropland and not on its current erosion status. An expansion of the continuous sign up CRP acreage to include:

1		payment amount within 30 days of its due date or is forced by budget constraints to					
2		reduce the annual payment amount as set forth in the CRP contract. If the farmer opts out					
3	-	of the CRP all past due monies will be paid with accrued interest.					
4	8.	Continuation of CRP on fragile and environmentally sensitive lands formerly enrolled in					
5		CRP if the CRP is not continued at current levels. Qualified land areas should be					
6		determined by county Soil and Water Conservation Districts (SWCDs) and the Natural					
7		Resources Conservation Service (NRCS).					
8	9.	Encouraging the USDA to give adequate credit during CRP sign-ups for areas throughout					
9		the nation that experience wind erosion on sandy soils.					
10	10.	The broadening of criteria for enrollment or re-enrollment of land in CRP. Examples of the					
11		criteria include but are not limited to:					
12		A. Land with the highest Environmental Benefits Index (EBI).					
13		B. Land targeted based on type of CRP cover or conservation practice, with priority					
14		given to land in trees, alley cropping, or with special conservation attributes.					
15		C. Land targeted based on water quality, air quality, soil quality, and wildlife.					
16		D. Land that, if cultivated, would be most damaging to the environment. For example,					
17		land that would likely opt out of farm programs and conservation compliance due to					
18		high compliance costs.					
19	11.	The elimination of the Erodibility Index as an exclusionary consideration for concentrated					
20		CRP sign up.					
21	12.	Wildlife habitat improvement, especially on CRP acreage.					
22	13.	The Conservation Reserve Program's State Acres for Wildlife Enhancement (SAFE)					
23		practice that provides financial incentives to producers.					
24	14.	Recognition in the EBI that qualifying established cover practices on acreages being re-					
25		enrolled in the CRP provide certain benefits over destroying existing stands to plant					
26		preferred species.					
27	15.	The evaluation of all CRP property by the county NRCS office staff to ensure that					
28		previously recommended Best Management Practices (BMPs) have been maintained					
29		before the property can be re-enrolled in CRP.					
30	16.	Haying and grazing of CRP acres at the discretion of the Secretary of Agriculture in					
31		weather-related or other emergency situations in a timely manner.					
32	17.	Each state Farm Service Agency (FSA) office determining CRP rates and acreage					
33		qualifications as opposed to the national USDA office.					
34	18.	Increasing the enrollment of filter strips in the CRP and offering incentives for re-					
35		enrollment.					
36	19.	The continuation and expansion of the Conservation Reserve Enhancement Program					
37		(CREP) with full funding.					
38	20.	Any increase to national CRP acreage cap that prioritizes continuous sign up selection of					
39		most environmentally sensitive ground and limit acres for future sign up.					
40							
41	-	ppose:					
42	1.	Any effort to allow the public to automatically use or have access to private property that is					
43		enrolled in CRP.					
44	2.	Further changes in CRP which would allow conservation acreage to be brought back into					
45		permanent production before the ten-year contract expires.					
46	3.	The use of CRP land for biomass fuel production without a corresponding reduction in					
47		CRP payments.					
48							
49 50		Natural Resources Conservation Services (NRCS) Programs					
50	14/						
51		upport:					
52 52	1.	Allowing an exemption to the NRCS manual for Environmental Quality Incentives Program					
53		(EQIP) money to be used for streambank stabilization practices prior to the adjacent land's					
54 57		expiration in a Conservation Reserve Program (CRP) contract or a Conservation Reserve					
55 50		Enhancement Program (CREP) contract.					
56							

1 2 3	2.	The continuation and expansion of the EQIP and the Conservation Stewardship Program (CSP) with full funding, as long as these programs complement - but do not replace - programs in the new farm bill.
4 5	3.	Providing a clear explanation of the CSP that would create interest and help more farmers qualify for this program.
6 7		State of Illinois Programs
8 9	We su	pport the Illinois Department of Agriculture creating and implementing conservation
10		ms for Illinois farmers.
11		
12 13		
14		75. FARM CREDIT
15		
16	We su	
17	1.	The availability of adequate sources of credit for all agricultural interests.
18	2.	Agricultural lenders publicizing their rates and loan policies.
19 20	3.	Farm Service Agency (FSA) assistance to those borrowers who cannot obtain credit otherwise.
20	4.	Continued graduation of FSA borrowers who exhibit the ability to obtain credit from
22	т.	conventional sources and continue to work with FSA in developing improved and flexible
23		programs with more effective use of FSA funds.
24	5.	FSA in providing adequate levels and terms of credit in a constructive and responsible
25		manner.
26	6.	Reviewing and recommending appropriate FSA agency policy on loan term limits, loan
27	_	size limits, and interest rate subsidies.
28	7.	FSA loans be secured by adequate collateral and reasonable repayment capacity.
29 30	8.	The use of past business performance, when available, as a strong indicator of future performance when considering approval of an FSA loan for a farmer.
31	9.	The USDA improving all USDA loan programs to:
32	0.	A. Adopt an option to have pre-approval for a loan for six months.
33		B. Expand the eligibility requirements of the program.
34		C. Recognize the increasing cost of land and equipment when determining the cap of
35		the loan program.
36		D. Provide assistance in filling out the application.
37		E. Promote the programs through podcasts, trainings, and seminars.
38 39	10.	F. Review requirements to graduate a loan for beginning farmers. Educational programs for members and agricultural lenders on financial management and
40	10.	marketing programs.
41	11.	Lenders cooperating with federal and state programs designed to help farmers with
42		financial stress.
43	12.	Illinois Finance Authority's (IFA) current agricultural loan programs and will cooperate with
44		IFA in the expansion of existing programs and the development of new programs.
45	13.	Legislation so that persons who have made prepayments to failed licensees for production
46		inputs or services will receive a 100 percent refund of those payments, making the
47 48	14.	purchaser of the inputs first in line as a secured creditor. Increased funding for federal guaranteed farm loan programs. These programs should be
49	14.	made more user friendly for both bankers and farmers by allowing increased flexibility of
50		repayment terms and minimizing paperwork.
51	15.	Seeking legislation so alfalfa and grassland forages are considered farm storage facility
52		loan commodities.
53	16.	The Farm Credit System (FCS) remaining available to the farmer-owners through the
54	. –	cooperative system as an alternative to commercial banks.
55 56	17.	Commercial banks, the FCS, and other lenders seeking opportunities to cooperate in meeting the financing needs of farmers.

1 2	18.	Elimination of the "exit provision" in the Farm Credit Act.		
3		We oppose:		
4	1.	Any move by commercial banks and/or bankers to alter the structure of the FCS, including		
	1.			
5	~	attempts to replace farmers on boards of directors with commercial bankers.		
6	2.	Commercial banks having access to money procured by virtue of the agency status		
7		enjoyed by the FCS.		
8	3.	The sale of district FCS banks to commercial or private banking interests.		
9	4.	All efforts to limit access to credit by major credit suppliers or to limit competition or to		
10		artificially set interest rates by government edict.		
11				
12				
13				
14		76. GOVERNMENT ECONOMIC POLICIES		
15				
16	We si	upport:		
17	1.	Government policies designed to encourage economic stability, increased productivity,		
18	1.			
	0	and a greater ability to compete in the international market.		
19	2.	Using a federal budget surplus to reduce the federal debt and to cut taxes.		
20	3.	Federal policies bringing about lower real interest rates.		
21	4.	A reduction in the size of the federal government.		
22	5.	A constitutional amendment to require the federal government to operate on a balanced		
23		budget.		
24	6.	A constitutional amendment to restrict the spending authority of the federal government to		
25		a realistic percentage of the gross national product (GNP).		
26	7.	A requirement that federal and state government agencies return unspent money to their		
27		respective treasuries without a budget cut or penalty for the new fiscal year.		
28	8.	Legislation or a constitutional amendment to require the federal government to fund		
29		programs which it mandates on state or local governments.		
30	9.	A requirement that new programs be adopted only when existing programs are reduced or		
31		eliminated as a means to control government spending.		
32	10.	Requiring competitive bidding for any state or federal project.		
33	11.	Privatization of governmental services that could provide savings to the taxpayer and		
34		render government services more economical.		
35	12.	A sustained long-term monetary policy which will minimize inflation and deflation of prices.		
36	13.	An independent Board of Governors of the Federal Reserve System that includes		
37	10.	individuals with a working knowledge of agriculture.		
38	14.	A full and complete independent annual audit of all activities of the Federal Reserve		
39	14.	System.		
39 40	15.	Making the adoption of sound economic policies by the state and federal government a		
40 41	15.			
41	16	major priority.		
	16.	The inclusion of a citizenship question on the U.S. Census.		
43	14/			
44		ppose:		
45	1.	Awarding federal grant monies to citizen action groups.		
46	2.	Increased taxes unless accompanied by significant spending cuts. In such cases, the tax		
47	-	base should be broadened rather than increasing existing tax rates.		
48	3.	Efforts to shift programs "on budget" or "off budget" in order to mask the true economic		
49		condition of our nation.		
50	4.	The financing of gambling facilities through tax exempt industrial development bonds or		
51		state guaranteed loans.		
52	5.	The application and use of subjective ranking (e.g. ESG Environmental, Social and		
53		Governance scoring) for individuals, businesses or organizations as a means test to		
54		qualify for financing, participation at any level of commerce or freedom to make day-to-day		
55		decisions.		
56				

1 2		77. GOVERNMENT FARM POLICIES
2 3 4 5 6 7 8	enviro these obliga	elieve United States agriculture should be an integral part of the solution for hunger, energy, onment, food security, our balance of trade, and national security. In order to accomplish goals, the Farm Bill must address world competition, humanitarian need, and world trade ations. A stable, safe agricultural production system is essential to the United States' omy and national security.
9	To ac	complish this objective, we believe:
10	1.	Consumers should have a reliable, abundant, safe, and nutritious food supply.
11 12	2. 3.	In enhancing U.S. agriculture's competitiveness in the world market. In minimizing world hunger and nutrition deficiencies.
13	4.	In creating a long-term, competitive, desirable agricultural growth industry.
14	5.	In improving the quality of rural life by increasing rural economic development.
15 16	6. 7.	In providing revenue protection to farmers thus protecting net farm income.
16 17	7. 8.	The market should give accurate economic signals to consumers and farmers. There should be less reliance on government and more on the market.
18 19	9.	Improvements to the environment can be achieved through expanded soil conservation, water and air quality initiatives, and advanced technological procedures that are science-
20 21	10.	based and are economically feasible. Farmers should be compensated for their positive impact on habitat, wildlife, and the
21	10.	environment.
23	11.	Stable funding should be provided for USDA AgrAbility Programs.
24 25 26	12.	In retaining base acres on any farm participating in a renewable energy project and treating them the same as CRP base acres.
27	We o	ppose:
28	1.	Severing the essential link between the nutrition title and the commodity title of the Farm
29	0	Bill.
30 31	2.	Any type of government supply control or acreage reduction program, with the exception of conservation programs.
32	3.	A Farmer Owned Reserve for agricultural commodities.
33	4.	The extension of Commodity Credit Corporation (CCC) commodity loans beyond the
34		current nine-month term.
35	5.	The use of Environmental, Social, and Governance (ESG) scoring or any other subjective
36 37		scoring method if it pertains to any farm policies or any future Farm Bill programs.
38	We s	upport:
39	1.	Appropriate income assistance until reforms in taxation, regulation, and market access
40	6	and growth are achieved.
41 42	2. 3.	Maintaining the sanctity of contracts established in the Farm Bill.
42 43	J.	Allowing tenants with multiple landlords to treat each farm as a separate entity for compliance with the Farm Bill.
44	4.	Not holding tenants responsible for landlord's actions of farm program payments and
45		eligibility. This should hold steady as long as the tenant had no involvement in what took
46		place. The farm in question should go through the hearing process but other farms should
47		not be affected. Actions by a landlord should not place any tenant farm program payments
48 49	5.	in jeopardy. The tenant should be able to maintain eligibility for all farms. The ability of landlords to refuse payment from the farm program and allow tenants the
49 50	0.	ability to obtain complete payment from the farm program (even if a combination lease
51		exists between the landlord and tenant).
52	6.	The elimination of any United States Department of Agriculture (USDA) requirement to
53		report the specific cash rental amounts outlined in lease agreements between a landlord
54 55		and a tenant in an effort to protect a farmer's right to privacy. We do, however, support the requirement to report the type of lease agreement.
55 56		requirement to report the type of lease agreement.

1	7.	Strengthening the criteria for non-landowner persons eligible for farm program payments	
2		by requiring a significant contribution of active personal management in the farm decision-	
3		making process and labor in the farming operation. The current exemption for crop share	
4		landowners should be continued.	
5	8.	Farmers ability to improve existing drainage systems without being penalized. Land that	
6		has been in production, including pasture, should be exempt from the sodbuster and	
7 8	0	swampbuster provisions.	
9	9.	The implementation of more efficient processes, systems, and procedures in order to consolidate and simplify farm program participant visits to the USDA.	
10	10.	Using common dates between Risk Management Agency (RMA) and Farm Service	
11	10.	Agency (FSA) for acreage reporting deadlines.	
12	11.	Consolidation of the power of attorney form to enable the Natural Resources Conservation	
13		Service (NRCS) and Farm Service Agency (FSA) to honor the same power of attorney	
14		forms.	
15	12.	Open enrollment of land in the farm program that was not previously in the program and	
16		has changed tenancy or ownership during the duration of the Farm Bill.	
17	13.	Government agencies serving farmers by adjusting hours to accommodate the needs of	
18		farmers with off-farm employment and increased use of internet for electronic filing.	
19 20	14.	Requiring USDA to complete evaluation within 10 business days on requests to clear	
20 21		fence rows and/or timber on land. If after 10 business days the evaluation is not complete, USDA forfeits the right to object and/or penalize.	
22	15.	The means to implement and administer programs being in place prior to starting dates for	
23	10.	new programs.	
24	16.	Adding alfalfa and grassland forages as covered commodities.	
25	17.	Requirement changes to the Conservation Stewardship Program (CSP) that would allow	
26		government owned land into the program if it is leased by a farmer for the duration of the	
27		contract period.	
28	18.	Allowing a compliant entity to be eligible to participate in USDA programs on all parcels	
29		that are not in violation of swampbuster or sodbuster regulations.	
30	19.	Eliminating the requirement for reporting non-program grass waterways/fallow areas that	
31 32		are baled for forage. If eliminating the forage reporting on non-program acres is	
32 33		unachievable, we support reporting acres only at the time when the principal field crop is reported.	
34	20.	A commodity loan program.	
35	21.	Raising loan rates above levels established in the 2008 Farm Bill for current program	
36		commodities and loan repayments be credited back to CCC to maintain budget neutrality.	
37	22.	Payments or programs that compensate farmers for activities deemed socially or	
38		environmentally beneficial.	
39	23.	Encouraging production and stewardship decisions that will attract public support.	
40	24.	Allowing farms that have not been participating in farm programs and are not eligible to	
41	25	receive program benefits to establish a base and enroll in future farm programs.	
42 43	25. 26.	The continuation of and funding for Biomass Crop Assistance Program (BCAP). Livestock Disaster and Emergency Program provisions.	
43 44	20. 27.	Individual farm program payments for any actively engaged farmer regardless of the	
45	21.	farm's organizational structure.	
46	28.	Farm program payments based on units of production (i.e., acres, bushels, head, pound,	
47		etc.) regardless of farm size, business organization, or management structure as the	
48		fairest and most equitable means of distributing payments to farmers.	
49			
50		Future Farm Policy	
51			
52 52		embers believe the Farm Bill must be WTO-compliant, provide price and revenue protection	
53 54		mers, and link nutrition and commodity programs. Crop insurance remains our top priority in	
54 55		arm Bill. The bill must continue to feature commodity programs and encourage production tewardship decisions that attract public support. We support robust conservation programs	
55 56	that will help farmers achieve state nutrient loss reduction goals.		
00	that w	in help laintere denieve elate nationt leee readellen gedie.	

1		Crop Insurance	
2	We support:		
3	1.	Creating a local or state farmer committee oversight and appeals process for RMA	
4		decisions on overspray and planting dates.	
5	2.	Creating a state or county committee to provide oversight and appeals process for RMA	
6		decisions that adversely impact crop insurance policy holders.	
7	3.	A producer who elects to include a Harvest Price Option (HPO) should be able to receive	
8		the harvest price if it is higher on prevented plant acres.	
9			
10		Farm Programs	
11	We su	pport:	
12	1.	Allowing producers to update base acres and yields.	
13	2.	Allowing producers or landowners who are subject to a new or previous farm	
14		reconstitution to either combine farms or maintain an individual farm number.	
15	3.	Inflation-adjusted farm program payment limits.	
16	4.	Increased commodity loan rates.	
17	5.	Maintaining Supplemental Nutrition Assistance Program (SNAP) and The Emergency	
18		Food Assistance Program (TEFAP) in the Farm Bill.	
19			
20		Dairy Programs	
21	We su	pport:	
22	1.	Risk management programs that address negative price differentials.	
23	2.	Changing or eliminating state-by-state adjustment factors in Dairy Revenue Protection	
24		(Dairy-RP) that greatly limited support to producers.	
25	3.	Improving the accuracy of Dairy Margin Coverage (DMC) feed price component.	
26	4.	Providing National Agricultural Statistics Service (NASS) sufficient resources so it can	
27		more accurately estimate alfalfa prices.	
28			
29		Disaster Assistance	
30	We su		
31	1.	Maintaining programs for animal disease prevention and management.	
32	2.	Federal government spending that protects agricultural production and processing from	
33		cyber-attacks.	
34			
35		pose creation of a permanent disaster program that would jeopardize a robust crop	
36	insurar	nce program and create public relations problems for agriculture.	
37			
38		Conservation Programs	
39	We su		
40	1.	Creation of a per-acre cover crop discount on crop insurance premiums that also rewards	
41	0	early adopters.	
42	2.	A 5-year CRP contract.	
43	3.	A flexible, renewable one-year program that pays producers rates similar to CRP that	
44		incentivizes specified nutrient loss reduction or management practices on working ground	
45		or land currently in production with an emphasis on improving water quality.	
46	4.	Incentives for farmers who use cover crops by giving them credit for sequestering carbon.	
47	5.	Creation of a water quality credit for producers.	
48	6.	Publicly funded university research on soil carbon.	
49	7.	Using CSP to reward producers for practices they have already adopted and give more	
50	0	points for maintaining practices over time.	
51	8.	Addressing the shortage of conservation engineers to approve projects.	
52	9.	Providing additional flexibility for harvesting cover crops for feed during normal conditions,	
53 54		not just for prevent plant.	
54 55			
55 56			
56			

1		Solar Energy	
2	We support a federal (USDA or Department of Energy) program to incentivize solar panel		
3	installations on farm buildings and bins.		
4	motane		
5			
6			
7		78. LABOR	
8			
9	We su	nnort:	
10	1.	A proactive and positive effort to pursue a dialogue with organized labor to identify	
11	1.	common ground and common goals to achieve a common good and improve farm	
12		profitability.	
13	2.	The effective and prompt administration of existing laws to resolve secondary boycotts or	
13	۷.	other illegal actions which disrupt the orderly flow of commerce.	
	3.	Maintaining the agriculture exemption for overtime pay provisions under the Illinois	
15	з.		
16 17	4	Minimum Wage Law.	
	4.	A study by the appropriate state agencies regarding the programs and activities of	
18		federally funded Legal Services Corporation entities in Illinois. Such a study would review	
19	_	the impact of such programs on agricultural operations.	
20	5.	American Farm Bureau Federation (AFBF) efforts in lobbying Congress to investigate the	
21	0	Legal Service Corporation's behavior and scrutinize its budget.	
22	6.	The minimum wage rate at its current level.	
23	7.	Establishing improved programs for agricultural guest workers that assist in finding,	
24	0	retaining, and maintaining an adequate, legal, and cost-competitive labor supply.	
25	8.	Permanent employment-based immigration visas for those individuals who have a	
26		demonstrated work history and can pass an appropriate background screening.	
27			
28	We op		
29	1.	The use, by either labor or management, of force, coercion, intimidation, secondary	
30	~	boycotts or other such means designed to force its will upon the other.	
31	2.	Lawsuits which are filed against agricultural growers by Legal Services Corporation	
32		entities which create economic hardship for the agricultural operations involved and	
33		appear to be intended only to harass the employer of farm labor into providing additional	
34	-	benefits without justification.	
35	3.	All legislation which increases the revenue base for legal assistance activities in the State	
36		of Illinois.	
37	4.	Legislation that would require state licensure and inspection for electrical work performed	
38	_	on agricultural property and single-family residences.	
39	5.	The elimination of the present family farm exemption in the child labor provisions of the	
40	_	Fair Labor Standards Act (FLSA).	
41	6.	Amnesty (as defined as a general pardon for offenses against the laws of the United	
42		States of America) for undocumented immigrants.	
43			
44		H-2A Work Program	
45	We su		
46	1.	Protection of the guest worker program to preserve the labor force required for farms.	
47	2.	Improvements to the guest worker program to help farms be profitable and operational for	
48		future generations by offering farms the ability to retain skilled labor and recruit workers to	
49	_	meet their farms' specialized needs.	
50	3.	Recruitment of repeat, qualified workforce for efficiency in working on a host farm.	
51	4.	Staggered dates of entry for the guest worker program.	
52	5.	Expanded accessibility to the H-2A guest worker program for other types of farming	
53		operations beyond specialty crops and dairy.	
54	6.	Employer specific visas.	
55	7.	Farmer and worker shared expenses of the guest worker program visas, transportation	
56		and related expenses.	

1	8.	Withholding of state and federal payroll taxes from guest worker wages.
2	9.	Streamlined administrative and application processes to apply for and utilize the guest
3		worker program, with quicker and easier renewal from year to year if a farm has no
4		changes from the previous year.
5	10.	Administration and oversight of the H-2A guest worker program within the United States
6		Department of Agriculture (USDA).
7		
8	We o	ppose:
9	1.	Department of Labor's (DOL) administration of the H-2A guest worker program.
10	2.	Increased state minimum wage and adverse effect wage requirements.
11	3.	Increased administrative expenses of the guest worker program.
12	4.	Administrative steps and paperwork that slow down the hiring process.
13		
14		
15		
16		79. RISK MANAGEMENT/CROP INSURANCE
17		
18	We e	ncourage continued farmer education of risk management alternatives, efforts to refine
19		ng risk management tools, and the development of new crop insurance and other risk
20		gement tools.
21	mana	
22		Risk Management
23	We si	upport:
24	1.	Providing leadership in seeking new ways for farmers to manage risk through the private
25		sector.
26	2.	The use of pilot programs that would serve to assist farmers in learning to utilize various
27		risk management tools for all products, including livestock. Farmers willing to participate in
28		the pilot program should be allowed to choose from a variety of approved risk
29		management methods designed to substantially manage the risk of the farming operation.
30		The cost of implementing the chosen risk management method should be subsidized
31		during the pilot program.
32	3.	Education programs that provide risk assessment and risk management as well as
33	0.	professional education for farmers in marketing, financial management, and government
34		regulations.
35	4.	The necessary legislative and regulatory changes to establish a Farmer Investment
36	ч.	Savings Account into which a farmer could contribute pre-tax dollars for self-insurance and
37		be allowed to make withdrawals at the contributor's discretion.
38	5.	Fully funding the Standard Reinsurance Agreement at the levels outlined in the 2014 Farm
39	5.	Bill.
40		
41		Crop Insurance
42		
43	Wesi	upport a crop insurance program which:
44	1.	Provides payments for actual losses, including losses incurred from delayed or prevented
45		plantings, arising from natural causes.
46	2.	Requires consistent interpretation and implementation of all federal crop insurance
47		provisions, especially Prevent Plant provisions.
48	3.	Provides coverage that is written and losses paid on the basis of dollars per acre rather
49	0.	than based on a guaranteed level of production.
50	4.	Is offered and serviced through private companies, willing and able to assume some level
51		of risk, as opposed to Farm Service Agency offices.
52	5.	Can be affordably reinsured through the federal government.
53	6.	Eliminates federally mandated requirements in order to be eligible to participate in the
54	0.	federal farm programs.
55	7.	Allows the Secretary of Agriculture the right to extend the planting deadline for crop
56		insurance purposes for untimely plantings due to weather delays.
		meanance parpoood of antimory plantinge and to mouthor dolugor

1	8.	Allows farmers and/or landlords to opt out of crop insurance coverage, but in so doing
2		would not be eligible for federal disaster payments on crop losses.
3	9.	Requires that the individual county final yield averages needed for Area Risk Protection
4 5		Insurance policies be released one month prior to the deadline for the crop insurance sales closing date for the federal crop insurance program. This date should be uniform for
6		all regions involved in the program.
7	10.	Allows individual units to be insured on a Farm Service Agency (FSA) optional unit basis.
8	11.	Requires all United States Department of Agriculture (USDA) agencies accepting
9 10		production data, including acreage and yield data that has been certified, to reconcile the data in order to streamline the reporting process and reduce the potential for fraud and
11		abuse.
12	12.	Requires the automatic extension of the Risk Management Agency (RMA) acreage
13		reporting deadline in the event the FSA certification deadline is extended. The extension
14 15	13.	of the deadlines should maintain the existing time period between the deadlines. Promotes the use of Soil Productivity, derived from existing County Natural Resources
16	10.	Conservation Service (NRCS) Soil Surveys, as a guide for establishing base T yields for
17		Federal Crop Insurance.
18	14.	Utilize pricing data for insurable crops during multiple months throughout the growing
19 20		season in order to establish a revenue guarantee for revenue-based crop insurance policies.
21	15.	Maintains both a fall pricing and spring pricing option for revenue policies.
22	16.	Studies the elimination of Catastrophic (CAT) coverage and applying those subsidy dollars
23	47	to higher coverage levels.
24 25	17.	Allows Written Agreements, once granted, to remain effective until loss ratios dictate otherwise.
26	18.	Achieves actuarial soundness by crop, county and state by devoting additional resources
27		to allow annual review of RMA rates for all crops in all states, with priority given to:
28		A. Adjusting insurance rates to completely and expeditiously reflect mandated loss
29 30		<ul><li>ratios.</li><li>B. Full implementation of rate reductions for states with consistently low loss ratios.</li></ul>
31		C. Including non-insured ground in production review in order to receive the most
32		accurate assessment possible of each county's production capacity.
33	19.	Devotes additional research dollars to improve existing policies to develop new insurance
34	00	tools and foster the development of new and innovative delivery systems.
35 36	20.	Requires clear delineation during the sales process and the billing process to clearly distinguish between federal crop insurance policies and private company add-on products.
37	21.	Separates basic or enterprise units by practice - for example - initial- or double-crop
38		soybeans, where a claim calculation of one practice has no effect on the other practices
39		and the lengthening of planting dates to better reflect variety maturity, growing season
40		length, Land Grant University or processor recommendations, geographic areas, and
41 42	22.	weather conditions. Allows double-cropped feedgrains to be insured as a separate unit if best management
43	22.	practices are followed.
44	23.	Allows the use of all elevator quality factors conducted by certified graders using certified
45		testing equipment. These factors include moisture, foreign material, test weight and
46	0.4	damage.
47 48	24. 25.	Offers replant benefits that accurately reflect actual cost of replanting the damaged crop. Allows farmers and landlords to receive replant benefits reflective of their share of the
40	20.	expenses to replant the damaged crop, regardless of the crop insurance company or type
50		of crop insurance policy they or the landlord/tenant have.
51	26.	Requires RMA claim guidelines to take into consideration economic justification when Best
52		Management Practices are used to determine treatment thresholds and timeliness of
53 54	27.	applications. Allows crop insurance agents to be involved in the claims process to provide enhanced
54 55	21.	and seamless service to farmers.
56	28.	Collects premiums for spring-planted crops no earlier than December first.

1 2	29.	Allows beginning farmers to use county yield estimates instead of the calculated T-yield when establishing yields for federal crop insurance.
3	30.	More closely matches RMA's discount schedules to typical grain industry discount
4	50.	schedules.
5	31.	Works with USDA RMA to update Multi-Peril Crop Insurance soybean earliest plant dates.
6	51.	works with 05DA KMA to update multi-reni Grop insurance soybean earliest plant dates.
0 7		
8		
9		80. SOCIAL SECURITY
10		00. SOCIAL SECONT
10	We su	pport:
12	1.	Studies and pilot programs testing the feasibility of private sector alternatives to Social
13	1.	Security as a means to devise long-term solutions to maintain the solvency of the Social
14		Security trust fund and to ensure retirement benefits for all Americans.
15	2.	Stabilizing benefits rather than increasing Social Security taxes.
16	3.	Continued separate deductions for Social Security taxes to make them clearly identifiable.
17	4.	Correction of the inequity in the method of determining earnings of self-employed persons
18	ч.	subject to Social Security taxes when a substantial portion of the earnings are related to a
19		return on investment in business property. A rent equivalent should be made an allowable
20		deduction from earnings for this purpose.
21	5.	Allowing self-employed persons to deduct their Social Security taxes as a business
22	0.	expense.
23	6.	Repeal of the Social Security offset law.
24	0.	
25	We op	DOSE:
26	1.	Regulations which classify Conservation Reserve Program payments to Social Security
27		recipients as earned income. They should be considered as rent.
28	2.	Social Security payments to alien workers who reside outside the U.S. or its territories.
29	3.	The use of a total farm payroll test to determine if wages are subject to Social Security
30		taxes.
31	4.	Using Social Security funds for purposes other than Social Security.
32		
33		
34		
35		81. COMMUNICATION AND PUBLIC IMAGE
36		
37	We wil	I be a leading voice for Illinois agriculture.
38		
39	We su	
40	1.	Programs to improve the visibility and contributions of IAA and of county Farm Bureaus.
41	2.	Creating public relations programs and promoting to news outlets a favorable view of
42	-	farmers and agriculture while actively monitoring public opinion toward agriculture.
43	3.	Centralized, up-to-date information so that members can respond to issues of public
44		concern.
45	4.	Web-based resources to help county Farm Bureaus respond quickly and consistently to
46	-	local issues.
47	5.	Programs that help non-farmer members understand and support IFB's goals and
48	c	objectives.
49 50	6.	The use of scientific names by the media, governmental agencies and healthcare
50 51	7	professionals in referring to viruses and diseases.
51 52	7.	News reporting that balances benefits with possible risks to both agriculture and consumers.
52 53	8.	Challenging individuals and organizations that misrepresent scientific evidence and harm
53 54	0.	farmers' financial well-being or their credibility.
55	9.	Encouraging agribusinesses, through their advertising, to present a positive and
56	5.	professional image of farmers and agriculture.

1 2 3 4 5 6 7 8 9 10	10. 11. 12. 13. 14.	Encouraging companies that provide animal feed, shelter and health products to advertise the positive aspects of animal production in addition to their products. The work of non-profit agricultural organizations whose mission is to improve the image of agriculture and to confront negative messages. County Farm Bureau partnerships with other farm organizations to improve public understanding of agriculture. The training of farmer spokespersons to convey a knowledgeable and professional message in response to all media requests especially those of a national platform on agriculture. County Farm Bureaus using the County Farm Bureau Certified Director Program.
11 12 13 14 15		82. FARM BUREAU RELATIONSHIP WITH AFFILIATED COMPANIES
16 17 18	We b were	elieve that Farm Bureau members are the foundation upon which all affiliated companies built.
19	We s	upport:
20 21 22	1.	County Farm Bureaus maintaining and improving working relationships with affiliated company boards of directors and management through interlocking board members and other means.
23 24 25	2.	Holding periodic affiliated company and Farm Bureau joint board meetings on both the state and county level and to hold regular county Farm Bureau and affiliated company joint staff meetings.
26 27 28 29 30 31 32	3.	Affiliated companies to consult with the Illinois Agricultural Association (IAA) and county Farm Bureaus before initiating major changes in products, services, policies, and operating procedures that impact the Farm Bureau organizations or Farm Bureau members.
33 34		83. GOVERNMENT REGULATIONS
35	We s	upport:
36	1.	Regulations to protect the public health, safety and welfare, provided:
37 38		A. The regulations are based upon scientific data which has been subject to replication and peer review.
39		B. The costs as well as the benefits of the regulations have been carefully weighed.
40		C. The regulations have been subject to independent analysis and public scrutiny.
40		D. Alternatives to regulation have been considered, especially the provision of market-
42		based incentives.
43		E. The regulations respect the practicalities of doing business in the industry being
43 44		regulated.
44 45	2.	Cooperating with American Farm Bureau Federation (AFBF), on the regulatory process to
43 46	۷.	better protect agriculture's interest during rule-making.
40 47	3.	Requiring the U.S. Environmental Protection Agency (USEPA) to collaborate with the U.S.
48	5.	Department of Agriculture (USDA) in developing regulations impacting agriculture.
48 49	4.	Member involvement in the regulatory process by responding during comment periods.
49 50	4. 5.	The review of all state and national regulation to ensure legislative intent is being followed.
50 51	5. 6.	Legislation to reduce and eliminate duplicative services, programs, and burdensome
52	0.	
52 53		government regulations.
	11/0 0	process establishing low through Executive Orders that size was Congress, do not allow for
54 55		ppose establishing law through Executive Orders that circumvent Congress, do not allow for
		c review and input, exceed constitutional and statutory guidelines, or impose significant
56	econ	omic impact on citizens, businesses, and local or state governments.

1 2	84. INVOLVEMENT OF MEMBERS IN FARM BUREAU		
2 3 4 5 6 7	We believe the county Farm Bureaus are the strength of the Illinois Agricultural Association (IAA). We recognize that county Farm Bureaus are important to the individual members, and it is these individual members that become the most integral parts of the IAA. The support and direction of the individual members are of utmost importance to the organization.		
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	<ol> <li>We support:</li> <li>Active involvement of men and women of all ages in the committee structure on the state and county level.</li> <li>County and state member programs to enhance the value of Farm Bureau membership.</li> <li>County Farm Bureaus to appoint at least one member of the Women's, Promotion and Education, and Young Farmer/Young Leader Committees to serve on county Farm Bureau standing committees. The representatives of each county committee should meet regularly with their Board of Directors.</li> <li>County Farm Bureaus to present opportunities for active members to gain the background and experience necessary to be effective leaders.</li> <li>Young Farmer/Young Leader Committee as an important part in assuring the maximum opportunity for young farmers to participate in Farm Bureau programs.</li> <li>Counties following the American Farm Bureau Federation (AFBF) Young Farmer and Rancher program age limits so that county Young Farmer and Young Leader Committees will be eligible for the Illinois Farm Bureau (IFB) Young Leader and AFBF Young Farmer and Rancher programs.</li> </ol>		
25 26 27 28	85. LEGISLATIVE AND AGRICULTURAL LEADERSHIP		
29 30 31 32 33 34 35 36	<ol> <li>We will:         <ol> <li>Take aggressive positions in the development of legislation and regulations.</li> <li>Involve county Farm Bureau leaders and members in the legislative and regulatory process.</li> <li>Involve various groups and organizations in the development of such legislation and regulations when there is common interest in order to find the best solutions to the complex problems facing us.</li> </ol> </li> <li>Cooperate with county Farm Bureaus in developing and implementing programs to</li> </ol>		
37 38 39 40 41 42	<ul><li>familiarize legislators with rural problems and concerns and to familiarize rural leaders with urban problems and concerns.</li><li>We urge the American Farm Bureau Federation (AFBF) and the Illinois Agricultural Association (IAA) to take a leadership role in working with groups and organizations with common goals to help develop a common policy position on national legislation and regulations.</li></ul>		
43 44 45 46 47	86. POLITICAL INVOLVEMENT		
48 49 50 51 52 53 54 55 56	<ol> <li>We support:</li> <li>A person's right to individually or collectively contribute time and money to candidates of his or her choice.</li> <li>The participation in the political process, both as individual citizens and members of the Illinois Agricultural Association (IAA).</li> <li>Equal access to government for all citizens regardless of political engagement.</li> <li>The expansion of political involvement programs to promote Farm Bureau policy by aiding and promoting candidates for public office who, through their actions, have supported the goals and purposes of the IAA.</li> </ol>		

1 2	87. UNIFORM COOPERATIVE AGREEMENT			
3 4 5 6 7 8	We urge county Farm Bureau boards of directors to review annually the Uniform Cooperative Agreement between the county Farm Bureaus and the Illinois Agricultural Association (IAA). Attention should be given to the need for counties and the IAA Board of Directors to support policy positions once adopted by the IAA delegates.			
9 10		88. 9-1-1 TELEPHONE SYSTEM		
11				
12	We su			
13	1.	The enhanced 9-1-1 telephone system.		
14 15	2.	Providing input into the implementation of the local system.		
15 16	3. 4.	All funding intended for 9-1-1 systems should carry through to those facilities. Increasing the 9-1-1 surcharge on cell phones to adequately support the 9-1-1 telephone		
17 18 19	5.	system. Requiring the State of Illinois to forward 9-1-1 fees to the 9-1-1 operating systems within 30 days of receiving such fees.		
20 21				
22 23		89. FARM SAFETY		
23 24		09. FARM SAFETT		
25	We su	pport:		
26	1.	Encouraging all county Farm Bureaus to develop and maintain an aggressive farm safety		
27		education program to help protect our current and future generations. It is important that		
28		youth receive age appropriate training in farm safety.		
29	2.	Working to enhance the safety of farmers by encouraging them to use and, when		
30		necessary, replace safety lighting, markings, and reflective devices that are of extreme		
31		importance when used on farm machinery.		
32	3.	Encouraging the use and placement of reflective material and safety lighting on farm		
33		equipment that conforms with the American Society of Agricultural and Biological		
34		Engineers (ASABE) marking standards.		
35	4.	Encouraging all county Farm Bureaus to work with local farmers, elevators, and		
36		emergency response personnel to provide adequate grain safety training. Training should		
37		include information pertaining to safe grain handling as well as grain emergencies.		
38				
39				
40				
41		90. FOOD LABELING		
42	14/5 -	an art		
43	We su			
44 45	1.	Promotion of increased use of nutritional information on food labels.		
45 46	2. 3.	Proper labeling of foods, fibers, and other agricultural products. Including information on the source of protein (animal or plant-based) on labels.		
40 47	3. 4.	Establishing criteria for a certification process and corresponding legislation for country of		
48	4.	origin labeling. The process should support farmer self-certification of origin of livestock;		
49		operate under a presumption of domestic origin; and not be financially burdensome to		
<del>5</del> 0		farmers in establishing record keeping criteria.		
51	5.	Enactment of a similar labeling law in the United States like other nations to separate		
52	0.	different classes of beverages to specify milk as a product of an animal's mammary gland.		
53	6.	Development of a "U.S. Product" label for products that are originated, produced, and		
54	0.	processed in the U.S.		
55	7.	A voluntary labeling and/or traceability system for identity-preserved agricultural and food		
56		products that is based on a clear and factual certification process in order to ensure the		

1		health, safety, and integrity of the product, and enhance the ability of the farmer to capture
2 3	8.	a value-added return. Voluntary labeling of biotech or non-biotech products when an approved certification
4 5		process is in place including: A. The development of a consumer-friendly icon or label indicating presence of
6		genetically modified materials in food.
7 8		<ul> <li>Positive labeling of biotech products that is science-based, truthful, and not misleading.</li> </ul>
9 10	9.	The science-based labeling policies of U.S. Food and Drug Administration (FDA), including:
11		A. No special labeling unless a food is significantly different than its traditional
12		counterpart, or where a specific constituent is altered (e.g., nutritionally or when
13		affecting allergenicity).
14		B. Voluntary labeling using statements which are truthful and not misleading.
15 16	10.	Vigorous enforcement of FDA food labeling guidelines for domestic and imported products.
17	11.	Enforcement of federal statute that specifies commodities at a farmer's market in Illinois
18		must disclose the address of the farm where each product is produced.
19	12.	The definition of meat to include only animal flesh produced by the natural growth of living
20	4.0	animals.
21	13.	The requirement of the country of origin label for honey be placed on the front of all
22 23	14.	packaging in a readable font size. Sweeteners (blended with honey) disclose the addition of other sweeteners on the front of
23 24	14.	the package in a readable font size.
25	15.	Products can only be labeled as honey if it meets the FDA definition of honey as a "thick,
26	101	sweet, syrupy substance that bees make as food from the nectar of plants or secretions of
27		living parts of plants and store in honeycombs".
28		
29	We op	opose:
30	1.	Negative labeling of food products as being derived from the use of biotechnology.
31	2.	Labels that state or imply organic food is superior to traditional agri-food products or that
32	0	imply negative consequences of consuming non-organic foods over organic products.
33 34	3.	The use of "all natural" and "GMO free" synonymously with "organic" as a way to avoid
34 35	4.	farmer certification as an organic grower. Animal products that are raised in other countries but processed or blended in the USA
36	4.	using the label "Product of the USA" or similar labels.
37		
38		
39		
40		91. FOOD QUALITY PROTECTION ACT
41		
42		review and implementation of the Food Quality Protection Act (FQPA), as originally
43		led, the U.S. Environmental Protection Agency (EPA) must:
44	1.	Commit to use science, as intended by Congress, in fulfilling the FQPA mandate.
45 46	2. 3.	Establish a fair and transparent decision-making process.
46 47	з.	End the practice of using unduly conservative end points, safety factors, and default assumptions.
48	4.	Give higher priority to making scientific decisions rather than completing final tolerance
49	ч.	reassessments by statutory deadlines. Sound science requires good data and valid
50		methodologies, which require time to develop.
51	5.	Avoid removing uses that pose theoretical risk based on unreasonable, worst case
52		assumptions.
53	6.	Abandon the idea of wholesale revocation of tolerances for the organophosphate
54		insecticides.
55	7.	Develop proposed policies and methods for risk allocation and submit them for public
56		notice and comment review.

1 2	8.	Redress the current resource imbalance between tolerance reassessment and new chemical/new use registration and accelerate the pace of making decisions on new
3		products and uses.
4	9.	In the event of registration cancellation, allow time for pesticide users to make a
5	5.	reasonable transition to alternative products.
6		
7		
8		
9		92. FOOD SAFETY
10		32.1000 SALETT
11	We si	ipport:
12	1.	Implementing a communications strategy on food safety issues to provide accurate
13		information to the media, to educate the public, and to raise public awareness of the
14		actions farmers are taking to produce a plentiful, high-quality supply of food at fair prices.
15	2.	Measures to improve food inspection and safety through the United States Department of
16	2.	Agriculture (USDA) Inspection Service to assure consumers of a safe food supply. These
17		measures should reinforce consumer confidence while being cost effective.
18	3.	Protection of our food supply by requiring that imported food products be subjected to the
19	0.	same high safety standards and testing as food produced in the United States.
20	4.	Consumer education through labeling regarding safe cooking and storage procedures.
21	5.	National uniformity in pesticide residue standards. Consideration should be given to the
22	-	benefits of crop protection products.
23	6.	The concept of negligible risk rather than zero tolerance.
24	7.	Cooperative efforts with food processors, chemical companies, governmental agencies,
25		scientists and others who are responsible for the food supply of our nation to provide
26		factual information on the safety of our food supply.
27	8.	Open communication, not confrontation, with responsible environmental groups.
28	9.	The use of modern technology in the processing and handling of food to assure food
29		safety and promote consumer confidence in the food supply.
30	10.	USDA as the federal agency responsible for food inspection and safety.
31	11.	National (USDA) and state food inspection programs that guarantee adequate inspectors
32		and funding for businesses in both domestic and imported food products.
33	12.	The establishment of a USDA-approval process for state-inspected slaughter and
34		processing plants that allows them to ship interstate.
35	13.	Immediate and longer-term actions by USDA and the Department of Homeland Security
36		(DHS) to raise the priority of, and resources devoted to, federal safety and inspection
37		services, including: the Food Safety Inspection Service (FSIS), Animal and Plant Health
38		Inspection Service (APHIS), and the Foreign Agriculture Service (FAS).
39	14.	The establishment of voluntary guidelines which minimize microbial food safety hazards
40		for fresh fruits and vegetables. The guidelines should:
41		A. Be based on science.
42		B. Remain generic in nature, not commodity specific, to accommodate the diversity of
43		the fresh fruit and vegetable industry.
44		C. Be implemented in a manner that does not impede our ability to export.
45		
46		
47 48		
		93. HEALTH CARE
49 50		Bural Haalth Care Quality and Assassibility
50		Rural Health Care Quality and Accessibility
51 52	1.	ipport: Increasing awareness of the health care resources available to rural populations.
52 53	1. 2.	Providing additional health care resources where needed.
53 54	2. 3.	Efforts to direct state funding to medical schools to train additional qualified physicians
55	5.	who will practice medicine in rural areas.
56		

1	4.	Residency programs to provide post-graduate physician and primary care training away
2	_	from major metropolitan-based medical training centers.
3 4	5.	Programs and incentives to encourage doctors, nurses, and other health care professionals to practice in rural Illinois.
5	6.	The development and implementation of programs to assess rural hospital programs, rural
6	0.	health care facilities, and alternative methods of delivering rural health care.
7	7.	Efforts to develop mobile medical equipment and facilities to bring basic health care
8	-	services to rural areas of the state.
9	8.	Adequate ambulance service in all rural areas.
10 11	9.	State regulations to allow the development of limited service hospitals to meet emergency
12	10.	care and other needs where the market will not support a traditional full-service hospital. Legislation that provides exemptions to new state and federal regulations for volunteer fire
13	10.	departments and ambulance services.
14	11.	The maximum possible use of the private sector in providing health care.
15	12.	Exemptions in the two Emergency Medical Technician (EMT) rule to allow rural
16		ambulances to proceed to the scene of an emergency call.
17	13.	Granting continuing education credit to EMTs for their time spent responding to
18		emergency calls.
19	14.	The expansion of the size and scope of the Rural Nurse Practitioner Scholarship Program
20 21	15.	(RNPSP). An increase in state appropriations for programs that allow for recruitment, training, and
22	15.	retention of additional health care professionals to serve rural counties of Illinois. Patient
23		access to Critical Access Hospitals (CAH) in rural and underserved areas.
24	16.	Capital dollars to be invested in rural and tweener hospitals.
25		
26	We w	
27	1.	Encourage county Farm Bureaus to host or sponsor community forums of interested
28		professional and lay groups to assess rural health care and facilities in their county.
29	2.	Encourage county Farm Bureaus to host or sponsor rural health and awareness activities
30 31	3.	including making screening and testing available to their members. Continue to support the Rural Illinois Medical Student Assistance Program (RIMSAP) in its
32	5.	efforts to provide medical practitioners for rural communities in Illinois. We encourage
33		expansion of that program to meet the changing health care needs of rural Illinois.
34	4.	Encourage the American Farm Bureau Federation to place a higher priority on its
35		continuing study of the problems of the delivery of health care services in the United
36		States.
37	5.	Support an Agricultural Physicians and Nursing Program that would educate health care
38	0	professionals in dealing with agricultural accidents and injuries.
39 40	6.	Work with the Illinois Department of Public Health to reinstate and maintain all levels of
40 41		Emergency Medical Technician (EMT) training and testing at convenient locations throughout the state as administered prior to the elimination of EMT basic level testing in
42		Illinois. This will ensure that adequate volunteer services can be retained as a Basic Life
43		System (BLS) and minimize additional mandatory training placed on Emergency Medical
44		Technician Basics (EMT-B). Additional unfunded mandates will impose hardships on the
45		rural volunteer emergency ambulance services. The state of Illinois should look at ways to
46		provide funds for any additional mandates.
47	7.	Encourage funding to rural ambulance services to increase their ability to employ
48		additional certified Pre-Hospital Registered Nurse (PHRN), strengthening their rural
49 50	0	emergency response and treatment capabilities.
50 51	8.	Work to establish a unified EMT and Fire Service Training/Cadet program in which high school students who meet the requirements of the State of Illinois and of the program are
52		able to serve in rural areas.
53	9.	Support the concept of providing health insurance through the market place by allowing
54		portability including insuring pre-existing conditions.
55	10.	Seek legislation to allow Illinois associations to offer member health benefit plans.
56		

1		Farmer Mental Health
2 3	vve su 1.	upport: Farm Bureau providing education and resources on mental health and stress
4	0	management to farmer members.
5 6	2. 3.	Funding and improved delivery of mental health services. Units of government investigating the creation of a community health board under the
7	0.	Community Mental Health Act (CMHA) to lead, contract, and support mental health
8		services in the area.
9		Berns out fan Uralth Cana Caminaa
10 11		Payment for Health Care Services
12	1.	Allowing Medicare recipients to purchase private health care plans that are actuarially
13		equivalent to the current Medicare plan. The plan would receive a payment from Medicare
14		to cover some or all of the costs of the premium.
15	2.	Incentives which could be provided to Medicare recipients to allow them to participate in
16 17	3.	private or alternative plans. Efforts to eliminate or significantly reduce cost shifting from Medicaid and Medicare to
18	5.	individuals and third-party payers.
19	4.	Privately funded optional care delivery systems such as Health Maintenance
20		Organizations (HMO's) and Preferred Provider Organizations (PPO's).
21	5.	Efforts to encourage the medical profession to accept Medicare assignments. Rural and
22 23		urban hospitals should be reimbursed equally for providing services to Medicare and Medicaid patients.
24	6.	Relaxation of state and federal mandates which require that certain provisions be included
25		in all health insurance policies. Consumers should be given choices as to what provisions
26	_	are included in their health insurance programs.
27	7.	Further expansion of medical savings accounts that would qualify for a tax credit to allow
28 29		individuals and their employees to set aside money in anticipation of future health care costs.
30	8.	Removing the caps on the annual maximum contribution amount for all health savings
31		accounts (HSAs).
32	9.	Eliminating the high deductible health plan mandate from HSA eligibility requirements,
33	10	allowing more individuals to access the health savings plan.
34 35	10. 11.	Allowing HSA funds to be used for health insurance premiums. Lifting restrictions placed on the use of HSA funds for Over-The-Counter medicines.
36	12.	Consideration of a voluntary regional insurance purchasing cooperative to permit
37		individuals and small companies to receive the same price advantages that corporations
38		receive.
39 40	13. 14.	Efforts to simplify and make uniform all insurance forms to reduce the cost of processing.
40 41	14.	Efforts to detect fraud and abuse of Medicare and Medicaid. We encourage swift and vigorous prosecution of those who are found guilty of defrauding these programs.
42	15.	A market oriented system of health care delivery.
43		
44		ill seek legislation to allow non-penalty and tax-free transfers from IRAs to health savings
45 46	accou	ints for major medical emergencies.
40 47	Weor	opose:
48	1.	Mandated employer-provided health insurance.
49	2.	Any movement to a single-payer health care system.
50	3.	All tax increases to solve the Medicare problem.
51 52	4. 5.	Any further tightening of Medicare provider reimbursement. Increasing Medicaid eligibility, in an effort to have national health care reform, that would
52 53	J.	result in increased cost shifting to the states.
54		
55		
56		

1	Health Care Delivery Cost		
2	We su		
3	1.	Programs to reduce the inflation in health care costs.	
4	2.	The development and implementation of programs to provide incentives for consumers to	
5		practice wellness and disease prevention.	
6	3.	Tort reform to reduce the practice of defensive medicine (i.e., redundant, excessive or	
7		unnecessary testing primarily for purposes of liability concerns rather than diagnostic	
8		purposes).	
9	4.	Every possible effort to affect cost management while providing accessible high-quality	
10		health care.	
11	5.	State and federal efforts to reduce medical malpractice insurance costs, including	
12		limitations on certain punitive and non-economic damage awards, pre-filing mediation	
13		boards, and peer review.	
14	6.	The use of innovations such as surgical centers or outpatient facilities to allow consumers	
15	0.	to opt out of expensive hospital costs when they are unnecessary.	
16	7.	The development of an aggressive education-information program for health care	
17	1.	consumers to assist them in selecting the most cost-effective health care procedures.	
18	8.	Encouragement of regional hospitals to specialize in specific treatment areas with shared	
19	0.	access to eliminate unnecessary duplication of equipment and personnel.	
20	9.	A periodic review of state regulations and licensing requirements for hospitals and medical	
21	5.	professionals to determine the appropriateness of the regulations and licensing	
22		requirements in light of changes in the health care delivery system.	
23	10.	Efforts to allow consumers to purchase medications that are physician prescribed, as	
23	10.		
		opposed to having to accept a substitute, in order to receive any reimbursement from their insurance carrier.	
25	4.4		
26	11.	Efforts to encourage and strengthen price transparency in healthcare delivery systems.	
27			
28			
29			
30		94. NUTRITION	
31			
32	We su		
33	1.	United States Department of Agriculture (USDA) efforts to expand the use of dietetically	
34		wholesome and nutritious foods in all school meals and other nutrition programs and shall	
35		not be limited to locally-grown or organic production.	
36	2.	Renaming high fructose corn syrup to corn sugar.	
37	3.	Greater flexibility with the National School Lunch and Breakfast programs to ensure local	
38		school districts are able to determine how to meet the nutritional needs of their students.	
39	4.	Equal access of pasteurized dairy products, including whole milk, by the USDA national	
40		school lunch program and by the armed forces.	
41			
42		pose financial penalties on local school districts for serving meals that do not meet current	
43	federa	I mandates in the National School Lunch and Breakfast programs.	
44			
45			
46			
47		95. GOVERNMENT ASSISTANCE PROGRAMS	
48			
49		Government Assisted Nutrition Programs	
50	We su		
51	1.	Programs to provide a basic nutrition benefit to individuals based on need.	
52	2.	Benefit allotments based on a fair value amount that accounts for the true cost of food,	
53		geographical food price variation and time costs for food preparation.	
54	3.	Incentives for purchasing fruits and vegetables.	
55	4.	Education and incentives for participants to purchase food meeting nutrition dietary	
56		guidelines.	

1	5.	Increasing the use of third-party and digital platforms for all SNAP approved retailers
2		providing that benefits are not used for service or delivery charges.
3	6.	The acceptance of benefits at Community Supported Agriculture (CSAs), farmers markets,
4		food hubs, online grocery stores, and farm stands.
5	7.	Access and funding for charitable food providers to purchase domestically produced
6		United States Department of Agriculture (USDA) commodities for distribution to individuals
7		based on need.
8	8.	Contact by Illinois Health and Human Services staff when nutrition program recipients
9	•	request a replacement Electronic Benefits (EBT) card more than twice in a 12-month
10		period.
11	9.	Increasing funding for food banks and other food and nutrition assistance programs, cold
12	5.	storage, and distribution costs.
13	10.	Eliminating barriers to access Temporary Assistance for Needy Families (TANF) benefits
14	10.	
		by allowing people who are pursuing education or related job training to qualify for the
15		program.
16	11.	An exemption from Criterion A (staple food stock) and Criterion B (staple food sales) for
17		retailers to the USDA Supplemental Nutrition Assistance Program (SNAP) retailer rules to
18		allow seasonal and on-farm businesses to accept SNAP benefits.
19		
20		pose public aid programs so lucrative that there is an economic advantage in becoming a
21	recipie	int.
22		
23		
24		
25		96. RURAL DEVELOPMENT
26		
27	We su	pport:
28	1.	Placing rural development as one of our highest priorities.
29	2.	Examining private and government rural development programs to determine their viability
30		and practicality in improving the rural economy and quality of life in Illinois.
31	3.	The United States Department of Agriculture (USDA) Business and Industry Guaranteed
32		Loan Program to make loan guarantees to farmer-owned projects sited in urban or
33		urbanizing areas if the locations are the most economically viable to return benefits to the
34		rural owners of the project.
35	4.	Monitoring the impact of the new definition of "Micropolitan Areas" and, if negative
36		economic effects of rural areas are observed, support changes to that definition to better
37		serve rural areas.
38	5.	Developing a comprehensive program for coordinating rural development activities within
39	0.	the state and county Farm Bureau levels.
40	6.	Entrepreneurial programs that promote rural economic development including business
40	0.	
42		
42	7	incubator programs in rural high schools.
10	7.	incubator programs in rural high schools. Identifying specific rural initiatives which our organization will support during the

1 2 3	14.	A government-based clearinghouse at both the federal and state levels to provide one- stop-shopping for information, coordination of all information regarding government sponsored or aided rural development programs, and information on allied non-
4	4 5	governmental programs.
5 6	15.	Legislation to assist local governments to develop integrated Geographical Information Systems (GIS).
7 8	16.	Local governments, when considering offering incentives for the purpose of spurring economic development, to:
9		A. Balance new-growth incentives against those available to existing businesses;
10		B. Make incentives contingent on promised performance;
11 12		C. Carefully examine program costs relative to the increase in economic activity and tax revenue generated by the development.
13 14 15	17.	Program development and funding for low-interest loans to assist small business owners in identifying and training a successor who would then purchase the business and continue its operation.
16 17	18.	Landowners granting easements that improve rural services in areas that need access to better utility services.
18 19	19.	Multiple sources and increased levels of funding for developing and expanding broadband and cellular network access to rural areas.
20 21	20.	Studies regarding the quality of life and well-being of rural Illinois residents by the state of Illinois, universities and similar interest groups.
22 23		
24 25		97. BUSINESS CLIMATE IN ILLINOIS
26 27	We su	pport:
28	1.	Moderating the increasing cost of unemployment compensation.
29	2.	Reducing costs involved in providing Worker's Compensation benefits.
30 31 32	3.	Repealing the prevailing wage laws relating to public works projects. Failing to repeal, we will support legislation reducing the burden of the prevailing wage on public bodies outside of major metropolitan areas.
33	4.	Bringing Illinois' minimum wage law in line with federal minimum wage law.
34 35	5.	Working directly with Illinois' regulatory agencies to improve their efficiency in issuing the permits for business, economic, and natural resource development projects.
36 37 38	6.	Ongoing analyses using state and federal statistics and support reporting of the economic performance of natural-resource-based and mineral-based economies across Illinois' counties.
39 40	W/o op	poco:
40 41	We op 1.	The creation of a state or local tax on any financial transaction, including a tax on any
42		commodity, currency, or securities.
43 44	2.	Efforts to incorporate into law the doctrine of "comparable worth" as it relates to compensation levels for various types of jobs.
45 46		
47 48 40		98. COMPENSATION OF PUBLIC OFFICIALS
49 50	We su	pport.
51	1.	Legislation requiring Congress and the Illinois General Assembly to vote by a roll call vote
52		on any legislation that would increase their pay or pension of its members.
53	2.	Pay and pension legislation being voted on separately and not being tied to unrelated
54	0	legislation.
55 56	3.	Legislation that would deny all state employment-related benefits to any state employee who is convicted under any federal, state, or local law of theft, embezzlement, or

1		accepting bribes in connection with the employees service as a state employee. We
2		support an amendment to the Illinois Pension Code and/or other current law to the extent
3		necessary to implement this proposed legislation.
4	4.	Capping the pension amount that a state legislator can receive regardless of their length
5		of service or the position(s) they hold with the state after leaving the legislature.
6	5.	Enabling elected local and state officials having access to a 457 plan rather than a
7		taxpayer-funded pension.
8	6.	Requiring public employees to contribute a greater amount to their own pensions.
9	7.	Legislators only receiving compensation for the days they are in office.
10	<i>'</i> .	Legislators only receiving compensation for the days they are in onloc.
11		
12		
13		99. ELECTIONS
14		33. ELECTIONS
15		Il activaly participate in any logiclation and other activities that will involve electoral reforma-
	we wi	Il actively participate in any legislation and other activities that will involve electoral reforms.
16	14/0 01	
17		ipport: Otata la siglation manifesing the measure concelledge of a section law as that the siglated of a sector
18	1.	State legislation modifying the present consolidated election law so that the right of secret
19		ballot is protected.
20	2.	Shortening political campaigns by moving primaries closer to general elections, provided
21		county clerks have ample time to prepare for the general election.
22	3.	A limit on campaign spending and franking privileges.
23	4.	Reforming federal campaign laws to include:
24		A. A strengthening of campaign spending limitation laws to prevent abuse through the
25		use of "soft money" and independent expenditures.
26		B. An increase in the allowable contribution an individual may make to a candidate.
27	5.	Requiring individuals registering to vote, and during voting, presenting government issued
28		photo identification.
29	6.	Consolidating elections in order to streamline the system and reduce taxpayers' expense.
30	7.	Reducing the number of required election judges from five to three for every precinct in
31		counties with a population of 250,000 or less should the local election authority so desire.
32	8.	Greater oversight and enforcement of voter fraud of elections by the Illinois State Board of
33		Elections.
34	9.	Uniform signature requirements, on nominating petitions, regardless of political party for
35		candidates seeking public office.
36		
37	We or	ppose:
38	1. '	The use of the Internet for voting in any local, state, or federal election.
39	2.	The current Illinois Undervote Notification Law and will support legislation to repeal it.
40	3.	The use of campaign phone calls that are made to households that are on a do-not-call
41		list.
42	4.	Same day voter registration unless the following conditions are met:
43		A. All voter registrations done on Election Day take place at a county designated
44		government facility.
45		B. A valid photo ID is required at the time of registration.
46		C. Full funding of same day voter registration be provided by the State of Illinois to
47		ensure this is not a burdensome unfunded mandate on local governments.
48		D. Legislation be passed to require uniform statewide standards for the voter
49		
49 50		registration process.
50 51		
52		
53		
54		
55		
56		

1 2		100. FARM EQUIPMENT
2	W/A SI	upport:
4 5 6 7 8	1. 2.	Clarifying and simplifying the vehicle code and regulations relating to farm vehicles. Proper use of the slow moving vehicle (SMV) emblems, retailers providing information regarding proper use and law enforcement agencies enforcing proper use of SMV emblems to be used in accordance with the most current American National Standards Institute (ANSI)/American Society of Agricultural and Biological Engineers (ASABE)
9 10	3.	standards. Seeking legislation to increase the fine for the misuse of SMV emblems to at least \$75.00
11 12 13	4.	for the first offense. State and county Farm Bureaus developing an SMV and lighting campaign to encourage farmers to update their older equipment with new amber flashing lights and SMV
14 15	5.	emblems. Development and utilization of standardized specifications for pesticide containers and
16 17 18 19 20	6.	equipment connectors for closed pesticide application systems. Farm equipment manufacturers and ASABE working together to create an improved system for new equipment that would better indicate turns, utilizing a unique color/style of flashing lights, such as sequentially-flashing red arrows, making them more noticeable for vehicles that are approaching or following.
21 22	7.	Development and utilization of standardized wire color/function for any trailer licensed for over-the-road use or any towed implement of husbandry.
23 24 25	8.	A farm equipment owner's right to maintain, service, repair, and rebuild their vehicle or farming equipment on their own accord or by the repair shop of their choice.
26	We or	opose:
27	1.	Licensing farm tractors and other implements of husbandry.
28 29 30	2.	Mandatory retrofitting of lighting on farm equipment beyond that which was required by law as of 2018.
31 32 33 34		101. FENCE LAW
34 35	Wo si	upport:
36	1.	The equitable cost sharing of division fences between adjoining landowners.
37 38 39 40	2.	Developers and subsequent owners installing and maintaining a new line fence on subdivided property.
41		
42		102. FIREARMS
43		
44	We su	ipport:
45	1.	Active promotion of gun safety programs.
46	2.	Repeal of the Firearms Owners Identification Act (FOID).
47 48	3.	The Firearm Concealed Carry Act issuing permits to carry concealed firearms to qualified Illinois' citizens through an appropriate application process.
49	4.	Current laws that requires background checks and waiting periods for handgun purchases.
50	5.	Legislation to allow active military personnel residing in Illinois the opportunity to obtain a
51		concealed carry permit without regard to state of residence.
52	6.	Strict enforcement of current laws.
53	7.	The opportunity for school districts to allow school personnel to voluntarily carry a
54 55 56	8.	concealed firearm while on duty and on school property. An Illinois State Police endorsed certification/training program for school personnel who are approved by their school district to carry a concealed firearm on school property.

1	9.	Statewide efforts to explore the use of less lethal weapons in addition to lethal weapons in
2		schools and other government institutions where children are usually present.
3	10.	School districts engaging with law enforcement to provide active shooter training
4		programs.
5	11.	Timely processing of Concealed Carry License (CCL) permit applications and renewals
6		that allow for completion within 60 days.
7		
8	We op	pose any type of gun registration program or new, more stringent gun control laws or rules.
9		
10		
11		
12		103. ILLINOIS BANKING STRUCTURE
13		
14	We su	pport:
15	1.	An adequate supply of competitively priced credit for all credit worthy farmers.
16	2.	Competent staff in local banks who understands agriculture and the unique risks with
17		which farmers must deal.
18	3.	Fair competition for banks of all sizes and in all locales.
19	4.	Fair competition with other types of lenders.
20	5.	Economic decision making that is not concentrated in the hands of a few large financial
21	-	institutions.
22	6.	Constant or a net inflow of capital into the area in which financial institutions are being
23	-	acquired, merged or consolidated.
24	7.	Greater scrutiny of an investigation into anti-trust ramifications and violations in relation to
25		mergers and other acquisitions.
26		
27		
28		
29		104. ILLINOIS DEPARTMENT OF AGRICULTURE
30		104. ILLINOIS DEPARTMENT OF AGRICOLTORE
31	We su	nnart.
32		
	1.	The Illinois Department of Agriculture (IDOA) as a stand-alone agency.
33	2.	Strengthening the IDOA including its role in regulatory concerns as they apply to
34	0	agriculture.
35	3.	Strengthening Illinois county fairs, the Illinois State Fair, and the DuQuoin State Fair as
36		agricultural expositions.
37	4.	The State of Illinois fully funding its portion of premium dollars at Illinois county fairs.
38	5.	The establishment of a charitable foundation to solicit donations and sponsorships to grow
39	_	and improve the Illinois State Fair and the DuQuoin State Fair.
40	6.	The IDOA and the State of Illinois putting a five-to-10-year plan in place to move the
41		Illinois State Fair up at least one week.
42	7.	Sufficient meat inspectors on staff so as to be readily available and not hinder the ability of
43		local meat lockers to harvest as needed.
44		
45		
46		
47		105. INTERGOVERNMENTAL COOPERATION
48		
49	We su	pport:
50	1.	Expanded use of the Intergovernmental Cooperation Act by units of local government.
51	2.	The shared use of buildings, equipment, personnel and programs by units of local
52		government to reduce the cost to each unit.
53	3.	County Farm Bureaus working with local government officials and other interested parties
54	-	to encourage local government cooperation.
55		
56		
30		

1 2		106. JUDICIAL REFORM
2 3		innort.
3 4 5 6	1.	An amendment to the Illinois Constitution permitting downstate judicial districts to choose by referendum between election of judges or appointment of judges from candidates recommended by advisory commissions made up of laymen and lawyers.
7 8 9	2.	Working with members of the legal profession and legislative bodies on a state and national level to substantially reform the judicial system by addressing issues such as tort reform, attorney contingency fees, incompetent or unqualified judges, and lengthy trials.
10 11 12 13	3. 4.	Limiting the tenure of judges at the local and state level. Providing adequate information to the public regarding the qualifications of individuals seeking election or retention to judicial office.
14 15		
16 17		107. LAW AND ORDER
18		ipport:
19	1.	Vigorous enforcement of the current driving under the influence laws and legislative efforts
20		to improve those laws.
21	2.	Firm, fair, and prompt enforcement of existing laws.
22	3.	Increased enforcement of existing littering laws.
23	4.	Providing aid to victims of crime.
24	5.	Greater member involvement in recruiting and electing qualified local law enforcement
25		professionals.
26	6.	Requiring that the County Sheriff and State's Attorney be notified when an inmate from
27		their county is released from a correctional institution.
28	7.	Reducing the fiscal impact imposed on local governments by giving them flexibility to meet
29		minimum federal jail standards.
30	8.	Law enforcement officials seizing vehicles used in the commission of a theft involving
31		agricultural commodities, supplies or equipment.
32	9.	Legislation where needed to prevent the illegal production, importation, manufacture, or
33		distribution of drugs and related drug paraphernalia.
34	10.	Expanding the conditions allowed to be treated with medical cannabis to those proven by
35		medical research to benefit from medical cannabis treatment.
36	11.	Work programs for prisoners.
37	12.	The establishment of Juvenile Justice Councils.
38	13.	Seeking legislation to provide for severe and mandatory sentences for crimes committed
39		with weapons.
40	14.	Clearly defining the legal definition of the defense of one's property.
41	15.	Developing coalitions to address the problems with and education about
42		methamphetamine production and use.
43	16.	The development of an economical additive for anhydrous ammonia to prevent its use for
44		the production of methamphetamine or other illegal purposes.
45	17.	Seeking legislation imposing stiffer penalties for theft of anhydrous ammonia for
46		methamphetamine production.
47	18.	The regulation and taxation of recreational marijuana.
48		
49		ppose:
50	1.	The "early release program" as a solution to prison overcrowding.
51	2.	The use, production and distribution of illegal substances.
52	3.	Giving a "Conservator of Peace" designation or granting similar law enforcement
53		deputization powers to the members of the Illinois General Assembly.
54		
55		
56		

1 2		108. LEGISLATIVE BODIES
2 3	Wo si	upport:
3 4 5	1.	Legislation prohibiting members of the General Assembly from receiving remuneration from any taxing body for other than incidental services rendered on a part-time basis.
6 7	2.	Legislation to provide for a "sunset" of all new state or federal rules issued by departments, agencies, executive order or commissions or explicit reauthorization of those
8 9	3.	rules at "sunset" which spend tax resources. Limiting the Governor's amendatory veto power to only technical corrections and matters
10	0.	of form.
11 12 13 14 15	4. 5.	A restructuring of the Illinois legislative redistricting process that will be conducted by an unbiased third party, will not be based on political affiliation and prior election results, and districts will be compact, contiguous, and impartial to party or incumbency. Districts should follow county, township, and municipal boundaries as much as possible. An amendment to the Illinois Constitution that addresses limiting the passage of lame
16 17	5.	duck legislation and requires a 3/5 vote on all legislation in the second year of a General Assembly session after May 31.
18 19	6.	Creating term limits on both minority and majority leadership positions within the Illinois House of Representatives and Senate.
20	7.	Creating term limits on all statewide offices and state legislators in Illinois.
21	8.	Prohibiting state lawmakers from concurrently serving as an elected official and as a paid
22 23	9.	lobbyist. Limiting the Governor's power to declare no more than four (4) consecutive states of
24 25 26	9.	emergency, unless the state of emergency is approved by the legislature or an equally bipartisan legislative body.
27 28		
29		109. LOCAL GOVERNMENT
30 31	We er	inport.
32	1.	Ipport: The principle of strong local government.
33	2.	The assignment of responsibility for government services to that unit of general
34		government which best serves the people and can economically provide the service.
35	3.	Maximizing efficiency and eliminating waste in all units of government.
36	4.	Providing uniform requirements, including the printed full name of the voter, for signers of
37		all public petitions.
38	5.	Permitting consolidation of additional county functions between counties.
39	6.	Ensuring that any electronic registry of mortgage loan information shall not affect the
40 41		current system of recording documents affecting title to real property with the county clerk or recorder.
41	7.	Providing for salaries of all local officials to be set by the appropriate local unit, rather than
43	1.	by the state legislature.
44	8.	Requiring at least 15 percent of registered voters as signers on petitions within any
45	-	territory proposed to become a new taxing district or within any area proposed to be
46		annexed to an existing taxing district.
47	9.	Requiring that a referendum to expand a taxing district be approved by a majority of voters
48		in both the existing district and in the area proposed to be annexed. When a new taxing
49		district is to be created encompassing both incorporated and unincorporated areas, the
50		referendum should require approval by voters within the incorporated area and a separate
51 52	10	approval by voters in the unincorporated area.
52 53	10.	Extending the time limit from 30 days to 60 days to get the necessary percentage of registered voters' signatures on petitions concerning backdoor referendums.
53 54	11.	More clearly defining what issues are appropriate for non-binding advisory referenda for
55		units of local government.
56		

1	12.	Prohibiting individuals from serving concurrently as an elected mayor and an elected
2		county board member.
3	13.	Allowing townships with annual revenue less than \$850,000, when required to have a CPA
4 5	14.	audit, to have the audit performed on a cash basis rather than an accrual basis. Providing for the absorption, consolidation, disconnection, and dissolution of units of local
6	14.	government by front door referendum. Only that unit's governing board or registered
7		voters residing within the unit of government should be allowed to initiate the front door
8		referendum.
9	15.	Waiving the residency requirement for the office of Highway Commissioner and road
10		district clerk in a road district if no qualified candidate willing to serve the office exists
11		within the township or road district. All other requirements for the office shall remain.
12	16.	Requiring special purpose units of local government, excluding drainage districts, that go
13		dormant (no projects or expenditures) for more than two years to go before the voters
14	47	within the district to determine if the unit should continue in existence.
15 16	17.	Codifying case law dealing with prohibited activities to include serving on a unit of local government board and be an employee of that unit of government.
17	18.	The shifting of additional responsibilities from the federal government to state
18	10.	governments if, at the same time, adequate access is made to the tax structure to allow
19		for the financing of such programs by the states and a commensurate reduction is made in
20		federal taxes. We will support state and local governments in the development of their
21		capabilities to discharge these added responsibilities.
22	19.	The shifting of responsibilities from the state government to local governments only if the
23		state government reduces its taxes proportionately or provides local governments the
24	20	resources to carry out such responsibilities.
25 26	20. 21.	State provided training and education for local government officials. Efforts by local government officials, county Farm Bureaus and other organizations to
27	21.	increase public participation in the overall functions of local government.
28	22.	Ensuring that citizens who do not currently live in a library district but wish to receive
29		library services can receive equal and affordable access to the public library system.
30	23.	Encouraging local governments to make compensation breakdowns and pension
31		sweeteners more readily available to public scrutiny.
32	24.	Amending the Cemetery Oversight Act, so that the provisions of the law are not overly
33	05	burdensome for cemeteries.
34 35	25.	Elected and appointed government officials being held to ethical standards including prohibiting nepotism.
36	26.	Publishing public notices by alternative local methods, when a newspaper is not in general
37	20.	circulation.
38		
39	We s	upport seeking legislation for:
40	1.	Selection of special district board members by election.
41	2.	Uniform fiscal years, classification of accounts, budgets and audits for all taxing bodies.
42	3.	Additional authority for forest preserve districts to sell real estate, including farmland.
43	4.	A referendum of registered voters in the township or townships to approve the site where
44 45		municipalities propose to annex property for the location of any type of waste disposal facility, prison or other entity which could directly affect the lives of people residing in the
45 46		area.
47	5.	The requirement that any municipality or any other unit of local government considering
48		annexation of farmland notify affected landowners by registered or certified mail at least
49		30 days prior to the filing of such annexation.
50	6.	The capability of counties, townships, and special districts to levy impact fees to support
51		local services during the time between construction of a project and when tax revenues
52		would normally be received and to levy impact fees to support local infrastructure
53 54	7.	improvements in areas of new development. The elimination of the liability of bonded indebtedness to areas that are annexed and then
54 55	1.	vote by referendum to disconnect from a taxing district which had previously incurred debt
56		voto by totorondam to disconnect nom a taxing district which had previously incurred debt

1 2 3		before the annexation. The annexed and then disconnected territory would only be liable for indebtedness occurring while they are a part of the district.
3 4	We op	0050.
4 5 6		All efforts to mandate inclusion of areas not currently served by a library district into existing library districts.
7 8	2.	Exposing an individual's personal financial information as a requirement to serve as a local official, except in the case of a financial conflict of interest.
9 10		
11 12 13		110. STATE AND FEDERAL MANDATES
14 15 16		pport amending the Illinois Constitution to prohibit the state from mandating programs on ocal government or school districts without providing full state funding.
17 18 19		pose any state or federal legislation mandating local programs, unless full funding for such ms is provided annually.
20 21		
22 23		111. PRIVATE LANDS COOPERATIVE INITIATIVE
24		pport development of state laws and policies promoting voluntary and incentive-based
25 26	private	land initiatives to: Encourage economic stability in communities through long-term private land ownership.
27	2.	Enhance on-farm income through recreation-based resource development.
28	3. ₄	Increase community revenue through expanded economic activity.
29 30		Improve owner-sanctioned public recreational opportunities on private land. Provide liability protection to landowners.
31	6.	Increase economic activity in depressed rural communities.
32	7.	Promote cooperation between government bodies and private landowners.
33 34		
35		
36 37		112. PROBATE AND FAMILY LAWS
38	We su	oport:
39	1.	Major reform of probate laws and procedures which will increase the promptness, reduce
40		the cost, and simplify the procedures for settling estates.
41 42	2.	Revisions to family law that fairly recognize capital cost for purposes of determining net farm income and include allowances for deduction of either depreciation or debt service.
43		
44		
45		113. PUBLIC EMPLOYEE COLLECTIVE BARGAINING
46 47		113. FOBLIC EMPLOTEE COLLECTIVE BARGAINING
48	We sup	pport:
49	1.	Efforts to inform our leaders and members of the basic provisions of the current public
50 51	2.	employee collective bargaining laws in Illinois. Urging the use of various innovative consensus and nonadversarial approaches to resolve
52	۷.	public employee disputes in order to minimize the potential of work stoppages by public
53		employees.
54 55	3.	Cooperation with major public employee and employer groups in the State in pursuit of reasonable solutions to disputes in the public sector.
56	4.	Binding arbitration only when agreed to by both negotiating parties.

1	We op	pose:
2	1. '	Mandatory membership in any bargaining group, or mandatory financial support of such
3		group by non-members.
4	2.	Strikes by public employees which might jeopardize public health, safety, welfare and
5		education.
6	3.	Inclusion of administrative, supervisory or management personnel in a collective
7		bargaining unit.
8		
9		
10 11		114. SPECIAL SERVICE AREAS
12		114. SPECIAL SERVICE AREAS
12	We su	innort.
14	1.	Seeking amendments to the Special Service Area Law to permit, by petition of at least 10
15	1.	percent of the voters in the proposed area, the calling of a binding referendum to
16		determine if a special service area shall be established, if taxes are to be extended, or if
17		certain areas are to be included in the service area.
18	2.	Ensuring that special service areas be restricted to providing those services that are not
19		ordinarily provided by county government.
20	3.	Procedures for the dissolution of special service areas.
21	4.	Only counties being able to establish and govern any special service area which includes
22		territory not incorporated within a municipality.
23		
24		
25		
26		115. TORT REFORM AND INSURANCE LIABILITY
27		
28	We su	
29	1.	Coordination of efforts between state and county Farm Bureaus, medical associations,
30		insurance organizations, and other organizations for solving the increasing problems of
31	0	cost and availability of liability insurance.
32 33	2.	Efforts to reduce the costs of product liability insurance and other important classes of liability insurance.
33 34	3.	Legislation to help protect landowners and tenants from liability claims made by
35	5.	trespassers, licensees, or invitees coming upon the landowners' property and legislation to
36		ensure landowners and tenants owe no duty of care to trespassers, regardless of age.
37	4.	Legislation that will protect the private landowner from liability claims arising from
38	т.	conditions or risks created by storms or other natural disasters.
39	5.	Legislation that will protect businesses that make a reasonable effort to comply with
40	-	applicable federal and state regulations from liability claims made by employees and
41		customers related to the Coronavirus or other similar pandemics.
42	6.	Limitations upon an attorney's contingency fee.
43	7.	Modification of the law on joint and several liability and comparative negligence to prevent
44		inequitable division of compensation from defendants.
45	8.	Removal of the authority of local units of government to use profits generated from tax-
46		created liability protection funds for other purposes.
47	9.	Development of informational programs to educate our membership and the public
48		regarding issues relating to tort reform and the insurance liability crisis.
49	10.	Laws or regulations absolving farmers from liability claims of environmental pollution:
50		A. When complying with federal or state approved label instructions.
51		B. When building, managing, or operating livestock facilities according to federal or
52		state guidelines such as the Livestock Management Facilities Act (LMFA) and the
53		Concentrated Animal Feeding Operation (CAFO) rules.
54	11.	Legislation at the state and federal level to place reasonable limitations on attorney's fees
55	10	generated by class action lawsuits.
56	12.	Efforts to limit punitive damages in odor lawsuits.

93

1 2	13.	An amendment to the Recreational Use of Land and Water Areas Act in order to limit the liability of landowners who voluntarily open their land for educational and recreational
3 4		activities at no charge while maintaining the landowner's ability to determine who to allow on their property.
4 5 6	14.	Legislation that would encourage liability litigation to be filed and commenced in the jurisdiction where the medical service was provided.
7 8	15.	The expansion of the restitution language that will allow the recovery of both out-of-pocket expenses and lost wages.
9	16.	Requiring the cost of defense to be paid by the complaining or suing parties and their
10		representatives in the event the defendant prevails.
11	17.	Seeking to require the payments by the plaintiff or plaintiffs of costs and reasonable
12 13		attorney fees incurred by a prevailing defendant in any nuisance action in which a proposed farm (as defined in the Farm Nuisance Suit Act) or expansion of an existing farm
13		which is alleged to be a nuisance.
15	18.	Legislation to minimize the liability of farm equipment drivers and/or owners when Illinois
16		Department of Transportation design standards force their equipment to travel across the
17		center line of a highway.
18	19.	At the state level - and will urge the American Farm Bureau Federation to support at the
19 20		federal level - a "Voluntarism Protection Act" to grant immunity from personal civil liability under certain circumstances to volunteers, officers and directors working on behalf of non-
20		profits, charitable organizations or government.
22		
23		
24		
25 26		116. TRESPASS, VANDALISM, AND PRIVATE LAND ACCESS
20	Wes	support:
28	1.	Encouraging courts to punish vandals by requiring them to clean up and repair their own
29		vandalism at their own expense or perform some other constructive work. We urge judges,
30		when setting sentences, to require reimbursement of Crime Stoppers or similar reward
31	2	programs, as a part of the sentence.
32 33	2.	Legislation to protect landowners and tenants from property seizures, claims, and costs caused by unauthorized activities of trespassers and licensees entering upon and using
34		the landowners' property.
35	3.	Efforts, including legislation and working with law enforcement agencies and prosecutors,
36		to increase the enforcement of criminal trespass laws.
37	4.	Legislation specifying that, in criminal damage to property cases where the damage was
38 39		caused by the unauthorized operation of a vehicle on private property, the threshold of felony status be elevated to a level suited to the crime and one that would help to remove
39 40		the law enforcement community's hesitancy to prosecute those violators. In such cases, a
41		minimum fine should be established with required restitution to the victim for property
42		damages caused and the violator's driver's license should be suspended for six months.
43	5.	Legislation linking criminal violations of the Illinois Vehicle Code and acts of criminal
44		trespass or criminal damage to property to the driver's license record of anyone convicted
45 46	6.	of these crimes for the unauthorized operation of a motor vehicle on private property. Legislation creating an owner responsibility provision in law that obligates the owner of a
47	0.	vehicle to compensate for damages caused to private property by the use of the vehicle
48		on that property without the landowner's authorization unless the vehicle was stolen or the
49		vehicle's owner took reasonable precautions against misuse of the vehicle.
50	7.	Efforts to educate law enforcement officials and the general public - especially youth -
51 52		about the property damage caused by the unauthorized operation of vehicles on private
52 53	8.	property and the liability and penalties for any resulting property damage. The development and dissemination of programs and materials on private property rights
53 54	0.	and the associated portions of trespass and criminal law. We encourage county Farm
55		Bureaus to pursue similar efforts on the local level.
56		

1 2 3	9.	Efforts to educate farmland owners and farmland operators about their legal rights and responsibilities relating to trespass; also, efforts to educate them about insurance coverage relating to liability and property damage caused through trespass. We
4 5	10.	encourage county Farm Bureaus to pursue similar efforts on the local level. Efforts to establish riding areas for ATVs and other off-highway vehicles and efforts to
6 7 8 9	11.	generate revenues for that purpose from those who use the vehicles for recreation. Efforts to make it clear that persons going to or from rivers, streams, and bike trails over another's land or hunting on another's land without the owner's or rightful occupant's specific permission, without regard to the presence of any posted notices, are trespassers
10 11		for the purposes of determining liability of a landowner for any injury which might occur to the trespasser.
12	12.	Legislation that will require owners of recreational trails and their facilities to compensate
13		owners of land adjacent to the trail or facility for any property damage, theft, littering,
14 15		and/or vandalism caused by users of the trail or facility except where the actual perpetrator can be identified and make restitution.
16	13.	Efforts to educate farm owners and operators about their legal rights as they pertain to
17		utilities and governmental or private surveying companies. We would encourage all
18		surveyors to notify affected landowners and use public property whenever possible.
19	14.	Efforts to educate farm owners and farmers about their legal rights as landlords or
20 21	15	managers of residential properties.
21	15.	Landowners being an additional named insured for all government and public utility project work that is being done on private property.
23	16.	Efforts to enforce regulations on hot air balloons regarding their potential trespass on
24		private property and their potential for endangering livestock.
25	17.	A program to reward informants who provide information leading to the arrest and
26		conviction of persons who commit theft, arson, or vandalism to the property or premises of
27 28	18.	Illinois Agricultural Association (IAA) members. Requiring sky diving companies to install tracking devices on the parachutes and other
20 29	10.	components that can become unattached during flight; notification to landowners and/or
30		tenants of a lost parachute or parts of a parachute, or damage to crops or property caused
31		by a skydive; skydive companies compensating the farmer for damages caused by
32		skydivers landing on their property, ruining crops, or damage to farm equipment caused by
33 34		parachutes and their parts.
35		
36		
37		117. FEDERAL ESTATE TAXES
38	14/	
39 40	vve si 1.	upport: Permanently repealing federal estate taxes while retaining a stepped-up basis at the time
40	1.	of inheritance.
42	2.	Federal estate tax exemptions for heirs who actively farmland that is restricted by a
43		voluntary conservation easement.
44	3.	Eliminating the ceiling and limitation on the percentage of an estate's total value allowed in
45 46		determining the existing exemption under Internal Revenue Code 2032-A for agricultural productive value.
40 47	4.	Increasing the maximum gift tax exclusion per recipient to \$50,000 per year.
48	ч.	
49		ppose any reduction in the current federal estate tax exemption. Until repeal, we support
50		on-adjusted increases in the exemption to ease the movement of farms and small
51 52	busin	esses from one generation to the next.
52 53		
54		
55		
56		

1 2	118. PROPERTY TAX ADMINISTRATION				
3					
4 5 6	1.	Provisions to specifically define property as real estate or personal property on an equitable basis statewide. We will continue to work with the State Department of Revenue (DOR) and local assessing officials on specific problems in this regard.			
0 7 8 9	2.	A change in the method of valuing mobile or manufactured homes for assessment and collection of taxes from the Mobile Home Local Services Tax Act (privilege tax) to an Ad Valorem Tax (measured by value).			
10 11 12	3.	Reduction of costs for property assessment publications by allowing counties to utilize online publication in lieu of printed publication. This type of publication would be in addition to the required individual property assessment mailings to property owners.			
13 14 15	4.	Allowing counties to eliminate the office of Township Assessor by a county-wide referendum in which a majority of voters in the county and a majority of voters in the majority of townships approve.			
16 17 18	5. 6.	Allowing by local referenda the dissolution of multi-township assessing districts. Seeking uniform and equitable implementation of the Farmland Assessment Law, in cooperation with county Farm Bureaus.			
19 20	7.	Working with county Farm Bureaus to inform members of the limits of their responsibilities in providing information to assessing officials.			
21 22	8.	Cooperating with the DOR and the Association of Assessing Officials in developing educational materials for use by taxpayer groups.			
23 24	9.	Urging the members of the Illinois General Assembly not to change the present formula for calculating the assessed value of farmland.			
25 26 27	10. 11.	Appointment of Supervisors of Assessment versus elected Supervisors of Assessment. Encouraging county Farm Bureaus, in cooperation with local officials, to periodically hold information/education meetings for taxpayers.			
28 29 30 31 32	12. 13.	Working with the DOR and the Association of Assessing Officials to achieve uniformity in depreciation (for assessment purposes) of all depreciable agricultural facilities. Working with the Illinois DOR and the Association of Assessing Officials to encourage the assessment of all qualifying agricultural property, regardless of size, under the farmland assessment law.			
33 34 35 36	14.	Working with appropriate state agencies and other state officials to develop Conservation Management Plan rules that permit landowners to apply for a plan without submitting overly burdensome and prohibitive proposals.			
37 38 39 40 41	admin	ppose legislation removing either the State DOR or the local Board of Review from the istrative process of approving or denying property tax exemptions. The DOR should ue to have final authority.			
42 43 44		119. SALES TAX			
45	We su	ipport:			
46	1.	Seeking removal of the Retailer's Occupation Tax (ROT) and the Use Tax from sales of			
47 48 49	2.	LP gas used primarily in production agriculture. Seeking removal of the ROT and the Use Tax from sales of feeds, including hay when sold by farmers to feed livestock including horses and poultry for marketing, or for			
50 51	3.	producing dairy products or eggs or other consumer by-products. Seeking elimination of the practice of charging state sales tax on motor fuel.			
52 53 54 55 56	4.	Agricultural exemptions in Illinois state sales tax codes.			

1 2		120. STATE AND LOCAL FINANCE	
2 3 4 5 6	We will analyze any proposed changes in state tax rates as to the effect any change would have on the economy and competitiveness of the State of Illinois in relation to the state tax rates imposed by neighboring states and take the appropriate action on such proposed changes.		
7	We su	upport:	
8	1.	An overall tax structure for state and local governments in Illinois that includes a moderate	
9		flat rate state income tax, a moderate local real property tax, sales tax, motor fuel tax,	
10		cigarette tax, liquor tax, and other special taxes.	
11	2.	The need to analyze any proposed change to the state tax structure as to the effect it	
12		would have on the economy and competitiveness of the State of Illinois.	
13	3.	Providing property tax relief through a combination of state revenue surpluses and various	
14		statewide taxes.	
15	4.	Including townships and road districts along with counties and municipalities in the formula	
16	_	for the distribution of the Local Government Distributive Fund.	
17	5.	Extending to two years the time landowners have to disconnect their property from any	
18 19		special purpose taxing district formed or expanded without a referendum and which does	
19 20		not provide emergency life-sustaining services. During that period, all property tax revenues collected by the district from landowners within the new taxing area should be	
20		held in escrow and refunded or credited to those taxpayers if they choose, by referendum,	
22		to disconnect.	
23	6.	Extending the time limit from 30 days to 60 days to get 10 percent of registered voters'	
24		signatures on petitions concerning backdoor referendums.	
25	7.	Providing for restricted and specific criteria in order to qualify areas for creation of Tax	
26		Increment Financing (TIF) districts by municipalities and counties in order to reduce	
27		negative fiscal impacts on existing businesses and local governments, including schools.	
28		Further, we believe the economic advantages of the new business or production alone	
29	-	should be enough to justify expansion or location in an area.	
30	8.	Limiting the tort immunity levies to the actual costs incurred by the local taxing bodies. We	
31		support vigorous enforcement of current laws and regulations specifying use of these	
32 33	9.	funds. Allowing local citizens to establish a maximum tax rate lower than the statutory maximum	
34	5.	rate when creating a new taxing district by referendum.	
35	10.	Requiring a referendum ballot question which proposes the creation of a new taxing body	
36		also state the statutory maximum tax rate and debt level for the proposed new taxing	
37		district.	
38	11.	Allowing a Fire Protection District to retain the real estate taxes for a period of 10 years,	
39		whenever a territory is disconnected from a Fire Protection District and annexed to a	
40		municipality.	
41	12.	Taxing districts shall give public notice of, and hold a public hearing on, their intent to	
42	40	annex property.	
43 44	13.	Limiting taxing districts, including school districts, from incurring future bonded	
44 45		indebtedness, without a referendum, where such bonds are to be repaid with property tax revenue.	
46	14.	Requiring referendums which authorize any new real estate tax levy to state the maximum	
47		statutory tax rate in the referendum question.	
48	15.	Allowing all taxing bodies to reduce their levy after the levy has been submitted to the	
49		county clerk.	
50	16.	Allowing impact fees to be imposed on new residential construction for school capital	
51		needs.	
52	17.	Allowing townships that are currently under the Illinois Municipal Retirement Fund (IMRF)	
53	4.0	program to opt out.	
54 55	18.	Exempting undeveloped farmland in unincorporated areas from municipal local improvement taxes and fees.	
55 56		ווויףוטיפווופות נמגפה מווע ופפה.	
00			

1	19.	Requiring that any tax credits be based on fiscal policy that promotes long-term economic
2		stability and prosperity.
3	20.	Amending the Open Space Lands Acquisition and Development Act to allow some of the
4		revenues funding the act to be used to provide maintenance and improvement to existing
5		state parks.
6	21.	Amending the Illinois County School Facility Tax Act to require school districts to issue a
7		public statement of intent a minimum of 30 days prior to the election.
8	22.	Amending the Illinois County School Facility Tax Act to ensure that counties benefiting
9		from the School Facility Tax Act would not be prevented from, or placed at a disadvantage
10		for, receiving school construction dollars from the state.
11	23.	Amending the Illinois County School Facility Tax Act to require that a portion of the money
12	20.	collected is used in property tax relief if the school district(s) has outstanding bonds for
13		capital purposes.
14	24.	Amending the Illinois County School Facility Tax Act to require a sunset clause of 20 years
15	24.	or re-approval by voters to continue the tax.
	25	
16	25.	Requiring local governments to publicly disclose information on TIF districts including the
17	00	locations of the districts, funds generated, use of funds, and any contractors.
18	26.	A more stringent audit of all state expenditures.
19	27.	Eliminating the Illinois estate tax, but until that is accomplished, support using the
20		corresponding federal exclusion amount, but not less than \$5 million and having a tax rate
21		structure no greater than the maximum 16 percent currently in law.
22	28.	Imposing a tax on the owner or lessee of non-renewable natural resources, excluding oil
23		and gas, upon the severance and production of that resource. A significant portion of the
24		tax revenue shall be distributed to the county of origin.
25	29.	Maintaining and creating property assessment levels that encourage the creation and use
26		of grassed-backed terraces, grassed waterways, filter strips, two stage ditches,
27		bioreactors, and other approaches to improve water quality through these practices.
28	30.	Creating state income tax deductions and credits benefiting agriculture and agricultural
29		processes.
30	31.	Maintaining a state income tax general exemption at some realistic level.
31	32.	Coupling the state income tax to Federal Depreciation rules regarding bonus depreciation.
32	33.	Changing the backdoor referendum to a front door referendum in the library code that
33	00.	relates to annexation of contiguous territory.
34	34.	Legislation further limiting the use of the Illinois Building Authority Act and the Illinois
35	04.	Public Building Commission Act.
36	35.	Working to form a coalition of statewide associations and other interested and like-minded
37	55.	parties to work for tax reform to reduce the reliance on real estate taxes.
38	36.	Urging county Farm Bureaus to implement comprehensive local programs to determine
	30.	
39		and to critically evaluate how and from what sources local government revenues are being
40		raised and how these funds are being spent. We will assist county Farm Bureaus in such
41	07	programs.
42	37.	Encouraging the Illinois General Assembly to undergo a more comprehensive and diligent
43		method of prioritizing appropriations to meet the current needs of its citizens.
44	38.	Speeding up tax appeal decisions that affect local government budgets.
45		
46	We o	ppose:
47	1.	Imposing additional taxes or increases in tax rates upon property unless approved by a
48		referendum of local voters at a primary or general election. We oppose the use of a
49		backdoor referendum.
50	2.	Imposing a state property tax.
51	3.	Increasing exemptions from real estate taxation.
52	4.	The use of (TIF) or enterprise zones for production agriculture.
53	5.	Authorizing non-refundable fund transfers beyond those allowed in the standard budgeting
54		process or via voter approval.
55	6.	Creating a gross receipts tax or value-added tax by the State of Illinois.
56	7.	Selling or leasing the Illinois State Lottery.

56 7. Selling or leasing the Illinois State Lottery.

1	8.	Authorizing the transfer of funds from dedicated and special state funds for any reason
2	-	beyond their original intended purpose.
3	9.	Enacting a quarter-cent sales tax on purchases throughout the Chicago metropolitan area,
4		as defined by the counties in the Regional Transportation Authority Service area (Cook,
5	10	DuPage, Kane, Lake, McHenry, and Will Counties).
6 7	10.	A severance tax on current, low production oil and gas wells. We believe that if there is a
8		severance tax on new, high capacity oil and gas wells it should be at a level that will not impede the development or operation of those wells.
9	11.	A constitutional amendment to remove or permit removal of the present 8 to 5 state
10		income tax ratio between corporations and individuals.
11	12.	Rolling preexisting TIF parcels into a newly created TIF District or extending the life of the
12	12.	TIF Districts.
13	13.	Extension of real estate taxes on farmland by special taxing districts which provide non-
14	10.	essential services such as library districts, park districts, and forest preserve districts.
15	14.	The creation of a progressive or graduated state income tax rate structure.
16		
17		
18		
19		121. TAX REFORM
20		
21	Higher	r federal marginal income tax rates are inconsistent with economic growth and lower
22	interes	st rates. We support continued retention of the indexing of income taxes.
23		
24	We se	
25	1.	A reasonable Investment Tax Credit program and provision for the use of all carryover
26	_	investment tax credits.
27	2.	Immediate provisions to allow individuals who purchase their own health insurance an
28		exemption or deduction for health insurance costs.
29	3.	Further reductions in capital gains tax and/or indexing capital gains tax for inflation.
30	4.	Establishment of a "Farmer Savings Plan" (FSP) that allows for an allocation of income
31		into a tax exempt FSP for emergencies. Plan contributions should include earnings and
32		gains from a farm operation's proceeds and capital items. Contributions should be tax
33 34	5.	deductible at the time of contribution and be taxed at the time of distribution. An exemption allowing the cash rental of farmland to a family partnership or corporation
34 35	5.	without the 15.3 percent self-employment tax on the rents.
36	6.	A modification of federal tax code 1031 like-kind exchanges that:
37	0.	A. Relaxes the requirements on the reinvestment of the proceeds from agricultural
38		land sales.
39		B. Changes from 45 days to six months the time allowed to identify a non-taxable
40		exchange, and from six months to one year the time allowed to close and receive
41		property.
42	7.	Tax incentives for persons who sell or lease property, including but not limited to land,
43		machinery, and other farm assets to beginning farmers.
44	8.	Legislation which eliminates self-employment tax on Conservation Reserve Program
45		(CRP) payments.
46		
47	We su	
48	1.	The repeal of the amendments made to the 1099 IRS reporting in the Patient Protection
49		and Affordable Care Act. Farmland taken through eminent domain, or as a result of the
50		threat of eminent domain, which has been owned by the current owner or their immediate
51		family for 10 or more consecutive years should be exempt from capital gains taxes on that
52	0	property.
53	2.	The investigation and complete study of a federal flat rate income tax proposal to show its
54	0	possible long-term effects on production agriculture.
55	3.	The extension of the Federal Bonus Depreciation component of the Job Creation and
56		Worker Assistance Act of 2002.

1 2 3	4.	The unrestricted use of cash accounting regardless of the level of gross receipts of the primary farm or the cumulative gross receipts of all businesses related to the primary farm.
3 4		
4 5 6	We op 1.	Any tax and/or government-imposed user fee on commodity futures or options transactions.
7 8	2.	The concept of a Wealth Tax.
9		
10 11		122. TRANSPORTATION
12	14/	
13	We su	
14 15	1. 2.	Development of a long-range national transportation policy.
16	2. 3.	A system serving the needs of both passengers and freight across the country. Exploration of public-private partnerships.
17	3. 4.	Developing economical and energy efficient methods of meeting future transportation
18	ч.	needs and global competitiveness.
19 20		Land Use
21	We su	pport:
22	1.	Regulations which:
23 24		A. Provide improved noxious weed and brush control by state and local road authorities on the full width of highway rights-of-way.
25		B. Maintain safe levels of visibility.
26 27		<ul><li>C. Protect farmers' crops from unwarranted or careless spraying.</li><li>D. Ensure that ditch and roadside vegetation maintenance practices do not impair</li></ul>
28		drainage to or from adjoining farm fields.
29 30		E. Preserve vegetative cover adequate to prevent soil erosion on roadsides and in ditches.
31	2.	Enforcement of noxious weed and brush control by railroad authorities on railroad rights-
32 33	۷.	of-way, including the use of a soil conserving cover crop whether the railroad is in operation or abandoned.
34 35	3.	Giving counties the power to levy a fine of \$500 per acre of railroad rights-of-way where noxious weeds are not eradicated or controlled.
36	4.	Enforcement of drainage laws and regulations on railroad rights-of-way.
37 38	5.	Oversight of railroad construction projects and design standards by appropriate government agencies to minimize disturbance to adjoining farmland and farming
39 40	6.	operations and to adequately protect or repair drainage and drainage systems. Efforts to ensure that highway construction and improvement projects do not cause
41		serious, adverse impact to drainage nor cause erosion on adjacent land.
42	7.	Utilization of marginal farmland or poorer grades of land for new railroad or highway
43		construction projects where feasible in order to preserve tillable farmland.
44	8.	Utilization of existing rights-of-way for new highways to the maximum extent feasible in
45		order to minimize acquisition of new lands for highway purposes.
46 47	9.	Equitable compensation to landowners for disruption of farming operations by highway construction.
48		
49		Other
50	We su	
51	1.	Efficient mass transportation. We will support legislation or regulations to allow
52	-	disconnection of counties by referendum from mass transportation authorities.
53	2.	Use of biodiesel and ethanol by mass transit systems.
54 55	3.	Efforts to streamline the transportation project delivery process to reduce unnecessary time delays including:
56		A. Simplifying the environmental process for projects with few impacts.

1		B. Involving appropriate reviewing agencies early in the process to help expedite
2 3		<ul><li>overall project schedules.</li><li>C. Requiring greater coordination among federal reviewing agencies and setting time</li></ul>
4 5		<ul><li>limits for their review.</li><li>D. Use of the Design-Build project delivery method or other innovative construction</li></ul>
6 7 8 9 10 11 12	4.	<ul> <li>strategies.</li> <li>Efforts to educate policy makers and the public to ensure they understand:</li> <li>A. The value and necessity of efficient and effective transportation infrastructure.</li> <li>B. The complexity and cost of both long-term maintenance and expansion of transportation infrastructure to meet future needs.</li> <li>C. The importance of interconnectivity between modes.</li> <li>D. Requiring reconstruction projects be completed as quickly and reasonably as</li> </ul>
13 14 15 16 17 18 19	5.	possible minimizing impacts on the traveling public. The removal of concrete bridges on township roads with less than 20 feet clearance widths and banister heights taller than 18 inches from the register of historic places so they can be replaced with a new bridge that allows modern farm implements to easily pass over them.
20 21		123. TRANSPORTATION HIGHWAYS
22 23		Finance
24	We su	
25 26 27	1.	Legislation which provides that user fees such as motor fuel taxes, licensing and registration fees are the basic means for funding highway transportation systems in Illinois at both state and local levels.
28	2.	Maintaining the existing state Motor Fuel Tax Distribution formula.
29 30 31	3.	As an alternative to increasing the flat motor fuel tax, the creation of a new tax as a percentage of the wholesale price of fuel. This new tax would be distributed under the motor fuel tax distribution formula in place in 2018.
32 33	4.	Legislation collecting road user fees from hybrid, alternative fuel and electric highway vehicles.
34 35	5.	Legislation to increase the share of state-collected highway user fees allocated to units of local government for road and bridge construction and maintenance needs.
36 37	6.	Legislation increasing the state's township bridge program fund to at least \$30 million annually.
38 39	7.	Legislation providing for a more equitable formula for allocating motor fuel tax funds to counties based on both vehicle registration and road mileage.
40 41	8.	Use of all highway user fees including that part of motor fuel tax funds derived from highway use solely for construction and maintenance of roads, streets, and bridges.
42 43	9.	Legislation permitting establishment of transportation impact districts by road districts and counties.
44 45 46	10.	Repeal of Illinois Department of Transportation (IDOT) requirements stipulating that contractors must have federally approved apprenticeship and training programs to be considered a responsible bidder for road projects.
47 48 49	11.	Legislation to prevent the Illinois State Toll Highway Authority from constructing any new toll highways or extending any existing toll highways unless state law is changed to allow for strict accountability to the Illinois General Assembly.
50 51 52 53	12.	Seeking legislation that holds the Illinois State Toll Highway Authority accountable and responsible for the repair and maintenance of all overpass decks that are the result of tollway construction.
55 54 55 56	We be	lieve Illinois highways currently funded by tolls should remain as toll roads.

1	We o	ppose:
2	1.	The creation of a Statewide Vehicle Mileage Tax (VMT) which would tax citizens based
3		upon the number of miles driven annually.
4	2.	Legislation which would abolish motor fuel tax refunds for non-highway use.
5	3.	Mandatory bike paths on rural roads without adequate state funding.
6	4.	The sale or lease of any Illinois highway system.
7	5.	Formation of any new toll highway authority in Illinois unless existing state law is changed
8 9		to allow for strict accountability to the Illinois General Assembly.
9 10		Infrastructure
10	We si	upport:
12	1.	Proper administrative authorities in the development of standards for the construction of
13		local roads and bridges that correspond with the physical needs of the highway system
14		and the economic ability of local authorities to pay for them.
15	2.	The use of weight limit postings and associated permits only for the purpose of protecting
16		the physical integrity of the road.
17	3.	Legislation requiring weight limit postings intended to protect roadway surfaces during the
18		spring thaw timeframe be based on a per-axle limit rather than on a gross vehicle weight
19 20	4.	limit. Legislation granting vehicles hauling agricultural commodities from the field to the first
20 21	4.	point of delivery, an additional axle weight tolerance. That tolerance should match what is
22		allowed by the state statute pertaining to the harvest season permit, but without the need
23		for a written permit.
24	5.	Greater emphasis on roadway improvements and maintenance of existing state highways
25		while incorporating new construction technologies, with reduced emphasis on new
26		expressways and interstates.
27	6.	An approach to funding the replacement and/or maintenance of roads and bridges by the
28		IDOT through improved consultation with the local highway officials and the public as to
29	7	the necessity of each project considered.
30 31	7.	Requiring improvements to major highways be designed to a higher standard providing for significantly longer life before repairs are needed.
32	8.	The revision of IDOT design standards on state highways to consider the size of modern
33	0.	farm equipment.
34		
35		Access
36	We su	upport:
37	1.	Legislation that would ensure the continuity of local collector road systems by requiring
38		those routes be continuous, regardless of jurisdiction, between logical beginning and
39		ending points such as county or state highways or major traffic generating facilities, or that
40 41	2	a reasonable, viable alternate route be made available.
41	2.	Funding to assist in upgrading highways that retain business traffic through rural communities (where locally desired) while improving safety and traffic flow.
43	3.	Requiring all road authorities that seek to make any change to an existing road, that will
44	0.	result in establishment of a lower weight limit, to develop a plan for ingress and egress to
45		existing livestock and other agricultural facilities that have an established access to that
46		roadway. The plan must be functional, economically feasible, and reasonable with
47		agreement by both the road jurisdiction authorities and property owners/shippers along the
48		route.
49	4.	Seeking to allow local jurisdictions, at their discretion, to permit the movement of vehicles
50		hauling for production agriculture which exceed size or weight limits on posted roads
51 52	Б	where necessity dictates the need for the shipment to or from a specified farm.
52 53	5.	Seeking to require a unanimous decision to permanently post a reduced weight limit or close a road district road be shared equally with the highway commissioner, the county
53 54		engineer and a majority of the elected board members associated with that road district.
55	6.	Requiring the highway authority to provide written explanation if the highway authority
56	0.	denies a road access request of a landowner.

1 2 3	7.	The establishment of a process for landowners to appeal a decision of a highway authority.		
4	Other			
5	We su	ipport:		
6 7 8 9 10 11 12 13 14 15 16 17	1. 2.	Legislation permitting temporary signs within a reasonable distance of federal and state highways, other than interstates, directing traffic to seasonal farm produce outlets. Legislation establishing an adopt-a-highway program for rural sections of all roads in the		
	3.	state. Programs that encourage maintenance officials to offer landowners/land managers/operators the chance to accept or refuse soil removed from adjacent road		
	4.	ditches. Modification of highway standards by state and local highway officials to provide farm and field entrances that accommodate the needs of modern agriculture. This includes encouraging state, county, and township highway departments to use a plastic, bendable marker post instead of metal posts where object markers are used.		
18 19				
20 21		124. TRANSPORTATION RAILWAYS		
22	Finance			
23		ipport:		
24 25 26 27 28 29 30	1.	Strengthening of existing state laws so the Illinois Commerce Commission (ICC) can deal effectively with unfair rent increases imposed by railroads upon their tenants, and unrealistic sale prices for land offered by the railroads to tenants or other prospective buyers of railroad property.		
	2.	Legislation requiring full disclosure of the railroad grain transportation bidding process to the individuals who participate in the process after all bids have been made and rail cars have been allocated.		
31 32 33 34		ppose diversion of railroad earnings to holding companies or non-railroad businesses at the see of maintaining a viable railroad.		
35		Infrastructure		
36	We su	ipport:		
37 38	1.	Efforts to have more at-grade highway/railroad crossings signalized with warning lights and gates.		
39 40 41 42		<ul> <li>A. Where closure of the crossing would impose undue hardships on users of the road, greater flexibility should be shown by the ICC on safety considerations.</li> <li>B. Efforts should be made to ensure that the ICC considers accident history and emergency access along with other locally important issues in decisions on</li> </ul>		
43 44 45 46 47	2.	petitions to close railroad crossings. Protocols that maintain public safety by requiring railroads to give a minimum of two weeks advance notice of construction intentions to local residents and local government bodies prior to taking formal action on permit applications and prior to temporary railroad crossing closures.		
48 49 50 51 52	aband	ppose parallel branch line mergers of rail systems and the granting of railroad lonments which tend to lessen overall transportation competition or where there is or could oven traffic potential.		
53	Land Use			
54 55 56		upport legislation and regulations to provide that in the case of a railroad abandonment, the to owner of the tract of land from which the railroad right-of-way was obtained be given the		

1 2 3 4	comparable property rights in the area. If the current owner fails to exercise such option, the adjacent landowners will be offered the next right of refusal.			
5		Access		
6		upport:		
7	1.	Expedient placement of "exempt" postings at public road crossings on railroads which are		
8	_	abandoned.		
9	2.	A requirement that a notice of proposed crossing closure be posted at crossings 30 days		
10	-	in advance of a hearing to consider closure of the crossing.		
11	3.	The prompt communication, assessment of damages, cleanup and processing of claims		
12		incurred by both private landowners and units of local government following a train		
13 14	4	derailment.		
14	4.	Oversight by the ICC of median barriers and crossing safety devices placed in the approach to grade crossings which prohibit and/or hinder the flow of agricultural		
16		equipment through grade crossings.		
17	5.	Legislation that will allow the Surface Transportation Board, on petition of a state, to		
18	5.	declare all or part of a state to be an area of inadequate rail competition, with special rail		
19		customer remedies that would apply in such areas.		
20				
21		Other		
22	We s	upport:		
23	1.	Giving authority to the state to force a railroad to temporarily cease operations on a given		
24		stretch of track due to emergency conditions.		
25	2.	Maintaining state oversight of railroads under the purview of the ICC.		
26	3.	Working with the railroad industry and the ICC to establish regulations that require parked		
27		trains to maintain a 500-foot distance from ungated and/or unsignaled at-grade crossings		
28		in unincorporated areas to provide safe visibility for motorists. Trains parked at businesses		
29		should be exempt from this requirement when it is necessary while loading or unloading,		
30 21	4	but still maintain the maximum setback distance possible.		
31 32	4.	Meeting with railroad officials to determine ways to improve rail service to agriculture across Illinois.		
32 33	5.	Encouraging rail passenger services to maintain or improve service and increase efforts to		
34	0.	become self-sufficient.		
35				
36	We o	ppose the implementation of high speed rail projects unless the following conditions are		
37	incluc			
38	1.	Safe and convenient public access is provided across the railroad.		
39	2.	Owners of private crossings are provided continued access.		
40	3.	Landowners are fairly compensated for any takings associated with the project.		
41				
42				
43				
44		125. TRANSPORTATION VEHICLE REGULATIONS		
45 46		Vahialaa		
40 47		Vehicles		
47 48	1.	upport: Redefinition of "commercial motor vehicle" from the 10,001-pound threshold to that used		
48 49	1.	for the Commercial Driver's License (CDL) program - 26,001 pounds.		
<del>4</del> 0 50	2.	Legislation to reduce the requirement for semi-annual truck safety inspections to an		
51		annual inspection.		
52	3.	Legislation to require recreational motor vehicles and recreational trailers to pass a safety		
53	-	inspection on the same basis as trucks and trailers.		
54	4.	Legislation permitting second division vehicles with expired safety test decals to be driven		
55		to a repair facility and to a safety test lane.		
56				

1	5.	Efforts to develop regulations which encourage the establishment of more truck safety test			
2	0	lanes in the state.			
3	6.	Legislation that would allow annual reporting of mileage on mileage plates.			
4	7.	Efforts to allow low-mileage operations to pay a flat annual fee in lieu of submitting			
5		quarterly reports as a means of complying with the International Fuel Tax Agreement			
6	~	(IFTA).			
7	8.	Legislation to remove the requirement to post a bond to purchase a mileage plate.			
8	9.	Proration of renewal fees for farm truck and trailer plates based on the month of			
9	10	application.			
10	10.	Legislation establishing uniform maximum weights for all truck and trailer license plate			
11 12	11	classifications that share the same letter designation.			
12	11.	1. Regulation establishing uniform release mechanisms on all seat belts on newly			
13 14	10	manufactured vehicles.			
14	12.	Programs and actions that encourage the inclusion of automatic Daytime Running			
16	13.	Lights/Lamps (DRLs) and automatic headlights on newly manufactured vehicles.			
17	15.	Legislation to expand the applicability of the harvest season permit to include perishable produce.			
18	14.	Legislation to establish higher weight limits for farm wagons and non-licensed trailers.			
19	14.	Seeking to require that trailers submit to safety test inspections at the same weight			
20	15.	classification as required for trucks.			
20	16.	Seeking to establish a low mileage license for trucks with a reduced number of allowable			
22	10.	miles and a commensurate reduction in fee.			
23	17.	Seeking to decrease the cost of a "farm" truck plate until that cost falls at or below 50			
24	17.	percent of the cost of a flat weight plate.			
25	18.	Seeking to require all rural mail delivery vehicles to have flashing yellow lights on top of			
26	10.	the vehicle and a sign on the rear of the vehicle reading "U.S. Postal Service Mail Carrier."			
27	19.	Seeking to establish uniform truck and trailer lengths on Class III routes, other state			
28	101	highways, local roads, and streets.			
29	20.	Seeking to change federal regulations to keep written warnings from appearing on			
30	_0.	Compliance, Safety, and Accountability (CSA) reports.			
31	21.	Standardization of Federal Motor Carrier Safety Administration (FMCSA) and Illinois			
32		regulations to exempt from hazardous material requirements the transportation of 1,000			
33	gallons or less of diesel fuel by farmers.				
34					
35		Drivers			
36	We s	upport:			
37	1.	Enhanced driver education related to "Sharing the Road" with farm equipment, slow			
38		moving vehicles, large trucks, horses, and horse drawn vehicles.			
39	2.	Limiting the need for bi-annual Department of Transportation (DOT) driver physicals to			
40		only those drivers required to have a CDL.			
41	3.	A policy change within law enforcement agencies whereby officers will direct trucks to a			
42		nearby safe area to conduct their inspection, thus avoiding closure of a traffic lane for that			
43		purpose.			
44	4.	Drivers being allowed to make minor adjustments and/or repairs during a roadside			
45		inspection and at weigh stations to avoid any down time and costly unnecessary service			
46		calls.			
47	5.	Allowing a CDL applicant to have a checklist with them during the pre-trip inspection			
48		portion of the CDL testing process.			
49	6.	Allowing applicants for a Class A license with J50 or J51 restriction to have their driving			
50		skills evaluation based only on actual situations they face in normal farm semi operations.			
51	14/2				
52		ppose the federal regulation requiring that state-licensed physicians submit to training and			
53 54	certifi	cation to be eligible to perform DOT physical examinations for truck drivers.			
54 55					
ວວ 56					
50					

1		Government Oversight
2		upport: 
3 4	1.	Efforts to bring about greater uniformity and reciprocity among states on regulations affecting trucks and truck operators.
5 6	2.	Efforts to ensure uniform interpretation and application of motor vehicle regulations by all government administrative and enforcement personnel.
7 8	3.	Efforts to clarify and simplify the Vehicle Code and regulations relating to farm trucks and trailers.
9 10	4.	Encouragement of the Division of Motor Vehicles to accept truck license plate renewals at all driver services facilities.
11	5.	Efforts to have the County Engineer's office act as a clearing house for overweight and
12 13	6.	over dimension permits on all county and road district roads. Having more Commercial Driver's License testing facilities be made available in the state
14 15	7.	for written and driving examinations. Seeking to allow alternative means of posting bond, such as credit cards, for traffic and
16		weight violations by all drivers licensed in the State of Illinois.
17 18	8.	Seeking to permit second division vehicles, designed for pulling or carrying freight or cargo, that are visibly empty to forego the procedure of weighing at the scales in order to
19		reduce truck traffic congestion at weigh stations.
20	9.	Seeking to recognize vehicle license registered weight rate, rather than the vehicle
21		manufacturer's gross vehicle weight rating, to determine the eligibility of any vehicle for the
22 23		purpose of the driver skills test to acquire a driver's license.
23 24		Other
25	We si	upport:
26	1.	The establishment of a state agency/transportation industry group designed as a
27		coordinating mechanism to resolve problems associated with the regulation of motor
28		vehicles.
29	2.	Allowing anhydrous ammonia to be transferred from a cargo tank motor vehicle with a
30		maximum capacity of 12,000 gallons into containers of 3,000 gallons capacity or less
31		mounted on farm vehicles or into containers of 6,000 gallons mounted on motor-driven
32		applicators provided that the cargo tank motor vehicle has been converted to proper
33	0	industry standards and engineered and regulated equipment.
34 35	3.	Urging local law enforcement officials and local civic and public service organizations to promote all-terrain vehicle safety programs.
36	4.	Encouraging recreational users of roadways (runners/walkers/bikers) to wear reflective
37	4.	materials when on the road from dusk to dawn.
38	5.	Seeking to establish a notification procedure that would provide property owners with the
39	0.	necessary information to identify vehicles that are towed from their property.
40	6.	Seeking to exempt transportation of agricultural products from farm to market from
41		USDOT number and Unified Carrier Registration (UCR) registration.
42		
43		
44		
45		126. TRANSPORTATION UNMANNED AIRCRAFT SYSTEMS
46	<b>M</b> (a. a.	
47 48	1.	upport: The use of Unmanned Aerial Vehicles (UAVs) for commercial purposes (i.e., agricultural,
48 49	1.	forestry, and other natural resource use).
<del>5</del> 0	2.	Working with the Federal Aviation Administration (FAA) to review the legal and technical
51		issues related to agricultural UAV use.
52	3.	Reasonable FAA regulations regarding agricultural use and permitting for private and
53		commercial applications.
54	4.	Requiring the operator of the UAV to gain the consent, in writing, of the landowner or
55 56	5.	tenant, if the UAV will be surveying or gathering data above the private property. The development of guidelines for the safe operation of UAVs for all users.

1	6.	Landowners and tenants to be able to fly their fields, for any reason, without it being		
2 3	7.	considered a commercial activity. Protecting property and privacy rights of farms and livestock operations while encouraging		
3 4	7.	legitimate commercial and recreational uses of UAVs.		
5				
6	We op	We oppose:		
7	1.	Federal, state, and law enforcement agencies using UAVs for the purpose of regulatory		
8		enforcement, litigation, and as a sole source for natural resource inventories used in		
9 10	2.	planning efforts. FAA regulations that classify UAVs as fixed-wing aircraft.		
10	∠. 3.	FAA regulations that require a private pilot's license and third-class medical certification to		
12	0.	operate UAVs under 55 pounds.
